

LibreMax Asset-Backed Income Fund

Prospectus

Class A – LMAFX

Class I – LMIFX

Class L – LMLFX

April 20, 2026

The Fund. The Fund is a newly organized, non-diversified closed-end management investment company that continuously offers its shares and operates as an interval fund. The Fund has received an exemptive order from the SEC that permits the Fund to offer more than one class of Shares. Class I Shares are currently being offered and Class A and Class L Shares are available for future sale. Common Shares, in the future (together with the Class I Shares, the “Common Shares” or “Shares”). The Fund may offer additional classes of Common Shares in the future.

Investment Objective. The Fund seeks to provide attractive risk-adjusted returns and generate current income. The Fund seeks to achieve its investment objective by allocating primarily to a wide array of private asset-backed credit and securitized debt investments. There can be no assurance that the Fund will achieve its investment objective. See “The Fund’s Investment Objective and Strategies” and “Principal Risks of the Fund.”

Investment Strategy. To pursue its investment objective, the Fund will invest in private asset-backed finance products (“Private ABF Investments”) and traded structured credit products (“Traded Securitizations”) and other credit related investments that provide exposure to asset-backed investments (collectively, with Private ABF Investments and Traded Securitizations, “ABF Investments”). In contrast to Traded Securitizations, Private ABF Investments do not trade on an organized market. Under normal circumstances, the Fund will invest at least 80% of its net assets, plus the amount of any borrowing for investment purposes, in securities and other investments that the Investment Manager believes are, at the time of investment, considered to be ABF Investments (the “80% Policy”). The Fund will seek to achieve its investment objective by investing in a wide array of ABF Investments such as loans, leases, mortgages, and other receivables across a broad range of asset classes.

In addition, the Fund may invest up to 20% of its net assets (plus the amount of any borrowings for investment purposes) in investments other than ABF Investments as described in this Prospectus (together with the ABF Investments, the “Investments,” and each, an “Investment”), including cash or cash equivalents, and liquid fixed-income securities. For temporary defensive purposes, liquidity management or in connection with implementing changes in its asset allocation, the Fund may hold a substantially higher amount of liquid investments, including cash and cash equivalents.

The Fund may invest up to 25% of its net assets in securities denominated in currencies other than the U.S. dollar. There is no limit on the duration and maturity of any security in the Fund’s portfolio. The longer a security’s duration, the more sensitive it will be to changes in interest rates. The Fund may invest substantially in fixed-income products that are rated below investment grade (i.e., “high yield” or “junk” ratings), or that are unrated but determined to be of equivalent quality by the Investment Manager, at the time of purchase. Because the Fund may invest in below investment grade securities without limit, the Fund’s investments should be considered speculative. The Fund may also invest in other fixed income, credit-related securities, and instruments.

The Fund intends to invest in derivative investments including treasury futures and options and swaps.

To the extent consistent with the liquidity requirements applicable to interval funds under Rule 23c-3 under the 1940 Act, the Fund may invest without limit in illiquid securities.

Repurchase Offers. The Fund operates as an interval fund. To provide liquidity to common shareholders, the Fund has adopted a fundamental investment policy to make quarterly offers to repurchase between 5% and 25% of its outstanding Common Shares at net asset value. The Fund currently intends to offer to repurchase 5% of the Fund's outstanding Common Shares quarterly. The repurchase offers are expected to be made in January, April, July, and October of each year. The Fund expects that its first repurchase offer will occur in July 2026.

Investment Risks. Investors should carefully consider the Fund's risks and investment objective, as an investment in the Fund may not be appropriate for all investors and is not designed to be a complete investment program. Because of the risks associated with the Fund's ability to invest in high yield securities (commonly referred to as "junk bonds"), loans and related instruments and mortgage-related and other asset-backed instruments such as consumer credit instruments, foreign securities (and related exposure to foreign currencies), and the Fund's intention to use leverage (see "Principal Risks of the Fund—Use of Leverage: Risk of Borrowing by the Fund"), an investment in the Fund should be considered speculative and involving a high degree of risk, including the risk of a substantial loss of investment. **Before making an investment/allocation decision, investors should (i) consider the suitability of this investment with respect to an investor's investment objectives and personal financial situations and (ii) consider factors such as an investor's net worth, income, age, risk tolerance, and liquidity needs. Investment should be avoided where an investor has a short-term investing horizon and/or cannot bear the loss of some or all of their investment.**

Before buying any of the Common Shares, you should read the discussion of the principal risks of investing in the Fund in "Principal Risks of the Fund" beginning on page 17 of this Prospectus.

- An investment in the Fund is not suitable for investors who need certainty about their ability to access all of the money they invest in the short term.
- There is no guarantee that you will be able to sell your Common Shares at any given time or in the quantity that you desire. You should consider Common Shares to be illiquid.
- There is no assurance that the Fund will be able to make any distributions to its shareholders and, if it makes distributions, that they will not decline or that any distributions will be at any particular level or correspond to any particular yield.
- The Fund's distributions may be funded from unlimited amounts of offering proceeds or borrowings, which may constitute a return of capital and reduce the amount of capital available to the Fund for investment. Any capital returned to shareholders through distributions will be distributed after payment of fees and expenses. Although the Fund's distributions may constitute a return of capital, return of capital does not constitute income.
- The ultimate tax characterization of the Fund's distributions in a calendar year may not finally be determined until after the end of that calendar year. The Fund may make distributions during a calendar year that exceed the Fund's net investment income and net realized capital gains for that year. In such a situation, the amount by which the Fund's total distributions exceed net investment income and net realized capital gains would generally be treated as a tax-free return of capital up to the amount of the shareholder's tax basis in such shareholder's Common Shares, with any amounts exceeding such basis treated as gain from the sale of his or her Common Shares. Because a return of capital distribution will reduce the tax basis of a shareholder's Common Shares, a return of capital distribution may result in a higher capital gain or lower capital loss when those Common Shares on which the distribution was paid on are sold.
- Because of the risks associated with (i) the Fund's ability to purchase asset-backed securities and loans, and (ii) the Fund's ability to use leverage, an investment in the Fund should be considered speculative and involving a high degree of risk, including the risk of a substantial loss of investment.
- An investor investing in Class A Common Shares will pay a sales load of up to 3.00% and offering expenses of up to 0.03% on the amounts it invests. If you pay the maximum aggregate sale load of

3.00% and offering expenses, you must experience a total return on your 3.12% in order to recover these expenses.

Neither the U.S. Securities and Exchange Commission nor the U.S. Commodity Futures Trading Commission has approved or disapproved of these securities or determined that this Prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

Common Shares do not represent a deposit or obligation of, and are not guaranteed or endorsed by, any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board, or any other government agency.

This Prospectus sets forth concisely the information about the Fund that a prospective investor ought to know before investing in the Fund. Please read this Prospectus carefully and retain it for future reference. Additional information about the Fund, including a Statement of Additional Information dated April 20, 2026 (the “SAI”), has been filed with the SEC. The SAI is incorporated by reference into this Prospectus, which means it is part of this Prospectus for legal purposes. The Fund also will produce both annual and semi-annual reports that will contain important information about the Fund. Copies of the SAI and the Fund’s annual and semi-annual reports, when available, may be obtained upon request, without charge, by calling 1-855-965-5812, by writing to the Fund at LibreMax Asset-Backed Income Fund, c/o U.S. Bank Global Fund Services P.O. Box 219252 Kansas City, Missouri 64121-9252 or by visiting the Fund’s website at www.libremax.com. You may also call this toll-free telephone number to request other information about the Fund or to make shareholder inquiries. Information on, or accessible through, the Fund’s website is not a part of, and is not incorporated into, this Prospectus. You may also access reports and other information about the Fund on the EDGAR Database on the SEC’s Internet site at www.sec.gov. You may get copies of this information, with payment of a duplication fee, by electronic request at the following email address: publicinfo@sec.gov.

The Fund has not authorized anyone to provide you with information other than that contained or incorporated by reference in this Prospectus. The Fund does not take any responsibility for and does not provide any assurances as to the reliability of, any other information that others may give you. The Fund is not making an offer of these securities in any jurisdiction where the offer is not permitted. You should not assume that the information contained in this Prospectus is accurate as of any date other than the date on the front of this Prospectus. The Fund’s business, financial condition, results of operations and prospects may have changed since that date.

PROSPECTUS SUMMARY

This is only a summary and may not contain all information that you should consider before investing in shares of the LibreMax Asset-Backed Income Fund (the “Fund”). You should review the more detailed information contained in this Prospectus and in the Fund’s Statement of Additional Information (“SAI”) before investing in the Fund.

The Fund

The Fund is a newly organized, non-diversified, closed-end management investment company that will continuously offer its Common Shares. A non-diversified fund may invest a greater proportion of its assets in a small number of issuers, and may be subject to greater risk and substantial losses as a result of changes in the financial condition or the market’s assessment of such issuers. The Fund will operate as an “interval fund” (as defined below).

Securities Offered

The Fund will continuously offer its Common Shares. The Fund has received an exemptive order from the Securities and Exchange Commission (the “SEC”) that permits the Fund to issue multiple classes of its shares and to impose distribution and shareholder servicing fees. The Fund is currently offering Class I Shares and intends to offer Class A and Class L Shares in the future.

Class A Common Shares will be initially offered at \$10.00 per share, plus applicable sales charges, and thereafter will be offered on a continuous basis at net asset value (“NAV”) per share, plus applicable sales charges. For Class A Common Shares, the minimum initial investment is \$10,000 per account.

Class I Common Shares will be initially offered at \$10.00 per share, and thereafter will be offered on a continuous basis at net asset value (“NAV”) per share. For Class I Common Shares, the minimum initial investment is \$100,000 per account.

Class L Common Shares will be initially offered at \$10.00 per share, and thereafter will be offered on a continuous basis at net asset value (“NAV”) per share. For Class L Common Shares, the minimum initial investment is \$50,000 per account.

The minimum investment amounts may be modified or waived by the Fund or the Investment Manager. See “Plan of Distribution” for additional information.

Periodic Repurchase Offers

The Fund is an “interval fund,” a type of fund that, in order to provide liquidity to shareholders, has adopted a fundamental investment policy to make quarterly offers to repurchase between 5% and 25% of its outstanding Common Shares at NAV. Subject to applicable law and approval of the Board, the Fund currently expects to offer to repurchase 5% of the Fund’s then outstanding Common Shares at NAV quarterly. Written notification of each quarterly repurchase offer (the “Repurchase Offer Notice”) will be sent to shareholders at least 21 calendar days and not more than 42 days before the repurchase request deadline (i.e., the date by which shareholders can tender their Common Shares in response to a repurchase offer) (the “Repurchase Request Deadline”). Subject to Board approval, Repurchase Request Deadlines are expected to occur each January, April, July, and October, and Repurchase Offer Notices are expected to be sent to shareholders each December, March, June, and September preceding each such Repurchase Request Deadline. Common Shares are not listed on any securities exchange, and the Fund does not anticipate that a secondary market will develop for its Common Shares. Accordingly, you may not be able to sell Common Shares when and/or in the amount that you desire. Investors should consider Common Shares of the Fund to be an illiquid investment. Thus, the Common Shares are appropriate only as a long-term investment. In addition, the Fund’s repurchase offers may subject the Fund and shareholders to special risks. See “Principal Risks of the Fund—Repurchase Offer Risk” at page 45.

INVESTMENT OBJECTIVE AND STRATEGIES

Investment Objective

The Fund seeks to provide attractive risk-adjusted returns and generate current income. The Fund seeks to achieve its investment objective by allocating primarily to a wide array of private asset-backed credit and securitized debt investments. There can be no assurance that the Fund will achieve its investment objective.

Portfolio Management Strategies

To pursue its investment objective, the Fund will invest in private asset-backed finance products (“Private ABF Investments”) and traded structured credit products (“Traded Securitizations”) and other credit related investments (collectively, with Private ABF Investments and Traded Securitizations, “ABF Investments”). Private ABF Investments do not trade on an organized market. Under normal circumstances, the Fund will invest at least 80% of its net assets, plus the amount of any borrowing for investment purposes, in securities and other investments that the Investment Manager believes are, at the time of investment, considered to be ABF Investments (“80% Policy”). The Fund will seek to achieve its investment objective by investing in a wide array of ABF Investments such as loans, leases, mortgages and other receivables across a broad range of asset classes. ABF Investments may provide direct or indirect exposure to asset-backed finance investments. The asset classes may include, but are not limited to, residential and consumer loans, small business loans, trade receivables, royalties, financial assets, physical assets such as equipment or other types of secured credit backed by physical assets. For purposes of the 80% Policy, the Fund may, among other things, (i) buy or commit to ABF Investments including equity investments that provide exposure to ABF Investments, (ii) originate loans secured by ABF Investments including senior and mezzanine loans, (iii) insure or provide capital relief against ABF Investments, (iv) provide capital to enterprises whose primary business is organization/management of ABF Investments and (v) invest in securitizations and/or derivative investments that provide exposure to ABF Investments. In addition, the Fund may also invest a portion of its assets in notes, bills, debentures, bank loans, convertible and preferred securities and government and municipal obligations. The Fund is permitted to change its 80% investment policy without a shareholder vote, provided the Fund conducts a repurchase offer prior to the change, the Fund provides at least 60 days’ prior notice of any change in the policy in advance of the offer, the offer is not oversubscribed, and the Fund purchases shares at their net asset value.

In addition, the Fund may invest up to 20% of its net assets (plus the amount of any borrowings for investment purposes) in investments other than ABF Investments as described in this Prospectus (together with the ABF Investments, the “Investments,” and each, an “Investment”), including cash or cash equivalents, and liquid fixed-income securities. For temporary defensive purposes, liquidity management or in connection with implementing changes in its asset allocation, the Fund may hold a substantially higher amount of liquid investments, including cash and cash equivalents.

The Fund may invest up to 25% of its net assets in securities denominated in currencies other than the U.S. dollar. There is no limit on the duration and maturity of any security in the Fund’s portfolio. The longer a security’s duration, the more sensitive it will be to changes in interest rates. The Fund may invest substantially in fixed-income products that are rated below investment grade (i.e., “high yield” or “junk” ratings), or that are unrated but determined to be of equivalent quality by the Investment Manager, at the time of purchase. Because the Fund may invest in below investment grade securities without limit, the Fund’s investments should be considered speculative. The Fund may also invest in other fixed income, credit-related securities, and instruments.

The Fund intends to invest in derivative investments including treasury futures, options and swaps. The use of derivative instruments may have a leverage effect on the portfolio. Please see “Use of Leverage” at page 8 below.

To the extent consistent with the liquidity requirements applicable to interval funds under Rule 23c-3 under the 1940 Act, the Fund may invest without limit in illiquid securities.

Private ABF Investments and Traded Securitizations

The Fund will generally invest its ABF Investments across two main strategies: investments in Private ABF Investments and in Traded Securitizations. While the Fund expects the allocation to Private ABF Investments will be larger than the allocation to Traded Securitizations, the allocation between these two strategies may fluctuate

significantly depending upon various factors, including market and economic conditions, availability of investment opportunities across the strategies and fund subscription and repurchase activity.

Within the Private ABF Investments strategy, the Fund will invest in private asset-backed financed securities and loans, including residential and consumer loans (and participations thereon), including, but not limited to, consumer unsecured personal loans, business loans, commercial real estate mezzanine loans, participations and notes backed by residential, multi-family, hotel, office and construction projects, commercial warehouse financings backed by cashflows and/or other commercial assets of various borrowers or pools of collateral, including, but not limited to, aviation, marine, railcar, automobiles, leases, solar, equipment, datacenters, digital infrastructure and other assets, and other structured finance products and specialty finance loans, notes and participations. In addition, Private ABF Investments may include equity and equity like investments in asset-backed financed securities like home equity investments (“HEIs”). The Fund may invest in whole loans directly, or indirectly, including through one or more wholly-owned subsidiaries or trust structures and may enter into arrangements with originators or other counterparties to acquire such loans. The Fund may purchase such assets on a leveraged basis through the use of reverse repurchase agreements or other financings.

Within the Traded Securitization strategy, the Fund will invest in residential mortgage backed securities, including, but not limited to, securitizations backed by HEIs, residential home equity loan contracts, commercial mortgage-backed securities (“CMBS”), consumer and commercial asset-backed securities, which included securitizations backed by commercial assets of various borrowers or pools of collateral, including, but not limited to, credit cards, aviation, automobile loans and leases, solar, and other receivables and asset classes, collateralized loan obligations and collateralized debt obligations. The Fund may invest in, or obtain exposure to, loans that may be “covenant lite.” The Fund uses the term “covenant-lite” to refer generally to loans that do not have financial maintenance covenants. The Fund may invest in sub-prime loans, which are loans offered to buyers who do not meet the criteria for prime loans typically due to poor credit history, low income or insufficient credit history.

The Fund may invest in every level of capital structure, including owning partial or whole loans or residual equity positions and including the equity or “first loss” tranche (i.e., the tranche that absorbs the initial or first losses on an investment). Residual equity positions are the amounts remaining after other obligations have been satisfied. The Fund may invest in securitization risk retention tranches in the capacity of a third-party purchaser with respect to securitizations sponsored by others. Securitization risk retention tranches are tranches owned by the originator, sponsor and/or original lender to ensure that they share in potential losses.

There are no limits on investments in permitted investment types, except as set forth in the Fund’s fundamental and non-fundamental investment policies.

Hedging Strategy

To maximize its defensiveness and flexibility, the Fund may also engage in hedging techniques to manage the level of credit, foreign exchange, interest rate or other risks in the Fund. This hedging can be used through a variety of products, including treasuries, futures and options on treasuries, and swaps.

The Fund may also enter into currency transactions to provide for the purchase or sale of a currency needed to purchase a security denominated in such currency. In addition, the Fund may enter into forward currency contracts to protect against changes in currency exchange rates, to increase exposure to a particular foreign currency, to shift exposure to currency fluctuations from one currency to another or to seek to increase returns. A forward currency contract is an agreement to purchase or sell a specific currency at a future date at a fixed price.

Investment Process

In selecting investments, LibreMax Capital, LLC (“LibreMax” or the “Investment Manager”) conducts a comprehensive analysis of three key factors as part of its investment process. First, the Investment Manager utilizes a macro-economic approach, which encompasses an analysis of credit risk and increased or shortened duration. The Investment Manager seeks to use market information to carefully establish likely impacts of anticipated changes in the macro-economy, regulatory and legal environment on the Fund’s holdings and adjust those positions accordingly.

Second, the Investment Manager analyzes relative value to determine the best sector allocations. As part of this process, the Investment Manager seeks to uncover potential discrepancies between market prices and the

Investment Manager's perceived intrinsic value of securities and other investment instruments while weighing and considering applicable risks to form a trading strategy.

Finally, the Investment Manager may use proprietary credit model analytics as a micro-economic analysis. The Investment Manager's micro analysis uses collateral level information in conjunction with cash flow projections of securities to analyze potential upside and risks of each position held and traded within the Fund's portfolios or being considered for purchase. Such analysis generates expected average life, duration and yield projections. The portfolio management team utilizes the data generated from these models to analyze market data and form views on individual investments.

The Investment Manager will utilize the data generated from these approaches to scrutinize market data and form views on investment themes, individual securities, and hedges. An investment theme is an economic, social, demographic, or other long-term trend that is expected to benefit certain asset classes or companies. Quantitative modelling is used to filter available opportunities within a given strategy, and is important as an analytical tool, although it is not specifically used for identifying investments.

With respect to loan originations, the Fund will benefit from the Investment Manager's experience in structured products across a wide spectrum of asset classes. The Fund will leverage the Investment Manager's and its affiliates' existing relationships with various issuers. The Fund will seek to provide flexible financing solutions across the capital structure from senior asset-backed lending to whole loan origination. Borrowers may be well established financial platforms or early stage where the Fund will seek to grow with the borrowers.

Use of Leverage

The Fund intends to use leverage as and to the extent permitted by the Investment Company Act of 1940, as amended (the "1940 Act"). The Fund is permitted to obtain leverage using any form of financial leverage instruments, including funds borrowed from banks or other financial institutions, credit facilities, margin facilities, notes or preferred stock and leverage attributable to reverse repurchase agreements or similar transactions. The Fund is authorized to borrow money in connection with its investment activities, to satisfy repurchase requests from Fund shareholders, and to otherwise provide the Fund with temporary liquidity. The Fund expects to engage in leverage through borrowings, reverse purchase agreements or similar financing agreements. The Fund may choose to increase or decrease, or eliminate entirely, its use of leverage over time and from time to time based on the Investment Manager's assessment of the yield curve environment, interest rate trends, market conditions and other factors. By using leverage, the Fund seeks to obtain a higher return for Shareholders than if the Fund did not use leverage. Leveraging is a speculative technique and there are special risks and costs involved. There can be no assurance that a leveraging strategy will be used or that it will be successful during any period in which it is employed.

With respect to senior securities representing indebtedness, other than temporary borrowings as defined under the 1940 Act, the Fund is required under current law to have an asset coverage of at least 300%, as measured at the time of borrowing and calculated as the ratio of the Fund's total assets (less all liabilities and indebtedness not represented by senior securities) over the aggregate amount of the Fund's outstanding senior securities representing indebtedness. With respect to senior securities that are stocks, the Fund is required under current law to have an asset coverage of at least 200%, as measured at the time of the issuance of any such shares of preferred stock and calculated as the ratio of the Fund's total assets (less all liabilities and indebtedness not represented by senior securities) over the aggregate amount of our outstanding senior securities representing indebtedness plus the aggregate liquidation preference of any outstanding shares of preferred stock.

Other investments held by the Fund may also expose the Fund to leverage, which may be excluded from the limitation noted above. In addition, the Fund's investments in certain derivatives may be viewed as a form of leverage. Please see "Leverage," and "Principal Risks of the Fund — Leverage Risk" for additional information regarding leverage and related risks.

Investment Manager

LibreMax Capital, LLC, a Delaware limited liability company, serves as investment manager to the Fund. Subject to the oversight of the Board, LibreMax is responsible for managing the investment activities of the Fund. Greg Lippmann is responsible for the day-to-day management of the Fund.

LibreMax Capital, LLC, located at 601 Lexington Avenue, 30th Floor New York, New York 10022, is an SEC-registered investment advisory firm formed in 2010 and has been registered with the Securities and Exchange Commission as an investment advisory since 2011. In addition to the Fund, LibreMax currently provides investment advisory services to privately offered pooled investment funds, non-U.S. private investment funds and separately managed accounts. LibreMax Capital, LLC is wholly owned by LibreMax Intermediate Holdings, LP (“LibreMax Holdings”). GKL Holdings, LLC (a holding company that is majority owned by Greg Lippmann) is the principal underlying owner of LibreMax Holdings.

As of December 31, 2025, LibreMax and its affiliates had approximately \$14.32 billion in assets under management.

Distributions and Dividend Reinvestment Plan

The Fund intends to distribute substantially all of its net investment income to shareholders in the form of dividends. The Fund intends to declare income dividends quarterly and distribute them quarterly to shareholders of record. At least annually, the Fund also intends to distribute to you your pro rata share of any available net capital gain and taxable ordinary income, if any.

Although it does not currently intend to do so, the Board may change the Fund’s dividend policy and the amount or timing of Fund distributions, based on several factors. Unless shareholders specify otherwise, dividends will be reinvested in Common Shares of the Fund in accordance with the Fund’s dividend reinvestment plan (the “Plan”). The Fund may pay distributions from sources that may not be available in the future and that are unrelated to the Fund’s performance, such as from offering proceeds and/or borrowings. See “Distributions” and “Dividend Reinvestment Plan.”

Distributor, Custodian and Transfer Agent

Quasar Distributors, LLC serves as the Fund’s principal underwriter and distributor. U.S. Bank Global Fund Services serves as the primary custodian of the Fund’s assets. U.S. Bank Global Fund Services provides fund accounting, administrative and certain compliance services to the Fund. U.S. Bank Global Fund Services also serves as the Fund’s transfer agent and dividend disbursement agent, and as such is responsible for processing investor subscriptions and repurchases.

Unlisted Closed-End Fund Structure; Limited Liquidity

Common Shares of the Fund are not listed for trading on any securities exchange. There is currently no secondary market for Common Shares and the Fund does not expect any secondary market to develop for its Common Shares. Shareholders of the Fund are not able to have their Common Shares redeemed or otherwise sell their Common Shares daily because the Fund is an unlisted closed-end fund. To provide liquidity to shareholders, the Fund is structured as an “interval fund” and conducts periodic repurchase offers for a portion of its outstanding Common Shares. Investors should consider Common Shares of the Fund to be an illiquid investment. An investment in the Fund is suitable only for long-term investors who can bear the risks associated with the limited liquidity of the Common Shares. Investors should consider their investment goals, time horizons and risk tolerance before investing in the Fund.

Investor Suitability

An investment in the Fund involves a considerable amount of risk. It is possible that you will lose money. An investment in the Fund is suitable only for investors who can bear the risks associated with the limited liquidity of the Common Shares and should be viewed as a long-term investment. Before making your investment decision, you should (i) consider the suitability of this investment with respect to your investment objectives and personal financial situation and (ii) consider factors such as your personal net worth, income, age, risk tolerance and liquidity needs. An investment in the Fund should not be viewed as a complete investment program. Please see “Risk Factors” at page 11 below.

Valuation

For purposes of calculating NAV, portfolio securities and other assets for which market quotations are readily available are valued at market value. A market quotation is readily available only when that quotation is a quoted price (unadjusted) in active markets for identical investments that the Fund can access at the measurement date, provided that a quotation will not be readily available if it is not reliable. Market value is generally determined on the basis of official closing prices or the last reported sales prices.

Investments for which market quotations are not readily available are valued at fair value as determined in good faith pursuant to Rule 2a-5 under the 1940 Act. As a general principle, the fair value of a security or asset is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Board has designated the Investment Manager as the Fund's Valuation Designee for purposes of Rule 2a-5 under the 1940 Act. As Valuation Designee, the Investment Manager will be responsible for the valuation of the Fund's portfolio investments for which market quotations are not readily available, as determined in good faith pursuant to the Investment Manager's and the Fund's valuation policies and consistently applied valuation processes. The Fund may use the fair value of a security as determined by the Valuation Designee in accordance with procedures approved by the Board if market quotations are unavailable or deemed unreliable or if events occurring after the close of a securities market and before the Fund values its assets would materially affect NAV. A security that is fair valued may be valued at a price higher or lower than actual market quotations or the value determined by other funds using their own fair valuation procedures. Unlike the closing price of a security on an exchange, fair value determinations employ elements of judgment. The fair value assigned to a security may not represent the value that the Fund could obtain if it were to sell the security. The Fund determines NAV per share in accordance with the methodology described in the Investment Manager's and the Fund's valuation policies and procedures. Valuations of Fund investments are disclosed in reports publicly filed with the SEC. The Fund will calculate the NAV of each class of its shares daily. In addition, the Fund intends to publicly report the NAV per share of each class of the Fund on its website daily. Please refer to "How Fund Shares are Priced" at page 62 for more information on the Fund's valuation policies.

Taxation

The Fund intends to elect to be treated for U.S. federal income tax purposes, and intends to qualify in each taxable year, as a regulated investment company ("RIC") under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code"). As a RIC, the Fund generally will not be subject to corporate-level U.S. federal income taxes on its "investment company taxable income" (as such term is defined in the Code, but without regard to the deductions for dividends paid) or net capital gains (that is, the excess of net long-term capital gains over net short-term capital losses), if any, that it distributes in each taxable year (or is deemed to distribute, including amounts that are reinvested pursuant to the Dividend Reinvestment Plan, as described below) to Fund shareholders, provided that certain requirements are satisfied. To qualify for and maintain its treatment as a RIC for U.S. federal income tax purposes, the Fund will be required to meet certain specified source-of-income and asset diversification requirements, and the Fund will be required to distribute in each taxable year to holders of its stock dividends for U.S. federal income tax purposes in an amount at least equal to the sum of 90% of its investment company taxable income and 90% of its net tax-exempt interest income for such taxable year. The Fund intends to distribute to holders of its stock, at least annually, substantially all of its investment company taxable income, net tax-exempt income, and net capital gains. See "U.S. Federal Income Tax Matters" at page 67.

Fiscal Year

For accounting purposes, the Fund's fiscal year is expected to be December 31.

Reports to Shareholders

As soon as practicable after the end of each calendar year, a statement on Form 1099-DIV identifying the sources of the distributions paid by the Fund to its shareholders for tax purposes will be furnished to shareholders subject to Internal Revenue Service ("IRS") reporting. In addition, the Fund will prepare and transmit to its shareholders an unaudited semi-annual and an audited annual report within 60 days after the close of the period for which the report is being made, or as otherwise required by the 1940 Act.

ERISA Plans and Other Tax-Exempt Entities

Investors subject to the Employee Retirement Income Security Act of 1974, as amended (“ERISA”), and other tax-exempt entities, including employee benefit plans, individual retirement accounts, 401(k) plans and Keogh plans, may purchase Common Shares. Because the Fund is registered as an investment company under the 1940 Act, the underlying assets of the Fund will not be considered to be “plan assets” of the ERISA plans investing in the Fund for purposes of ERISA’s fiduciary responsibility and prohibited transaction rules. Thus, neither the Fund nor the Investment Manager will be a fiduciary within the meaning of ERISA with respect to the assets of any ERISA plan that becomes a shareholder, solely as a result of the ERISA plan’s investment in the Fund.

Co-Investments

The 1940 Act imposes limits on certain privately negotiated co-investments with affiliates of the Fund. The Investment Manager and the Fund are seeking exemptive relief from the SEC permitting the Fund to invest alongside other funds (including private funds) managed by the Investment Manager or its affiliates in privately negotiated portfolio investments. However, the exemptive relief includes conditions that may limit or restrict the Fund’s ability to participate in a portfolio investment, including, without limitation, in the event that the available capacity with respect to a portfolio investment is less than the aggregate recommended allocations to the Fund and the other funds. In such cases, the Fund may participate in such investment to a lesser extent or, under certain circumstances, may not participate in such investment.

Risk Factors

Investing in the Fund involves risks, including the risk that a shareholder may receive little or no return on their investment or that a shareholder may lose part or all of their investment. Below is a summary of some of the principal risks of investing in the Fund. For a more complete discussion of the risks of investing in the Fund, see “Principal Risks of the Fund.” Shareholders should consider carefully the following principal risks before investing in the Fund:

- Common Shares will not be listed on any securities exchange;
- Although the Fund intends to implement a quarterly share repurchase program, there is no guarantee that an investor will be able to sell all of the Common Shares that the investor desires to sell. The Fund should therefore be considered to offer limited liquidity;
- The Fund is exposed to risks associated with changes in interest rates;
- The Fund’s distributions may be funded from offering proceeds or borrowings, which may constitute a return of capital and reduce the amount of capital available to the Fund for investment. Any capital returned to Fund shareholders through distributions will be distributed after payment of fees and expenses, as well as any applicable sales load;
- Because the asset-backed finance investments pursued by the Fund are not typically registered under the federal securities laws like stocks and bonds, investors in loans have less protection against improper practices than investors in registered securities.
- ABF Investments are generally not insured or guaranteed by the related sponsor or any other entity and therefore, if the assets or sources of funds available to the issuer are insufficient to pay those outstanding liabilities, the Fund will incur losses.
- The Fund may invest a portion of its assets in securities and credit instruments associated with real assets, including real estate, infrastructure, digital infrastructure, datacenters, railcar, and aviation, which have historically experienced substantial price volatility.
- The Fund may invest a portion of its assets in securities and credit instruments of companies in the real estate industry, which has historically experienced substantial price volatility.
- Below investment grade instruments (i.e., “junk bonds”) have predominantly speculative characteristics and may be particularly susceptible to economic downturns, which could cause losses;
- Certain investments may be exposed to the credit risk of the counterparties with whom the Fund deals;

- CLOs may present risks similar to those of other types of debt obligations and, in fact, such risks may be of greater significance in the case of CLOs depending upon the Fund's ranking in the capital structure. In certain cases, losses may equal the total amount of the Fund's principal investment. Investments in structured vehicles, including equity and junior debt securities issued by CLOs, involve risks, including credit risk and market risk.
- The valuation of securities or instruments that lack a central trading place (such as fixed-income securities or instruments) may carry greater risk than those that trade on an exchange.
- Derivative investments have risks, including the imperfect correlation between the value of such instruments and the underlying assets of the Fund.
- The Fund may be materially adversely affected by market, economic and political conditions and natural and man-made disasters, including pandemics, wars and supply chain disruptions, globally and in the jurisdictions and sectors in which the Fund invests;
- Non-U.S. securities may be traded in undeveloped, inefficient and less liquid markets and may experience greater price volatility and changes in value—changes in foreign currency exchange rates may adversely affect the U.S. dollar value of and returns on foreign denominated investments.
- The Fund may borrow money, which magnifies the potential for gain or loss on amounts invested, subjects the Fund to certain covenants with which it must comply and may increase the risk of investing with the Fund.
- To qualify and remain eligible for the special tax treatment accorded to RICs and their shareholders under the Code, the Fund must meet certain source-of-income, asset diversification and annual distribution requirements, and failure to do so could result in the loss of RIC status and being taxed as an ordinary corporation for U.S. federal income tax purposes.

Accordingly, an investment in the Fund should be considered a speculative investment that entails substantial risks, and a prospective investor should invest in the Fund only if they can sustain a complete loss of their investment.

SUMMARY OF FUND EXPENSES

These tables are intended to assist investors in understanding the various costs and expenses directly or indirectly associated with investing in the Fund. The expenses in the table are based on estimated amounts for the current fiscal year assuming the Fund raises \$300 million in proceeds in the first 12 months resulting in estimated average monthly net assets of \$250 million.

As of the date of this Prospectus, only Class I Common Shares are being offered to the public. The Fund intends to offer Class A and Class L Common Shares in the future.

Shareholder Transaction Fees:

	Class A	Class I	Class L
Maximum Sales Charge (Load) (as a percentage of subscription amount) ⁽¹⁾	3.00%	None	None

Annual Fund Operating Expenses (as a percentage of Net Assets Attributable to Common Shares):

	Class A	Class I	Class L
Management Fees ⁽²⁾	1.76%	1.76%	1.76%
Distribution and Shareholder Servicing Fee	0.75%	None	0.25%
Borrowing Expense ⁽³⁾	0.88%	0.88%	0.88%
Other Expenses ⁽⁴⁾	0.46%	0.46%	0.46%
Total Annual Fund Operating Expenses	3.85%	3.10%	3.35%
Fee Waiver/Expense Reimbursement ⁽⁵⁾	-0.22%	-0.22%	-0.22%
Total Annual Fund Operating Expenses After Fee Waiver/ Expense Reimbursement	3.63%	2.88%	3.13%

- (1) Class A Common Shares are subject to a front-end sales charge. The table assumes a maximum front-end sales charge of 3.00%. While neither the Fund nor the Distributor imposes an initial sales charge on Class I Common Shares, if you buy Class I Common Shares through certain financial intermediaries, they may directly charge you transaction or other fees in such amounts as they may determine. Please consult your financial intermediary for additional information.
- (2) The Management Fee percentage calculation assumes the use of leverage by the Fund based on the assumptions set forth in Footnote 3.
- (3) Borrowing expense assumes leverage at a level of 18% of total assets. Interest expense is assumed at a rate of 5%.
- (4) "Other Expenses" are based on estimated amounts during the first 12 months of operations, assuming the Fund raises \$300 million of average net assets during that time. "Other Expenses" includes 0.05% in capitalized expenditures related to organizational and offering costs, which are not expected to be recurring expenses of the Fund.
- (5) The Investment Manager has contractually agreed, through January 31, 2028, to waive its management fee or reimburse Fund expenses to the extent that the Fund's total annual operating expenses (excluding any (i) taxes; (ii) brokerage commissions and expenses; (iii) acquired fund fees and expenses (as determined in accordance with SEC Form N-2); (iv) dividend expenses on short sales; (v) transactional costs, including legal costs, accounting costs and broker-dealer expenses, associated with the acquisition, monitoring and disposition of investments (including broken-deal expenses); (vi) loan servicing fees; (vii) fees and expenses in connection with establishing and maintaining leverage including a line of credit, other borrowings or the issuance of preferred shares; (viii) dividend and interest expenses with respect to preferred shares and borrowings; (ix) distribution and shareholder service fees; (x) expenditures which are capitalized in accordance with generally accepted accounting principles ("GAAP") and (xi) extraordinary or non-routine expenses (such as expenses incurred in connection with any merger or reorganization, litigation expenses)) exceed 2.50% of the Fund's average daily net assets (the "Expense Limitation Agreement"). In addition, the Investment Manager has contractually agreed to further waive its management fee or reimburse Fund expenses (subject to the exclusions detailed above) to the extent that the Fund's total annual operating expenses: (i) exceed 2.00% of the Fund's average daily net assets for the one-year period ending on the first anniversary of the effective date of the Expense Limitation Agreement; and (ii) exceed 2.25% of the Fund's average daily net assets for the one-year period ending on the second anniversary of the effective date of the Expense Limitation Agreement. The Investment Manager may not terminate the Expense Limitation Agreement prior to its initial term without the approval of the Board of Trustees. After its initial term, the Expense Limitation Agreement will automatically renew for consecutive one-year terms unless terminated by the Investment Manager or the Fund upon 30 days written notice to other party prior to the end of the then current term. Under the Expense Limitation Agreement, the Investment Manager may recoup from the Fund amounts previously waived or reimbursed during the previous three years from the date of the waiver or reimbursement, provided that such amount paid to the Investment Manager will not cause the Fund's total annual operating expenses to exceed (i) the expense limit in effect at the time of waiver or reimbursement or (ii) the expense limit in effect at the time of recoupment.

Example

The following example illustrates the expenses (including any applicable sales charge) that you would pay on a \$1,000 investment in the Common Shares, assuming a 5% annual return, assuming you hold your shares and assuming your shares are repurchased in full. The example below should not be considered a representation of future expenses. Actual expenses may be greater or less than those shown. The example assumes the estimated "Other Expenses" set forth in the Annual Fund Operating Expenses table are accurate, that the Total Annual Fund Operating Expenses (as described above) remain the same for all periods shown, and that all dividends and

distributions are reinvested at net asset value. Actual expenses may be greater or less than those assumed. Moreover, the Fund's actual rate or return may be greater or less than the hypothetical 5% annual return shown in the example.

An investor would pay the following expenses on a \$1,000 investment assuming a 5% return:

	1 Year	3 Years	5 Years	10 Years
Class A	\$65	\$142	\$220	\$424
Class I	\$29	\$94	\$161	\$339
Class L	\$32	\$101	\$173	\$362

An investor would pay the following expenses, assuming your shares are repurchased at the end of each period:

	1 Year	3 Years	5 Years	10 Years
Class A	\$65	\$142	\$220	\$424
Class I	\$29	\$94	\$161	\$339
Class L	\$32	\$101	\$173	\$362

THE FUND

The Fund is a non-diversified, closed-end management investment company registered under the 1940 Act. A non-diversified fund may invest a greater proportion of its assets in a small number of issuers, and may be subject to greater risk and substantial losses as a result of changes in the financial condition or the market's assessment of the issuers. The Fund will continuously offer its Common Shares and will operate as an "interval fund." The Fund is currently offering Class I Shares and intends to offer Class A and Class L Shares in the future.

Before the Fund commenced its public offering of shares, LibreMax Structured Opportunities Master Fund I, LP and LibreMax Structured Opportunities (ECI) Master Fund I, LP (collectively, "Structured Opportunities Fund I"), and LibreMax Structured Opportunities Master Fund II, LP and LibreMax Structured Opportunities Fund (ECI) Master Fund II, LP (collectively, "Structured Opportunities Fund II"), each a private fund relying on an exemption from registration under Section 3(c)(7) of the 1940 Act (collectively, the "Private Funds"), will transfer all of their portfolio assets to the Fund in exchange for Class I Shares of the Fund and the Private Funds will cease operations. Shares of the Fund will be distributed to the Private Funds, each of which will in turn distribute shares of the Fund to its holders of interest, including a Private Fund's general partner, on a private placement basis subject to customary restrictions on transfer. The Private Funds maintained an investment objective, strategies and investment policies, and guidelines that were, in all material respects, substantially similar to those of the Fund. The Fund has the same investment manager and portfolio manager as the Private Funds.

USE OF PROCEEDS

The Fund will invest the proceeds of the continuous offering of Common Shares on an ongoing basis in accordance with its investment objective and policies as stated below. It is currently anticipated that the Fund will be able to invest all or substantially all of the net proceeds according to its investment objective and policies within approximately three months after receipt of the proceeds, depending on the amount and timing of proceeds available to the Fund as well as the availability of investments consistent with the Fund's investment objective and policies, and except to the extent proceeds are held in cash to pay dividends or expenses, satisfy repurchase offers or for temporary defensive purposes. Pending such investment, it is anticipated that the proceeds of an offering will be invested in short-term liquid fixed income instruments. Pending investment in Private ABF Investments, the Fund may have a greater allocation to Traded Securitizations.

THE FUND'S INVESTMENT OBJECTIVE AND STRATEGIES

Investment Objective

The Fund seeks to provide attractive risk-adjusted returns and generate current income. The Fund seeks to achieve its investment objective by allocating primarily to a wide array of private asset-backed credit and securitized debt investments. There can be no assurance that the Fund will achieve its investment objective.

Principal Investment Strategies

To pursue its investment objective, the Fund will invest in private asset-backed finance products (“Private ABF Investments”) and traded structured credit products (“Traded Securitizations”) and other credit related investments (collectively, with Private ABF Investments and Traded Securitizations, “ABF Investments”). Under normal circumstances, the Fund will invest at least 80% of its net assets, plus the amount of any borrowing for investment purposes, in securities and other investments that the Investment Manager believes are, at the time of investment, considered to be ABF Investments (the “80% Policy”). The Fund will seek to achieve its investment objective by investing in a wide array of ABF Investments such as loans, leases, mortgages and other receivables across a broad range of asset classes. ABF Investments may provide direct or indirect exposure to asset-backed finance investments. The asset classes may include, but are not limited to, residential and consumer loans, small business loans, trade receivables, financial assets, royalties, physical assets such as equipment or other types of secured credit backed by physical assets. For purposes of the 80% Policy, the Fund may, among other things, (i) buy or commit to ABF Investments including “first loss” tranche investments that provide exposure to ABF Investments, (ii) originate loans secured by ABF Investments including senior and mezzanine loans, (iii) insure or provide capital relief against ABF Investments, (iv) provide capital to enterprises whose primary business is organization/management of ABF Investments and (v) invest in securitizations and/or derivative investments that provide exposure to ABF Investments. In addition, the Fund may also invest a portion of its assets in notes, bills, debentures, bank loans, convertible and preferred securities and government and municipal obligations. The Fund is permitted to change its 80% Policy without a shareholder vote, provided the Fund conducts a repurchase offer prior to the change, the Fund provides at least 60 days’ prior notice of any change in the policy in advance of the offer, the offer is not oversubscribed, and the Fund purchases shares at their net asset value.

In addition, the Fund may invest up to 20% of its net assets (plus the amount of any borrowings for investment purposes) in investments other than ABF Investments as described in this Prospectus (together with the ABF Investments, the “Investments,” and each, an “Investment”), including cash or cash equivalents, and liquid fixed-income securities. For temporary defensive purposes, liquidity management or in connection with implementing changes in its asset allocation, the Fund may hold a substantially higher amount of liquid investments, including cash and cash equivalents.

There is no limit on the duration and maturity of any security. The longer a security’s duration, the more sensitive it will be to changes in interest rates. The Fund may invest without limit in fixed-income products that are rated below investment grade (i.e., “high yield” or “junk” ratings), or that are unrated but determined to be of equivalent quality by the Investment Manager, at the time of purchase. Because the Fund may invest in below investment grade securities without limit, the Fund’s investments should be considered speculative. The Fund may also invest in other fixed income, credit-related securities and instruments.

The Fund may invest up to 25% of its net assets in securities denominated in currencies other than the U.S. dollar.

The Fund intends to invest in derivative investments including futures and options on treasuries and swaps.

To the extent consistent with the liquidity requirements applicable to interval funds under Rule 23c-3 under the 1940 Act, the Fund may invest without limit in illiquid securities.

Private ABF Investments and Traded Securitizations

The Fund will generally invest its ABF Investments across two main strategies: investments in Private ABF Investments and in Traded Securitizations. Traded Securitizations generally are traded securitized and structured fixed income products that generally trade in the over-the-counter markets. While the Fund expects the allocation to Private ABF Investments will be larger than the allocation to Traded Securitizations, the allocation between these two strategies may fluctuate significantly depending upon various factors, including market and economic conditions, availability of investment opportunities across the strategies and fund subscription and repurchase activity.

Within the Private ABF Investments strategy, the Fund will invest in private asset-backed financed securities and loans, including residential and consumer loans (and participations thereon), including, but not limited to, consumer unsecured personal loans, business loans, commercial real estate mezzanine loans, participations and

notes backed by residential, multi-family, hotel, office and construction projects, commercial warehouse financings backed by cashflows and/or other commercial assets of various borrowers or pools of collateral, including, but not limited to, aviation, marine, railcar, automobiles, leases, solar, equipment, datacenters and digital infrastructure and other assets, and other structured finance products and specialty finance loans, notes and participations. In addition, Private ABF Investments may include equity like investments in asset-backed financed securities like home equity investments (“HEIs”). The Fund may invest in whole loans directly or indirectly, including through one or more wholly-owned subsidiaries or trust structures. Such loans may be originated by the Fund or purchased through arrangements with one or more originators or other counterparties. The Fund may purchase such assets on a leveraged basis through the use of reverse repurchase agreements or other financings.

Within the Traded Securitization strategy, the Fund will invest in residential mortgage backed securities, including, but not limited to, securitizations backed by residential home loans, commercial mortgage-backed securities (“CMBS”), consumer and commercial asset-backed securities, which included securitizations backed by commercial assets of various borrowers or pools of collateral, including, but not limited to, credit cards, aviation, automobile loans and leases, solar, and other receivables and asset classes, collateralized loan obligations and collateralized debt obligations. The Fund may invest in any level of the capital structure of an issuer, including the equity or “first loss” tranche. The Fund may invest in, or obtain exposure to, loans that may be “covenant lite.” The Fund uses the term “covenant-lite” to refer generally to loans that do not have financial maintenance covenants. The Fund may invest in sub-prime loans, which are loans offered to buyers who do not meet the criteria for prime loans typically due to poor credit history, low income or insufficient credit history.

The Fund may invest in every level of capital structure, including owning partial or whole loans or residual equity positions. The Fund may invest in securitization risk retention tranches in the capacity of a third-party purchaser with respect to securitizations sponsored by others.

There are no limits on investments in permitted investment types, except as set forth in the Fund’s fundamental and non-fundamental investment policies.

Hedging Strategy

To maximize its defensiveness and flexibility, the Fund may also engage in hedging techniques to manage the level of credit, interest rate, foreign exchange or other risks of the Fund’s portfolio. This hedging can be used through a variety of products, including treasuries, futures and options on treasuries, and swaps. The Fund may also enter into currency transactions to provide for the purchase or sale of a currency needed to purchase a security denominated in such currency. In addition, the Fund may enter into forward currency contracts to protect against changes in currency exchange rates, to increase exposure to a particular foreign currency, to shift exposure to currency fluctuations from one currency to another or to seek to increase returns. A forward currency contract is an agreement to purchase or sell a specific currency at a future date at a fixed price.

Investment Process

In selecting investments, LibreMax Capital, LLC (“LibreMax” or the “Investment Manager”) conducts a comprehensive analysis of three key factors as part of its investment process. First, the Investment Manager utilizes a macro-economic approach, which encompasses an analysis of credit risk and increased or shortened duration. The Investment Manager seeks to use market information to carefully establish likely impacts of anticipated changes in the macro-economy, regulatory and legal environment on the Fund’s holdings and adjust those positions accordingly.

Second, the Investment Manager analyzes relative value to determine the best sector allocations. As part of this process, the Investment Manager seeks to uncover potential discrepancies between market prices and the Investment Manager’s perceived intrinsic value of securities and other investment instruments while weighing and considering applicable risks to form a trading strategy.

Finally, the Investment Manager may use proprietary credit model analytics as a micro-economic analysis. The Investment Manager’s micro analysis uses collateral level information in conjunction with cash flow projections of securities to analyze potential upside and risks of each position held and traded within the Fund’s portfolios or being considered for purchase. Such analysis generates expected average life, duration and yield projections. The

portfolio management team utilizes the data generated from these models to analyze market data and form views on individual investments.

The Investment Manager will utilize the data generated from these approaches to scrutinize market data and form views on investment themes, individual securities, and hedges. An investment theme is an economic, social, demographic, or other long-term trend that is expected to benefit certain asset classes or companies. Quantitative modelling is used to filter available opportunities within a given strategy, and is important as an analytical tool, although it is not specifically used for identifying investments. For example, the Investment Manager may formulate an investment theme based on an array of sectoral views such as consumer risk or structural implications of a change in macro-economic analysis or political policy factors. For example, the lock-in effect of higher mortgage rates and news cycles around home affordability challenges could lead to further data research on the credit quality, scalability and structural considerations of various residential second liens investment options. In another example, while not currently an active area of interest, views on potential adverse student loan borrower behavior after shifts in policy views on forbearance, forgiveness, and extended on-ramps for credit reporting could lead to more data analysis on potential effects within ABS backed by private student loans.

With respect to loan originations, the Fund will benefit from the Investment Manager's experience in structured products across a wide array of asset classes. The Fund will leverage the Investment Manager's and its affiliates' existing relationships with various issuers. The Fund will seek to provide flexible financing solutions across the capital structure from senior asset-backed lending to whole loan origination. Borrowers may be well established financial platforms or early stage where the Fund will seek to grow with the borrowers.

Leverage

The Fund intends to use leverage as and to the extent permitted by the 1940 Act. The Fund is permitted to obtain leverage using any form of financial leverage instruments, including funds borrowed from banks or other financial institutions, credit facilities, margin facilities, notes or preferred stock and leverage attributable to reverse repurchase agreements or similar transactions. The Fund is authorized to borrow money in connection with its investment activities, to satisfy repurchase requests from Fund shareholders, and to otherwise provide the Fund with temporary liquidity. The Fund intends to enter into a revolving credit facility ("Credit Facility") for the purpose of investment purchases and other liquidity measures, subject to the limitations of the 1940 Act for borrowings. The Credit Facility is expected to be secured by all of the assets held by the Fund. The Fund may choose to increase or decrease, or eliminate entirely, its use of leverage over time and from time to time based on the Investment Manager's assessment of the yield curve environment, interest rate trends, market conditions and other factors. By using leverage, the Fund seeks to obtain a higher return for its shareholders than if the Fund did not use leverage. Leveraging is a speculative technique and there are special risks and costs involved. There can be no assurance that a leveraging strategy will be used or that it will be successful during any period in which it is employed.

The Fund's investments in the types of securities and other investments described in this Prospectus vary from time to time, and, at any time, the Fund may not be invested in all of the types of securities and other investments described in this Prospectus. The Fund may also invest in securities and other investments not described in this Prospectus.

The Fund may invest directly or through one or more subsidiaries (the "Subsidiaries").

1 PRINCIPAL RISKS OF THE FUND

The Fund is a newly organized, non-diversified, closed-end management investment company that continuously offers its shares and is operated as an interval fund. Losing all or a portion of your investment is a risk of investing in the Fund. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Investors should carefully consider the Fund's risks and investment objective, as an investment in the Fund may not be appropriate for all investors and is not designed to be a complete investment program. Investment should be avoided where an investor has a short-term investing horizon and/or cannot bear the loss of some or all of their investment. It is possible that investing in the Fund may result in a loss of some or all of the amount invested. Each risk discussed below is considered a principal risk of investing in the Fund, regardless of the order in which it appears and could affect the value of your investment.

Debt Securities Risk

The Fund may invest directly or indirectly in debt securities (including loans), including debt securities issued by alternative lending platforms or companies that own or operate alternative lending platforms. The Fund may have exposure to the debt securities of U.S. or foreign issuers. These debt securities may have fixed or floating interest rates; may or may not be collateralized; and may be below investment grade or unrated but judged by the Investment Manager to be of comparable quality (debt securities that are below investment grade are commonly called “junk bonds”). Debt securities are fixed or variable/floating-rate debt obligations, including bills, notes, debentures, money market instruments and similar instruments and securities. Debt is generally used by corporations, individuals, governments and other issuers to borrow money from investors. The issuer pays the investor a fixed or variable rate of interest and normally must repay the amount borrowed on or before maturity. Some debt securities are “perpetual” in that they have no maturity date. The Fund has no limits as to the maturity of debt securities in which it invests directly or indirectly. Such investments may be within any maturity range (short, medium or long) depending on the Investment Manager’s evaluation of investment opportunities available within the debt securities market. Similarly, the Fund has no limits as to the market capitalization range of the issuers. A debt investment made by the Fund could take the many forms, including a loan, convertible note, credit line or other extension of credit made by the Fund.

Asset-Backed Securities Risk

The Fund expects to invest in asset-backed securities (“ABS”), which are securities backed by assets such as mortgages (including residential or commercial mortgages), trade claims, equipment leases, auto loans, installment sale contracts, credit card and/or other receivables, collateralized debt obligations or other assets. ABS are “pass-through” securities, meaning that principal and interest payments, net of expenses, made by the borrower on the underlying assets are passed through to the Fund.

The investment characteristics of ABS differ from traditional debt securities in several ways. Among the major differences are that interest and principal payments are made more frequently, usually monthly, and that the principal can generally be prepaid at any time because the underlying loans or other assets generally can be prepaid at any time. That being said, the collateral supporting ABS is generally of shorter maturity than certain other types of loans and is less likely to experience substantial prepayments. ABS are often backed by pools of any variety of assets, including, for example, leases, mobile home loans and aircraft leases, which represent the obligations of a number of different parties and use credit enhancement techniques such as letters of credit, guarantees or preference rights. The market value of an ABS can be affected by changes in the market’s perception of the asset backing the ABS and the creditworthiness of the servicer for the loan pool, the originator of the loans or the financial institution providing any credit enhancement, as well as by the expiration or removal of any credit enhancement.

Holders of ABS bear various other risks, including credit risk, liquidity risk, interest rate risk, market risk, operations risk, structural risk and legal risk, as further described below. In addition, ABS are subject to the general risks associated with investing in physical assets such as real estate; that is, they could lose value if the value of the underlying asset declines.

Credit risk arises from (i) losses due to defaults by obligors under the underlying collateral and (ii) the issuing vehicle’s or servicer’s failure to perform their respective obligations under the transaction documents governing the ABS. These two risks can be related, as, for example, in the case of a servicer that does not provide adequate credit-review scrutiny to the underlying collateral, leading to a higher incidence of defaults.

Market risk arises from the cash flow characteristics of the ABS, which for most ABS tend to be predictable. The greatest variability in cash flows comes from credit performance, including the presence of wind-down or acceleration features designed to protect the investor in the event that credit losses in the portfolio rise well above expected levels.

Interest rate risk arises for the issuer from (x) the pricing terms on the underlying collateral, (y) the terms of the interest rate paid to holders of the ABS and (z) the need to mark to market the excess servicing or spread account proceeds carried on the issuing vehicle’s balance sheet. For the holder of the security, interest rate risk depends on the expected life of the ABS, which can depend on prepayments on the underlying assets or the occurrence of wind-down or termination events. If the servicer becomes subject to financial difficulty or otherwise ceases to be able to carry out its functions, it could be difficult to find other acceptable substitute servicers and cash flow disruptions or

losses can occur, particularly with underlying collateral comprised of non-standard receivables or receivables originated by private retailers who collect many of the payments at their stores.

Structural and legal risks include the possibility that, in a bankruptcy or similar proceeding involving the originator or the servicer (often the same entity or affiliates), a court having jurisdiction over the proceeding could determine that, because of the degree to which cash flows on the assets of the issuing vehicle potentially have been commingled with cash flows on the originator's other assets (or similar reasons), (a) the assets of the issuing vehicle could be treated as never having been truly sold by the originator to the issuing vehicle and could be substantively consolidated with those of the originator, or (b) the transfer of such assets to the issuer could be voided as a fraudulent transfer. The time and expense related to a challenge of such a determination also could result in losses and/or delayed cash flows.

In addition, investments in subordinated ABS involve greater credit risk of default than the senior classes of the issue or series. Default risks can be further pronounced in the case of ABS secured by, or evidencing an interest in, a relatively small or less diverse pool of underlying loans. Certain subordinated securities in an ABS issue generally absorb all losses from default before any other class of securities in such issue is at risk, particularly if such securities have been issued with little or no credit enhancement equity. Such securities, therefore, possess some of the attributes typically associated with equity investments.

Another risk associated with ABS is that the collateral that secures an ABS, such as credit card receivables, could be unsecured. In the case of credit card receivables, debtors are additionally entitled to the protection of a number of state and federal consumer loan laws, many of which give such debtors the right to set off certain amounts owed on the credit cards, thereby reducing the balance due. For ABS that are backed by automobile receivables, such ABS pose a risk because most issuers of such ABS permit the servicers to retain possession of the underlying obligations. Because of the large number of vehicles involved in a typical issuance and technical requirements under state laws, the trustee for the holders of the ABS potentially will not have a proper security interest in all of the obligations backing such ABS. Therefore, there is a possibility that recoveries on repossessed collateral will not, in some cases, be available to support payments on these securities. As the foregoing shows, an underlying risk of investing in ABS is the dependence on debtors to timely pay their consumer loans.

In the case of ABS structured using special purpose securitization vehicles, securitized assets are typically actively managed by an investment manager, which may be the Investment Manager or its affiliates, and as a result, such assets will be traded, subject to rating agency and other constraints, by such investment manager. The aggregate return on these equity securities will depend in part upon the ability of each such investment manager to actively manage the related portfolio of assets.

Investment in Receivables Risk

The Fund may invest in alternative lending-related securities with exposure to receivables or invoice financing, including loans or advances made to businesses, secured by invoice receivables, originated by specialty finance managers, marketplace lending platforms or other originators. The Fund will be reliant on the originator's ability to source suitable deals, detect fraud, assess the credit worthiness of both the borrower and the obligor on the invoice, manage operational and financial risk and, in the event of default, pursue and collect collateral. In the event of default, the Fund incurs the risk that it may only rank as an unsecured creditor. The obligor on the invoice may dispute any aspect of its obligation and delay, reduce or withhold payments, which may affect the value of the collateral.

In making such investments, the Fund is dependent upon the originators' ability to monitor and curtail fraud, including factoring fraud, which involves the falsification of invoice documents. False invoices can easily be created online to appear as if they have been issued by legitimate debtors or as if the invoiced amounts are higher than they actually are. Platforms that originate trade receivables financing loans to corporations usually conduct due diligence but do not always conduct on-site visits to verify that the business exists and is in good standing. For this reason, the risk of fraud may be greater with corporate trade receivables. Typically, an originator will seek to validate that the debtor has received the goods or services for which it has been invoiced and is willing to pay the creditor before making the receivables available for investment, although this may not always be the case. There can be no assurance, however, that the debtor will not subsequently dispute the quality or price of the goods or services and withhold payments. Fraud, delays or write-offs associated with such disputes could directly impact the

profitability of the Fund's investments in alternative lending-related securities with exposure to trade receivables. In the event of insolvency of any debtor owing funds on a receivable that the Fund has purchased directly or indirectly, the Fund may only rank as an unsecured creditor. In the case of receivables transferred with recourse, when a debtor defaults on its obligations to the purchaser of the receivable (such as the Fund, directly or indirectly), the seller of the receivable will become obligated to fulfill any remaining invoice amounts owed to the purchaser. In the case of receivables transferred without recourse, the Fund or other direct owner of the receivable will have no such "back-up" obligor in the event of a debtor default. In either scenario, there is a risk that the party with the payment obligation will fail to make payments timely or at all.

Such investments may include credit card receivables, which are generally unsecured and the debtors on such receivables are entitled to the protection of a number of state and federal consumer credit laws, many of which give such debtors the right to set-off certain amounts owed on the credit cards, thereby reducing the balance due.

Other Asset-Backed Securities Risk

The Fund may invest in and may sell certain of its alternative lending related investments to, securitization vehicles formed by alternative lending platforms or third parties for the purpose of acquiring alternative lending-related investments and issuing securities the payments on which are funded by payments received on such entities' underlying investments. Such ABS, including mortgage-backed securities, may be issued in different tranches of debt and residual equity interests with different rights and preferences. The Fund may hold any tranche of such ABS. The volume and frequency of the Fund's sales of pools of loans to securitization vehicles may increase as more active and reliable secondary market develops over time.

Specialty Finance Assets Risk

The Fund may invest in a wide variety of specialty finance loans, including but not limited to automobile purchases, equipment finance (including aircraft), transportation leasing or real estate financing. These investments may be structured as direct loans or as other financial instruments, including but not limited to home equity investments ("HEIs"). HEIs generally provide homeowners with cash upfront in exchange for the investor receiving a variable percentage of the future values of the residential property. HEIs are typically structured as forward purchase agreements or option purchase agreements whereby the originator, in exchange for the investment amount, acquires an option to purchase a variable percentage ownership interest in the related property, or a percentage of the increase in the value of the related property, which is realized upon the occurrence of certain enumerated realization events. An HEI typically is secured by a lien against the residential property, most commonly a second priority lien behind the primary mortgage lender. An HEI is a non-recourse obligation of the related homeowner. HEIs are generally settled in cash upon the occurrence of a realization event, such as the sale of the related property, or the refinancing of the first lien mortgage loan secured by the related property or the maturity date of the HEI (typically from 10 to 30 years), upon which date settlement is required, which could require a home sale or a refinancing. Any return on such HEIs is contingent and will be dependent on various factors, such as the timing of a realization event, as well as on the value of the related property at the time of settlement. Unlike a mortgage loan, the homeowner does not have an obligation to pay any monthly or other periodic interest or principal payments or to repay the investment amount under the HEI and the Fund would not receive any revenue (via asset appreciation) on an HEI unless a realization event occurs.

Real Estate and Mortgage-Backed Securities Risk

The Fund may invest in a variety of real estate-related investments. The value of real estate and real estate-related securities and other investments can fluctuate for various reasons. Real estate values can be seriously affected by interest rate fluctuations, bank liquidity, the availability of financing and by regulatory or governmentally imposed factors such as a zoning change, an increase in property taxes, the imposition of height or density limitations, the requirement that buildings be accessible to disabled persons, the requirement for environmental impact studies, the potential costs of remediation of environmental contamination or damage and the imposition of special fines to reduce traffic congestion or to provide for housing. Income from income-producing real estate may be adversely affected by general economic conditions, local conditions such as oversupply or reduction in demand for space in the area, competition from other available properties, and the owner provision of adequate maintenance and coverage by adequate insurance. Certain significant expenditures associated with real estate (such as mortgage payments (to the extent leveraged), real estate taxes and maintenance costs) have no relationship with, and thus do

not diminish in proportion to, a reduction in income from the property. Reductions in value or cash flow could impair the Fund's ability to make distributions to shareholders, adversely impact its investment policy and reduce overall returns on investments.

If a borrower of loan secured by real estate defaults on such loan, it is possible that the Investment Manager may find it necessary or desirable to foreclose on collateral securing such loan. The foreclosure process varies jurisdiction by jurisdiction and can be lengthy and expensive. Borrowers often resist foreclosure actions, which often prolongs and complicates an already difficult and time-consuming process. In some states or other jurisdictions, foreclosure actions can take up to several years or more to conclude. During the foreclosure proceedings, a borrower may have the ability to file for bankruptcy, potentially staying the foreclosure action and further delaying the foreclosure process. Foreclosure litigation tends to create a negative public image of the collateral property and may result in disrupting ongoing leasing and management of the property.

Commercial Mortgage-Backed Securities Risk

The Fund may invest in pools or tranches of commercial mortgage-backed securities ("CMBS"). The collateral underlying CMBS generally consists of commercial mortgages or real property that have a multifamily or commercial use, such as retail space, office buildings, warehouse property and hotels. CMBS have been issued in a variety of issuances, with varying structures including senior and subordinated classes. The commercial mortgages underlying CMBS generally have shorter maturities than residential mortgages, allow a substantial portion of the loan balance to be paid at maturity, commonly known as a "balloon payment," and are usually non-recourse against the commercial borrower.

The prospect of full repayment of the commercial mortgage loans underlying CMBS depends on the ability of the commercial borrower to generate current income from its commercial property. The ability to generate current income from a commercial property is affected by a variety of factors. Such factors include differences in the management ability and track record of the commercial borrower, and geographic and/or industry concentration. Commercial borrowers may also lack the incentive to invest the funds necessary to maintain and attract tenants in the properties underlying the commercial mortgage loans to the extent the value of the mortgage exceeds the property value. Also, the likelihood of the commercial borrower repaying the commercial mortgage loan at maturity is heavily influenced by the commercial borrower's ability to secure subsequent financing, which can be negatively impacted by a difficult credit environment.

Investments in CMBS are also subject to various risks and uncertainties, including credit, market, interest rate, structural and legal risks. These risks may be magnified by the continued volatility in the credit and commercial real estate markets. The investment characteristics of CMBS differ from traditional debt securities in a number of respects and are similar to the characteristics of structured credit products in which investors participate through a trust or other similar conduit arrangement. As noted above, commercial mortgage loans are obligations of the borrowers thereunder and are not typically insured or guaranteed by any other person or entity. While the Fund intends to vigorously analyze and underwrite its CMBS investments from a fundamental real estate perspective, defaults by the underlying borrowers may require a substantial amount of workout negotiations and/or restructurings and may trigger foreclosure actions, which can be lengthy and time-consuming process. There can be no assurance that underwriting practices will yield their desired results, and there can be no assurance that the Fund will be able to effectively achieve its investment objective or that projected returns will be achieved. Furthermore, each investor should be prepared to bear the economic risk of the investment for an indefinite period.

Residential Mortgage-Backed Securities Risk

The Fund may invest in residential mortgage-backed securities ("RMBS"). Holders of RMBS bear various risks, including credit, market, interest rate, structural and legal risks. RMBS represent interests in pools of residential mortgage loans secured by residential mortgage loans. Such loans may be prepaid at any time. Residential mortgage loans are obligations of the borrowers thereunder only and are not typically insured or guaranteed by any other person or entity, although such loans can be securitized and the securities issued in such securitization could be guaranteed or credit enhanced. The rate of defaults and losses on residential mortgage loans will be affected by a number of factors, including general economic conditions and those in the area where the related mortgaged property is located, the borrower's equity in the mortgaged property and the financial circumstances of the borrower. If a residential mortgage loan is in default, foreclosure of such residential mortgage

loan can be a lengthy and difficult process, and often involves significant expenses. Furthermore, the market for defaulted residential mortgage loans or foreclosed properties could be very limited.

At any one time, a portfolio of RMBS could be backed by residential mortgage loans with disproportionately large aggregate principal amounts secured by properties in only a few states or regions. As a result, the residential mortgage loans tend to be more susceptible to geographic risks relating to such areas, such as adverse economic conditions, adverse events affecting industries located in such areas and natural hazards affecting such areas, than would be the case for a pool of mortgage loans having more diverse property locations. In addition, the residential mortgage loans could include so-called “Jumbo” mortgage loans, having original principal balances that are higher than is generally the case for residential mortgage loans. As a result, such portfolio of RMBS could experience increased losses.

Certain mortgage loans may be of subprime credit quality (i.e., do not meet the customary credit standards of Fannie Mae and Freddie Mac). Originators of loans make subprime mortgage loans to borrowers that typically have limited access to traditional mortgage financing for a variety of reasons, including impaired or limited past credit history, lower credit scores, high loan-to-value ratios or high debt-to-income ratios. As a result of these factors, delinquencies and liquidation proceedings are more likely with subprime mortgage loans than with mortgage loans that satisfy customary credit standards. In the event mortgage loans in a mortgage pool related to a residential security become delinquent or subject to liquidation, the related CDO may experience delays in receiving payment on such RMBS and may suffer losses if the related credit enhancements, if any, are insufficient to cover the delays and losses associated with such RMBS. The RMBS also may be backed by non-conforming mortgage loans that do not qualify for purchase by government-sponsored agencies, such as Fannie Mae and Freddie Mac, because of characteristics and size that do not satisfy Fannie Mae and Freddie Mac guidelines. Non-conforming mortgage loans are likely to experience rates of delinquency, foreclosure and loss that are higher, and that may be substantially higher, than mortgage loans originated in accordance with Fannie Mae or Freddie Mac underwriting guidelines. The principal differences between conforming mortgage loans and non-conforming mortgage loans include the applicable loan-to-value ratios, the credit and income histories of the related mortgagors, the documentation required for approval of the related mortgage loans, the types of properties securing the mortgage loans, the loan sizes and the mortgagors’ occupancy status with respect to the mortgaged properties. As a result of these and other factors, the interest rates charged on non-conforming mortgage loans are often higher than those charged for conforming mortgage loans. The combination of different underwriting criteria and higher rates of interest may also lead to higher delinquency, foreclosure and losses on non-conforming mortgage loans as compared to conforming mortgage loans.

RMBS may contain certain credit enhancement features intended to enhance the likelihood that holders of such securities will receive regular payments of interest and principal. If delinquencies or defaults occur on the mortgage loans underlying such RMBS, neither the related servicers nor any other entities will advance scheduled monthly payments of interest and principal on delinquent or defaulted mortgage loans if such advances are not likely to be recovered within those transactions. There can be no assurance that the credit enhancement, if any, applicable to RMBS owned by a CDO will adequately cover any shortfalls in cash available to make payments on such RMBS as a result of such delinquencies or defaults. If substantial losses occur as a result of defaults and delinquent payments on the mortgage loans, the Fund may suffer losses with respect to its ownership of such RMBS (or CDOs which own RMBS).

Recently, the residential mortgage market in the United States has experienced a variety of difficulties and changed economic conditions that may adversely affect the performance and market value of RMBS and CDOs backed by RMBS. Delinquencies and losses with respect to residential mortgage loans generally have increased in recent months, and may continue to increase, particularly in the subprime sector. In addition, in recent months housing prices and appraisal values in many states have declined or stopped appreciating. A continued decline or an extended flattening of those values may result in additional increases in delinquencies and losses on RMBS generally.

Another factor that may result in higher delinquency rates is the increase in monthly payments on adjustable rate mortgage loans. Borrowers with adjustable rate mortgage loans are being exposed to increased monthly payments when the related mortgage interest rate adjusts upward from the initial fixed rate or a low introductory rate. Borrowers seeking to avoid these increased monthly payments by refinancing their mortgage loans

may no longer be able to find available replacement loans at comparably low interest rates. A decline in housing prices may also leave borrowers with insufficient equity in their homes to permit them to refinance. Furthermore, borrowers who intend to sell their homes on or before the expiration of the fixed rate periods on their mortgage loans may find that they cannot sell their properties for an amount equal to or greater than the unpaid principal balance of their loans. These events, alone or in combination, may contribute to higher delinquency rates and, as a result, adversely affect the performance and market value of RMBS and CDOs backed by RMBS.

In addition, numerous residential mortgage loan originators that originate subprime mortgage loans have recently experienced serious financial difficulties and, in some cases, bankruptcy. Those difficulties have resulted in part from declining markets for mortgage loans as well as from claims for repurchases of mortgage loans previously sold under provisions that require repurchase in the event of early payment defaults, or for material breaches of representations and warranties made on the mortgage loans, such as fraud claims. These difficulties may adversely affect the performance and market value of RMBS originated, serviced or subserviced by these companies. As a result, the performance and market value of CDOs backed by RMBS also may be adversely affected.

The mortgage loans underlying certain of the RMBS may be structured with negative amortization features. Negative amortization arises when the mortgage payment in respect of a loan is smaller than the interest due on such loan. On any such mortgage loans, if the monthly payments are not enough to cover both the interest and principal payments on the loan, the shortfall is added to the principal balance, causing the loan balance to increase rather than decrease over time. During periods in which the outstanding principal balance of any such mortgage loan is increasing due to the addition of deferred interest, the increasing principal balance of such mortgage loan may approach or exceed the value of the related mortgage property, thus increasing the likelihood of defaults as well as the amount of any loss experienced with respect to any such mortgage loan that is required to be liquidated. Furthermore, each such mortgage loan generally provides for the payment of any remaining unamortized principal balance (due to the addition of deferred interest, if any, to the principal balance of such mortgage loan) in a single payment at the maturity of the loan. Because the related mortgagors may be required to make a larger single payment upon maturity, it is possible that the default risk associated with such mortgage loans is greater than that associated with fully amortizing mortgage loans. If the pool of mortgage loans underlying any RMBS owned by the Fund (or a CDO backed by RMBS) were to contain loans with negative amortization features, the yield on such RMBS could be adversely affected.

RMBS have structural characteristics that distinguish them from other asset-backed securities. The rate of interest payable on RMBS is often set or effectively capped at the weighted average net coupon of the underlying mortgage loans themselves, often referred to as an “available funds cap”. Other factors, such as the use of interest rate derivatives, may also affect the returns on RMBS. The U.S. Servicemembers’ Civil Relief Act of 2003, as amended (the “Relief Act”), provides relief to mortgagors who enter into active military service or who were on reserve status but are called to active duty after the origination of their mortgage loans. Under the Relief Act, during the period of a mortgagor’s active duty, the rate of interest that may be charged on such mortgagor’s loan will be capped at a rate of 6% per annum, which may be below the interest rate that would otherwise have been applicable to such mortgage loan. In light of current United States involvement in Iraq and Afghanistan, a number of mortgage loans in the mortgage pools underlying RMBS are or may become subject to the Relief Act. As a result, the weighted average interest rate on RMBS may be reduced. If such RMBS are subject to weighted average net coupon caps, investors’ return on their investment in such RMBS will be similarly affected.

Violations of consumer protection laws may result in losses on RMBS. Applicable state laws generally regulate interest rates and other charges, require licensing of originators and require specific disclosures. In addition, other state laws, public policy and general principles of equity relating to the protection of consumers, unfair and deceptive practices and debt collection practices may apply to the origination, servicing and collection of the loans backing RMBS. Depending on the provisions of the applicable law and the specific facts and circumstances involved, violations of these laws, policies and principles may limit the ability of the issuer of a RMBS to collect all or part of the principal of or interest on the underlying loans, may entitle a borrower to a refund of amounts previously paid and, in addition, could subject the owner of a mortgage loan to damages and administrative enforcement.

The mortgage loans backing a RMBS also are subject to U.S. federal laws, including:

- the U.S. Truth in Lending Act and Regulation Z promulgated under the Truth in Lending Act, which require particular disclosures to the borrowers regarding the terms of the loans;
- the Equal Credit Opportunity Act and Regulation B promulgated under the Equal Credit Opportunity Act, which prohibit discrimination on the basis of age, race, color, sex, religion, marital status, national origin, receipt of public assistance or the exercise of any right under the Consumer Credit Protection Act, in the extension of credit;
- the Americans with Disabilities Act, which, among other things, prohibits discrimination on the basis of disability in the full and equal enjoyment of the goods, services, facilities, privileges, advantages or accommodations of any place of public accommodation;
- the Fair Credit Reporting Act, which regulates the use and reporting of information related to the borrower's credit experience;
- the Home Ownership and Equity Protection Act of 1994, which regulates the origination of high cost loans;
- the Depository Institutions Deregulation and Monetary Control Act of 1980, which preempts certain state usury laws; and
- the Alternative Mortgage Transaction Parity Act of 1982, which preempts certain state lending laws which regulate alternative mortgage transactions.

Violations of particular provisions of these U.S. federal laws may limit the ability of the issuer of RMBS to collect all or part of the principal of or interest on the related underlying loans and in addition could subject such issuer to damages and administrative enforcement. In this event, the issuer, as a holder of such RMBS may suffer a loss.

Some of the mortgage loans backing a RMBS may have been underwritten with, and finance the cost of, credit insurance. From time to time, originators of mortgage loans that finance the cost of credit insurance have been named in legal actions brought by U.S. federal and state regulatory authorities alleging that certain practices employed relating to the sale of credit insurance constitute violations of law. If such an action were brought against such issuer with respect to mortgage loans backing such RMBS and were successful, it is possible that the borrower could be entitled to refunds of amounts previously paid or that such issuer could be subject to damages and administrative enforcement.

In addition, numerous U.S. federal and state statutory provisions, including the U.S. federal bankruptcy laws, the Relief Act and state debtor relief laws, also may adversely affect the ability of an issuer of a RMBS to collect the principal of or interest on the loans, and holders of the affected RMBS may suffer a loss if the applicable laws result in these loans becoming uncollectible.

In addition to the U.S. federal laws described above, however, a number of legislative proposals have been introduced at the U.S. federal, state and municipal levels that are designed to discourage predatory lending practices. Some states have enacted, or may enact, laws or regulations that prohibit inclusion of some provisions in mortgage loans that have mortgage rates or origination costs in excess of prescribed levels, and require that borrowers be given certain disclosures prior to the consummation of such mortgage loans. In some cases, state law may impose requirements and restrictions greater than those in the Homeownership Act. An originator's failure to comply with these laws could subject the issuer of a RMBS to monetary penalties and could result in the borrowers rescinding the loans underlying such RMBS. Lawsuits have been brought in various states making claims against assignees of high cost loans for violations of state law. Named defendants in these cases include numerous participants within the secondary mortgage market, including some securitization trusts.

Structured Products Risk

The Fund may invest in structured products, including pools of mortgages, loans and other real estate-related interests. These investments may include debt securities issued by a private investment fund that invests, on a leveraged basis, in bank loans, high-yield debt or other asset groups, as well as certificates issued by a structured

investment vehicle that holds pools of commercial mortgage loans, as well as synthetic mortgage-backed securities (“MBS”) in the form of credit default swaps (e.g., CMBX). MBS may include swaps for which the reference obligation is an MBS or related index, such as the CMBX Index (a tradeable index referencing a basket of CMBS), the TRX Index (a tradeable index referencing total return swaps based on CMBS) or the ABX Index (a tradeable index referencing a basket of sub-prime MBS). The Fund’s investments in structured products will be subject to a number of risks, including risks related to the fact that the structured products will be leveraged. Utilization of leverage is a speculative investment technique and will generally magnify the opportunities for gain and risk of loss borne by an investor in the subordinated debt securities issued by a structured product. Many structured products contain covenants designed to protect the providers of debt financing to such structured products. A failure to satisfy those covenants could result in the untimely liquidation of the structured product and a complete loss of the Fund’s investment therein. In addition, if the structured product is invested in a security in which the Fund is also invested, this would tend to increase the Fund’s overall exposure to the credit of the issuer of such securities, at least on an absolute, if not on a relative basis.

The performance of a particular structured product will be affected by a variety of factors, including its priority in the capital structure of the issuer, the availability of any credit enhancement, the level and timing of payments and recoveries on and the characteristics of the underlying receivables, loans or other assets that are being securitized, remoteness of those assets from the originator or transferor, the adequacy of and ability to realize upon any related collateral and the capability of the servicer of the securitized assets.

The risks associated with structured products involve the risk of loss of principal due to market movement. In addition, investments in structured products can be illiquid in nature, with no readily available secondary market. Because they are linked to their underlying markets or instruments, investments in structured products generally are subject to all of the risks associated with an investment in those underlying markets or instruments and subject to greater volatility than an investment directly in the underlying market or instrument. These risks include the possibility of a default by, or bankruptcy of, the issuers of such assets or a claim that the pledging of collateral to secure any such asset constituted a fraudulent conveyance or preferential transfer that can be subordinated to the rights of other creditors of the issuer of such asset or nullified under applicable law.

Investments in Real Estate Debt; Structural Considerations

The Fund may invest in a variety of real estate-related debt investments. In addition to the risks of borrower default (including loss of principal and nonpayment of interest) and the risks associated with real property investments, the Fund will be subject to a variety of risks in connection with such debt investments, including the risks of illiquidity, lack of control, mismanagement or decline in value of collateral, contested foreclosures, bankruptcy of the debtor, claims for lender liability, violations of usury laws and the imposition of common law or statutory restrictions on the Fund’s exercise of contractual remedies for defaults of such investments.

The debt securities and instruments in which the Fund is permitted to invest include secured or unsecured debt at various levels of an issuer’s capital structure. As part of the Fund’s investment strategy, the Fund can invest in a range of mezzanine, junior tranches of debt securities in an issuer’s capital structure and pools or tranches of CMBS comprised of securities that are subordinated or otherwise junior in an issuer’s capital structure. To the extent the Fund invests in unsecured or relatively junior debt securities in an issuer’s capital structure, such investments may be subordinated to substantial amounts of senior indebtedness. Investments in subordinated debt securities involve greater credit risk of default than the more senior classes of such issuance or series. Subordinated or junior tranches in an issuer’s capital structure absorb losses from default before other more senior tranches to which such junior tranches are subordinate. As a result, to the extent the Fund invests in such debt, the Fund would potentially receive payments or interest distributions after and must bear the effects of losses or defaults on the underlying mortgage loans before, the holders of other more senior tranches of debt.

Mortgage and Mezzanine Investments Risk

The Fund may originate, participate in and/or acquire real estate loans that are non-recourse to the borrower. Mortgage investments have special inherent risks relative to collateral value. To the extent the Fund makes or acquires subordinated or “mezzanine” debt investments, the Fund does not anticipate having absolute control over the underlying collateral as the Fund will be dependent upon third-party borrowers and agents and will have rights that are subordinate to those of senior lenders. In certain circumstances, the Fund’s loans may not be

secured by a mortgage, but instead by partnership interests or other collateral that may provide weaker rights than a mortgage. In any case, in the event of default, the Fund's source of repayment will be limited to the value of the collateral and may be subordinate to other lienholders. The collateral value of the property may be less than the outstanding amount of the Fund's investment. In cases in which the Fund's collateral consists of partnership or similar interests, the Fund's rights and level of security may be less than if it held a mortgage loan. Returns on an investment of this type depend on the borrower's ability to make required payments and, in the event of default, the ability of the loan's servicer to foreclose and liquidate the mortgage loan.

Stripped Mortgage-Related Securities Risk

Stripped mortgage-related securities ("SMRS") usually are collateralized by a pool of mortgages or a pool of mortgage-backed bonds or pass-through securities. SMRS usually are structured with two classes that receive different proportions of the principal and interest payments from the underlying assets. A common type of SMRS has one class receiving some of the interest and most of the principal, while the other class receives most of the interest and some of the principal. In the most extreme case, one class of interest-only securities receives all of the interest payments from the underlying assets and one class of principal-only securities receives all of the principal payments from the underlying assets.

Loan Investment Activities Risk

The Fund may invest in debt or equity financing. If the Fund engages in such activities, the Fund will be subject to applicable laws in each jurisdiction in which such activities take place. Such laws are frequently highly complex and may include licensing requirements. The licensing processes can be lengthy and can be expected to subject a loan investor to increased regulatory oversight. In some instances, the process for obtaining a required license or exception certificate may require disclosure to regulators or to the public of information about the Fund, its direct or indirect investors, its loans, its business activities, its management or controlling persons or other matters. Such disclosures may provide competitors with information that allows them to benefit at the expense of the Fund, which could have a material adverse effect on the Fund. Failure, even if unintentional, to comply fully with applicable laws may result in sanctions, fines, or limitations on the ability of the Fund, the Investment Manager or affiliates of the foregoing to do business in the relevant jurisdiction or to procure required licenses in other jurisdictions, all of which could have a material adverse effect on the Fund.

The market for investing in debt at initial issuance and equity financing is highly competitive, and the Fund may be unable to compete effectively with other market participants for such opportunities. The Fund may compete for opportunities with public and private investment funds, commercial and investment banks and commercial finance companies. In general, the corporate, non-mortgage debt and equity origination markets present relatively low barriers to entry, and significant competition is likely.

Many current and potential competitors in the debt and equity origination business are much larger than the Fund's expected size and, accordingly, have far greater financial, technical, marketing and other resources. The Fund will be subject to various elements of competition, including interest rates and financing costs; origination standards; convenience; customer service; the size, term and seniority of financing arrangements; and marketing and distribution channels. Price pressure from competitors may cause the Fund to lower the interest rates that it charges borrowers, which consequently may lower the value of the Fund's loans. Further, if competitors adopt less stringent loan investment standards in order to maintain their loan investment volume, the Fund may elect to do so as well. If the Fund adopts less stringent loan investment standards, the Fund will bear increased risk for each loan invested in under such less stringent standards, which may not be compensated by an increase in price. Alternatively, the Fund may determine not to adopt less stringent standards in this competitive environment, which decision may result in a loss of market share. Increased pressure on pricing and loan investment opportunities likely would reduce the volume and quality of the Fund's loan investment activity and materially adversely affect the Fund. In particular, from time to time there may be influxes of capital directed at lending to smaller borrowers, which may result in a tendency by the highest quality borrowers to borrow from sources other than the Fund such that the Fund's loan investment opportunities and its eventual portfolio include a disproportionate number of lower quality borrowers or issuers, exacerbating some of the risks outlined here.

Market Making by Dealers Risk

The value of the Fund's fixed-income investments will be affected by general fixed income market conditions, such as the volatility and liquidity of the fixed income market, which are affected by the ability of dealers to "make a market" in fixed-income investments. In recent years, the market for bonds has significantly increased while dealer inventories have significantly decreased, relative to market size. This reduction in dealer inventories may be attributable to regulatory changes, such as capital requirements, and is expected to continue. As dealers' inventories decrease, so does their ability to make a market (and, therefore, create liquidity) in the fixed income market. Especially during periods of rising interest rates, this could result in greater volatility and illiquidity in the fixed income market, which could impair the Fund's profitability or result in losses.

Collateralized Debt Obligations Risk

There are a variety of different types of collateralized debt obligations ("CDOs"), including CDOs collateralized by trust preferred securities and asset-backed securities and CDOs collateralized by corporate loans and debt securities called collateralized loan obligations ("CLOs"). CDOs may issue several types of securities, including CDO and CLO equity, multi-sector CDO equity, trust preferred CDO equity and CLO debt. CDOs are subject to credit, liquidity and interest rate risks, which are each discussed in greater detail above. The CDO equity may be unrated or non-investment grade. As a holder of CDO equity, the Fund will have limited remedies available upon the default of the CDO. The Fund may be unable to find a sufficient number of attractive opportunities to meet their investment objective or fully invest their committed capital. For example, from time to time, the market for CDO transactions has been adversely affected by a decrease in the availability of senior and subordinated financing for transactions, in part in response to regulatory pressures on providers of financing to reduce or eliminate their exposure to such transactions. CDOs often invest in concentrated portfolios of assets. The concentration of an underlying portfolio in any one obligor would subject the related CDOs to a greater degree of risk with respect to defaults by such obligor and the concentration of a portfolio in any one industry would subject the related CDOs to a greater degree of risk with respect to economic downturns relating to such industry.

The value of CDOs generally fluctuates with, among other things, the financial condition of the obligors or issuers of the underlying portfolio of assets of the related CDO ("CDO Collateral"), general economic conditions, the condition of certain financial markets, political events, developments or trends in any particular industry and changes in prevailing interest rates. Consequently, holders of CDOs must rely solely on distributions on the CDO Collateral or proceeds thereof for payment in respect thereof. If distributions on the CDO Collateral are insufficient to make payments on the CDOs, no other assets will be available for payment of the deficiency and following realization of the CDOs, the obligations of such issuer to pay such deficiency generally will be extinguished. CDO Collateral may consist of high-yield debt securities, loans, asset-backed securities and other securities, which often are rated below investment grade (or of equivalent credit quality). High-yield debt securities generally are unsecured (and loans may be unsecured) and may be subordinated to certain other obligations of the issuer thereof. The lower ratings of high-yield securities and below investment grade loans reflect a greater possibility that adverse changes in the financial condition of an issuer or in general economic conditions or both may impair the ability of the related issuer or obligor to make payments of principal or interest. Such investments may be speculative.

Subordination of CDO Debt and CDO Equity Risk

Subordinate CDO debt generally is fully subordinated to the related CDO senior tranches. CDO equity generally is fully subordinated to any related CDO debt and is not secured by any collateral. Distributions to holders of CDO equity will generally be made solely from distributions on the assets of the CDO issuer after all other payments have been made pursuant to the priority of payments of such CDO. To the extent that any losses are incurred by a CDO in respect of its related CDO Collateral, such losses will be borne first by the holders of the related CDO equity, next by the holders of any related subordinated CDO debt and finally by the holders of the related CDO senior tranches. In addition, if an event of default occurs under the governing instrument or underlying investment, as long as any CDO senior tranches are outstanding, the holders thereof generally will be entitled to determine the remedies to be exercised under the instrument governing the CDO. Remedies pursued by such holders could be adverse to the interests of the holders of any related subordinated CDO debt and/or the holders of the related CDO equity, as applicable. Subordinate CDO debt and CDO equity represent leveraged investments in the assets of the CDO. Therefore, the leveraged nature of such securities may magnify the adverse impact on the market value of such securities caused by changes affecting the assets underlying such securities, including changes in the

market value of such assets, changes in distributions on such assets, defaults and recoveries, capital gains and losses on such assets, prepayments and the availability, prices, and interest rates of such assets. Accordingly, subordinate CDO debt and CDO equity may not be paid in full and may be subject to up to 100% loss.

Control by Senior CDO Debt Risk

In a typical CDO, the most senior CDO debt (the “Controlling Class”) will control many rights under the CDO indenture and therefore, holders of subordinate CDO debt and CDO equity will have limited rights in connection with an event of default or distributions thereunder. Remedies pursued by the holders of the Controlling Class upon an event of default could be adverse to the interests of the holders of subordinate CDO debt and CDO equity. If an event of default has occurred and is continuing, the holders of CDO equity will not have any creditors’ rights against the CDO issuer and will not have the right to determine the remedies to be exercised under the CDO indenture. There is no guarantee that any funds will remain to make distributions to the holders of subordinate CDO debt and CDO equity following any liquidation of the CDO assets and the application of the proceeds from the CDO assets to pay senior classes of CDO debt and the fees, expenses, and other liabilities payable by the CDO issuer. The Controlling Class may also have consent rights in respect of amendments and CDO manager removal rights in connection with certain events.

Mandatory Redemption of CDO Senior Tranches and CDO Debt Risk

Under certain circumstances, cash flows from CDO Collateral that otherwise would have been paid to the holders of any related CDO debt and the related CDO equity will be used to redeem the related CDO senior tranches. This could result in an elimination, deferral or reduction in the interest payments, principal repayments or other payments made to the holders of such CDO debt or such CDO equity, which could adversely impact the returns to the holders of such CDO debt or such CDO equity.

Optional Redemption of CDO Senior Tranches and CDO Debt Risk

An optional redemption of a CDO could require the collateral or portfolio manager of the related CDO to liquidate positions more rapidly than would otherwise be desirable, which could adversely affect the realized value of the items of CDO Collateral sold (and which in turn could adversely impact the holders of any related CDO debt, and/or the holders of the related CDO equity).

Rating Agencies Risk

Future actions of any rating agency can adversely affect the market value or liquidity of CDOs. Rating agencies rating a CDO may change their published ratings criteria or methodologies for CDOs at any time in the future. Further, such rating agencies may retroactively apply any such new standards to the ratings of the CDO securities purchased by the Fund. Any such action could result in a substantial lowering (or even withdrawal) of any rating assigned to any such CDO security, even though such CDO security might still be performing fully to the specifications set forth for such CDO security in the related transaction documents. The rating assigned to any CDO may also be lowered following the occurrence of an event or circumstance even though the related rating agency previously provided confirmation that such occurrence would not result in the rating of such CDO being lowered. Additionally, any rating agency may, at any time and without any change in its published ratings criteria or methodology, lower or withdraw any rating assigned by it to any class of CDO security. If any rating initially assigned to any CDO security is subsequently lowered or withdrawn for any reason, holders of such security may not be able to resell their security without a substantial discount. Any reduction or withdrawal to the ratings on any class of CDO security may significantly reduce the liquidity thereof and may adversely affect the CDO issuer’s ability to make certain changes to the composition of the CDO assets since the CDO’s indenture may contain restrictions on portfolio modifications that are tied to the ratings on the CDO’s securities.

A rating agency may also revise or withdraw its ratings of a CDO security as a result of a failure by the issuer or the manager of such CDO to provide it with information requested by such rating agency or comply with any of its obligations contained in the engagement letter with such rating agency, including the posting of information provided to the rating agency on a website that is accessible by rating agencies that were not hired in connection with the issuance of the CDO securities as required by law. In addition, a CDO security may receive an unsolicited rating, which may have an adverse effect on the liquidity or the market price of such CDO security. Any

such revision or withdrawal of a rating as a result of such a failure might adversely affect the liquidity and value of the CDO security.

Warehouse Agreements Risk

The Fund may enter into warehouse agreements (“Warehouse Agreements”) with certain collateral managers, including the Investment Manager. Pursuant to such Warehouse Agreements, the Fund may provide financing, either directly or indirectly, for the purchase of assets, or may own certain assets (“Warehouse Securities”) in anticipation of such assets constituting the collateral of a CDO or other structured transaction (a “Structured Transaction”). Upon the closing of the Structured Transaction to which the Warehouse Agreement relates, the Fund may or may not purchase securities issued in such Structured Transaction. The Fund may not achieve its investment objective in financing the warehouse if the Warehouse Securities are not purchased in the Structured Transaction or where the Structured Transaction fails to close. A collateral manager will purchase Warehouse Securities from the warehouse for a Structured Transaction only to the extent that the collateral manager determines that such purchases are consistent with the investment guidelines of the Structured Transaction, the restrictions contained in the collateral management agreement and applicable law. If Warehouse Securities are not purchased for a Structured Transaction, depending on the terms of the Warehouse Agreement, Warehouse Securities may be liquidated, which may result in a profit or a loss to the Fund, or the Fund may take possession of the Warehouse Securities. In either case, the Fund will bear the risk that the value of such Warehouse Securities may be below their purchase price. If a Structured Transaction fails to close, in addition to the foregoing risks, the Fund may not be paid for financing the warehouse facility.

Regulatory Change Risk

Government regulation and/or intervention may change the way the Fund is regulated, affect the expenses incurred directly by the Fund and the value of its investments, and limit and /or preclude the Fund’s ability to achieve its investment objectives. Government regulation may change frequently and may have significant adverse consequences. Actions by governmental entities may also impact certain instruments in which the Fund invests.

Moreover, government regulation may have unpredictable and unintended effects. Legislative or regulatory actions to address perceived liquidity or other issues in fixed income markets generally, or in particular markets such as the municipal securities market, may alter or impair the Fund’s ability to pursue its investment objectives or utilize certain investment strategies and techniques.

Current rules related to credit risk retention requirements for ABS may increase the cost to originators, securitizers and, in certain cases, asset managers of securitization vehicles in which the Fund may invest. The impact of the risk retention rules on the securitization markets is uncertain. These requirements may increase the costs to originators, securitizers, and, in certain cases, collateral managers of securitization vehicles in which the Fund may invest, which costs could be passed along to the Fund as an investor in such vehicles. In addition, the costs imposed by the risk retention rules on originators, securitizers and/or collateral managers may result in a reduction of the number of new offerings of ABS and thus in fewer investment opportunities for the Fund. A reduction in the number of new securitizations could also reduce liquidity in the markets for certain types of financial assets, which in turn could negatively affect the returns on the Fund’s investment.

Leverage Risk

The Fund’s use of leverage creates the opportunity for increased net income to Common Shares, but also creates special risks for shareholders. Leverage is a speculative technique that may expose the Fund to greater risk and increased costs. If shorter-term interest rates rise relative to the rate of return on the Fund’s portfolio, the interest and other costs to the Fund of leverage (including interest expenses on reverse repurchase agreements, dollar rolls and borrowings and the dividend rate on any outstanding preferred shares) could exceed the rate of return on the debt obligations and other investments held by the Fund, thereby reducing returns to shareholders. In addition, fees and expenses of any form of leverage used by the Fund will be borne entirely by the shareholders (and not by preferred shareholders, if any) and will reduce the investment return of the Common Shares. Therefore, the Fund’s

use of leverage may result in losses. In addition, any preferred shares issued by the Fund are expected to pay cumulative dividends, which may tend to increase leverage risk.

Leverage creates several major types of risks for shareholders, including:

- the likelihood of greater volatility of NAV of Common Shares, and of the investment return to shareholders, than a comparable portfolio without leverage;
- the possibility either that dividends will fall if the interest and other costs of leverage rise, or that dividends paid on Common Shares will fluctuate because such costs vary over time; and
- the effects of leverage in a declining market or a rising interest rate environment, as leverage is likely to cause a greater decline in the NAV of the Shares than if the Fund were not leveraged.

If the costs of any leverage used by the Fund exceed the income from portfolio securities acquired through the use of such leverage, the Fund's NAV would decline. A decline in the Fund's NAV could affect the ability of the Fund to pay dividends or make distributions to shareholders. A failure by the Fund to distribute an adequate proportion of its net investment income in the form of dividends each taxable year would result in the Fund ceasing to qualify as a RIC under the Code. See "Tax Matters" below for additional information. Also, the counterparties to the Fund's leveraging transactions and any preferred shareholders of the Fund will have priority of payment over the Fund's shareholders.

The use by the Fund of reverse repurchase agreements and dollar rolls to obtain leverage also involves special risks. For instance, the market value of the securities that the Fund is obligated to repurchase under a reverse repurchase agreement or dollar roll may decline below the repurchase price.

In addition to reverse repurchase agreements, dollar rolls and/or borrowings (or a future issuance of preferred shares), the Fund may engage in other transactions that may give rise to a form of leverage including, among others, futures and forward contracts (including foreign currency exchange contracts), credit default swaps, total return swaps, basis swaps and other derivative transactions, loans of portfolio securities, short sales and when-issued, delayed delivery and forward commitment transactions). The Fund's use of such transactions gives rise to associated leverage risks described above, and may adversely affect the Fund's income, distributions, and total returns to shareholders. The Fund may offset derivatives positions against one another or against other assets to manage effective market exposure resulting from derivatives in its portfolio. To the extent that any offsetting positions do not behave in relation to one another as expected, the Fund may perform as if it is leveraged through use of these derivative strategies.

Whole Loan Securitizations Risk

The Fund may be expected to securitize one or more loans to generate cash. Securitizing such loan or loans typically involves the creation of a wholly owned entity, the contribution of such loan or pool of loans to the entity and the issuance by the entity of securities or tranching loans to purchasers who would be expected to be willing to accept a substantially lower interest rate than the loans earn. The Fund generally expects to retain all or a portion of the equity in any such securitized loan or pool of loans and its retained equity would be exposed to any losses on such loans before any of the debt securities would be exposed to such losses. The Investment Manager and its affiliates will often be in a position to determine whether assets should be placed into a whole loan securitization or whether the Fund and other clients of the Investment Manager ("Other Clients") should acquire such loans or other instruments directly, which can also create the potential for conflicts of interest as the Investment Manager and its affiliates manage Other Clients with Investment Guidelines that do not permit such Other Clients to invest in whole loan securitizations. There can be no assurance that the Investment Manager will determine to seek to securitize assets in a manner that ensures that the Fund will be eligible to participate (or that such securitization will occur successfully) and the Investment Manager is permitted to make different determinations in good faith whether to seek to securitize certain assets which determination may differ from determinations to not securitize similar assets.

Whole Loan Risk

The Fund's investments in whole loans, including commercial mortgage loans and non-qualified mortgages, involve the direct acquisition or origination of mortgage loans, where the Fund maintains beneficial and record ownership of the loans. These investments are subject to significant risks, including risks of delinquency,

foreclosure, and potential losses. In the event of foreclosure, the proceeds generated from the underlying property may be insufficient to recover the Fund's investment and related costs. Additionally, the Fund may experience losses in connection with loan restructurings or sales, further adversely affecting its performance. These risks are distinct from those associated with investments in other mortgage-related securities and may expose the Fund to greater potential volatility and loss.

Aircraft and Aviation Industry Risk

The Fund may invest in securities collateralized or otherwise backed by assets in the aviation industry, including commercial aircraft and loans and leases thereof ("Aviation Assets"). Certain events ("Aviation Impact Events") may have a direct and indirect impact on the value of the Fund's Aviation Assets, including: (i) economic declines and recessions; (ii) geopolitical conflict; (iii) the price of petroleum; (iv) the availability of more attractively priced and/or more efficient aircraft; (v) price discounting by manufacturers of new aircraft; (vi) obsolescence (whether due to changes in technology or changes in regulation, particularly regulation related to environmental standards); (vii) the negative effects (including the related press coverage and negative public perception) of aircraft incidents, aerial catastrophes, aircraft disasters and other aviation accidents involving highly publicized commercial airlines and aviation manufacturers, whether as a result of mechanical, electrical, airframe or human failure; and (viii) the occurrence or threat of pandemic, terrorism. Each of the foregoing Aviation Impact Events can have a material effect on aircraft values, especially in the short term, but the effect may also be long-term or permanent. Most of these Aviation Impact Events either cannot be predicted or cannot be predicted with any degree of certainty, but will adversely affect the value of securities held by the Fund. In addition to factors linked to the aviation industry, other factors that may affect the value of an aircraft include: (i) manufacturers merging or exiting the industry or ceasing to produce aircraft types; (ii) the particular maintenance and operating history of the aircraft and engines; (iii) the number of operators using that type of aircraft; (iv) whether the aircraft is subject to a lease; (v) regulatory and legal requirements that must be satisfied before the aircraft can be operated, sold or re-leased, including airworthiness directives; (vi) layout of the aircraft amongst operators of particular aircraft; and (vii) any renegotiation of a lease on less favorable terms. Changes in the economic and public health situation, which can result in widespread travel restrictions and reduced travel demand at times, may have adverse effects on the value and liquidity of aircraft securitizations. To the extent an investment is collateralized or otherwise backed by assets in the aviation industry that are located outside the United States, such investment will be subject to the risks associated with non-U.S. investments, including risks of exposure to government restrictions, including confiscatory taxation, expropriation or nationalization of a company's assets.

Royalties Risk

The Fund may invest in royalties, either directly purchasing the asset generating royalties or providing loans secured by royalties. Investments in royalties incorporate a number of general market risks along with risks specific to various underlying royalty strategies, such as oil & gas, music/entertainment and healthcare, among others. Included in those risks could be volatility in commodities, regulatory changes, delays in government approvals, patent defense and enforcement, product liabilities, product pricing and the dependence on third parties to market or distribute the product. The market performance of the target products, therefore, may be diminished by any number of factors that are beyond the Fund's control.

Trade Finance Risk

Trade finance as an asset class typically consists of the financing of goods or materials during the time it takes to transport the goods from one geographic location to another. The Fund may invest in trade finance, structured trade finance, export finance, and project finance, or related obligations of companies or other entities with potential for exposure to emerging markets, all through a variety of forms, structures, and terms. Investing in trade finance may present emerging market risk, where the Fund considers risks tied to political and economic factors (different and often more complex than those faced domestically), ranging from but not limited to: expropriation, confiscation, nationalization, election, or war. Emerging market risk can also produce risk associated with loan market health, additional costs, regulatory practices, accounting standards, credit systems, taxation, and currency risk. Additionally, trade finance may entail transportation and warehousing risk, legal risk, collateral value risk, liquidity risk, and global market risk. Counterparty risk exists in default and fraud, as well as custody risks of theft and natural disaster. Finally, to the extent the buyer does not follow through on the contractual purchase, the Fund bears the price risk of reselling the goods to a new buyer.

Transportation Finance Risk

The Fund may invest in transportation finance-related instruments. The transportation finance sector is cyclical in nature and will likely be dependent upon continued economic growth in the world's economies. Economic recessions, terrorism, pandemics, the price of fuel, and newer, more efficient vehicles are all risks to these types of investments. Further, funds operating in these sectors will often have greater portfolio concentration.

Consumer and Auto Loan Risk

The Fund may invest in consumer loans (or ABS backed by consumer loans), including debt consolidation loans, home improvement loans, personal loans, residential real estate investments, credit cards, and automobile loans. The performance of such investments are affected by, among other things, general economic conditions. Changes in economic conditions have adversely affected the performance and market value of such investments. Consumer loans are susceptible to prepayment risks and default risks. Unsecured consumer loans are not secured by any collateral of the borrowers. The repayment of unsecured consumer loans is dependent upon the ability and willingness of the borrowers to repay. Other consumer loans, like automobile loans, may be secured by collateral, but the value of that collateral is not guaranteed. Automobile loans are not typically insured or guaranteed by any other person or entity. Increases in unemployment, decreases in home values or the values of other consumer assets or lack of availability of credit may lead to increased default rates and may also be accompanied by decreased consumer demand for automobiles and declining values of automobiles securing outstanding automobile loan contracts, which weakens collateral coverage and increases the amount of a loss in the event of default. Significant increases in the inventory of used automobiles during periods of economic recession or otherwise may also depress the prices at which repossessed automobiles may be sold or delay the timing of these sales. The occurrence of any of any of the foregoing risks could, among other things, adversely affect the consumer loans (or the ABS backed by consumer loans) in which the Fund may invest.

Risks Related to Investing in Datacenters

The Fund may acquire assets related to datacenters. The Fund's datacenter investments are subject to operating risks common to the datacenter industry, which include changes in tenant demands or preferences, a decline in the technology industry, such as a decrease in the use of mobile or web-based commerce, industry slowdowns, business layoffs or downsizing, relocation of businesses, increased costs of complying with existing or new government regulations and other factors; a downturn in the market for datacenter space generally such as oversupply of or reduced demand for space; increased competition, including from the datacenters' tenants choosing to develop their own datacenters; and the rapid development of new technologies or the adoption of new industry standards that render the datacenters' tenants' current products and services or the datacenter facilities obsolete or unmarketable. To the extent that any of these or other adverse conditions occur, they are likely to impact market rents for, and cash flows from, the Fund's datacenter investments, which could have a material adverse effect on the Fund.

Merchant Cash Advance Risk

For a variety of reasons, many small- and medium-sized merchants, retailers and businesses may have difficulties securing loans from traditional lenders and rely on merchant cash advances for operating liquidity. Merchant cash advances are made largely based on factors such as the value of a business' account receivables. In exchange, the provider of the advance may receive a share of a business' future sales and/or a fixed fee. The remittances from the borrower will generally be drawn from the borrower's customer debit and credit-card purchases until the advance is repaid. Such cash advances come with the additional risks associated with small business lending which may lead to losses to the Fund. Since the cash advances are technically sales of future assets, rather than direct loans or credit, when making such advances the Fund is not believed to be currently subject to state usury laws or any of the restrictions under the Dodd-Frank Wall Street Reform and Consumer Protection Act. However, there have been discussions of increasing regulation of merchant cash advances and other alternative lending. Any such increased regulation may have an adverse effect on the Fund by increasing the cost of executing merchant cash advances, or making the strategy economically unfeasible or unlawful. There have also been claims that certain merchant cash advances should be re-characterized as loans. Any such claims, if successful, could result in an inability to collect on the merchant cash advances, as well as a potential for fines, penalties, and required refunds of amounts previously collected.

Infrastructure Debt Risk

The Fund may invest its assets in debt securities issued by companies in the infrastructure industry or assets collateralized by such debt. Infrastructure companies are subject to a variety of factors that may adversely affect their business or operations, including high interest costs in connection with capital construction programs, high leverage, costs associated with environmental and other regulations, the effects of economic slowdown including surplus capacity, government budgetary constraints and other factors. Additionally, infrastructure companies may be subject to regulation by various governmental authorities and also may be affected by governmental regulation of rates charged to customers, service interruptions and/or legal challenges due to environmental, operational or other issues and the imposition of special tariffs and changes in tax laws, regulatory policies and accounting standards. There is also the risk that publicly funded infrastructure projects may be subject to the effects of public corruption resulting in delays and cost overruns. Other risks include environmental damage due to a company's operations or an accident, changes in market sentiment toward infrastructure and terrorist acts. Infrastructure securities may also be highly illiquid investments.

Loan Service Risk

The failure of servicers to effectively service the loans and/or pools thereof in which the Fund has an investment would materially and adversely affect the Fund. Most loans and securitizations thereof require a servicer to manage collections on each of the underlying loans. Both default frequency and default severity of loans may depend upon the quality of the servicer. The servicer's quality is of significant importance in the management of loans (or pools thereof) and default issues related thereto. In the case of pools of securitized loans, servicers may be required to advance interest on delinquent loans to the extent the servicer deems those advances recoverable. In the event the servicer does not advance, interest payments may be interrupted even on more senior securities. Servicers may also advance more than is in fact recoverable once a defaulted loan is disposed, and the loss may be greater than the outstanding principal balance of that loan.

Interest Rate Risk

Interest rate changes can be sudden and unpredictable, and are influenced by a number of factors, including government policy, monetary policy, inflation expectations, perceptions of risk, and supply and demand for bonds. When interest rates increase this may result in a decrease in the value of debt securities held by the Fund. Conversely, as interest rates decrease, MBS prices typically do not rise as much as the prices of comparable bonds. Changes in government intervention may have adverse effects on investments, volatility, and illiquidity in debt markets. In recent years, the Federal Reserve has raised interest rates in response to increased inflation. An environment with rising interest rates may lead to a decrease in the price of MBS or the increase in defaults on mortgages. More recently, the Federal Reserve has subsequently cut interest rates as inflation has decreased.

Risks of Loans and Other Debt Instruments

The Fund's investment program may include investments in significant amounts of loans or other debt instruments (which may include mortgages and loans secured by real estate) and participations in loans by way of syndication or otherwise. These obligations are subject to unique risks, including (a) the possible invalidation of investment transactions as fraudulent conveyances or preferential payments under relevant creditors' rights and bankruptcy laws or the subordination of claims under so-called "equitable subordination" common law principles, (b) so-called lender liability claims by the issuer of the obligations, (c) environmental liabilities that may arise with respect to collateral securing the obligations and (d) limitations on the ability of the Fund to directly enforce its rights with respect to participations. In analyzing each bank loan or other debt instrument, the Investment Manager compares the relative significance of the risks against the expected benefits of the investment. Successful claims by third parties arising from these and other risks, absent certain conduct by the Investment Manager, its affiliates and certain other individuals, will be borne by the Fund. In addition, the settlement process for the purchase of bank loans can take significantly longer than the timeframes established by the Loan Syndications & Trading Association and comparable non-U.S. bodies. The longer a trade is outstanding between the counterparties, the greater the risk of additional operational and settlement issues and the potential for the Fund's counterparty to fail to perform.

If the Fund purchases a participation, the Fund will not have established any direct contractual relationship with the borrower. The Fund will be required to rely on the lender or the participant that sold the participation not only for the enforcement of the Fund's rights against the borrower but also for the receipt and processing of

payments due to the Fund under the participation. The Fund will thus be subject to the credit risk of both the borrower and the selling lender or participant. Because it may be necessary to assert through the selling lender or participant such rights as may exist against the borrower, in the event the borrower fails to pay principal and interest when due, such assertion of rights against the borrower may be subject to delays, expenses and risks that are greater than those that would be involved if the Fund could enforce its rights against the borrower directly.

Non-Performing Loans and Foreclosure Proceedings Risk

Debt investments (including real estate loans) by the Fund may be at the time of their acquisition, or may become after origination, participation or acquisition, non-performing for a wide variety of reasons, many of which are outside the control of the Investment Manager, the Fund or their affiliates. Non-performing real estate loans may require a substantial amount of workout negotiations and/or restructuring, which may entail, among other things, a substantial reduction in the interest rate and a substantial write-down of the principal of such loans. To the extent that the Fund purchases partial interests in non-performing loans, the Fund may not have control over the workout process or the management of the real estate assets after such a workout.

The Investment Manager may find it necessary or desirable to foreclose on collateral securing one or more real estate loans purchased or originated by the Fund. The foreclosure process varies jurisdiction by jurisdiction and can be lengthy and expensive. Borrowers often resist foreclosure actions by asserting numerous claims, counterclaims and defenses against the holder of a real estate loan, including lender liability claims and defenses, even when such assertions may have no basis in fact, in an effort to prolong the foreclosure action. In some states, foreclosure actions can take up to several years or more to conclude. At any time during the foreclosure proceedings, the borrower may file for bankruptcy, staying the foreclosure action and further delaying the foreclosure process. Foreclosure litigation tends to create a negative public image of the collateral property and may result in disrupting ongoing leasing and management of the property.

Underlying Default Risk

To the extent underlying default rates with respect to the debt securities or instruments in which the Fund invests occur or otherwise increase, the performance of the Fund's investments may be adversely affected and the risk of loss and foreclosure would be expected to increase. The rate of defaults and losses on real estate-related debt instruments will be affected by a number of factors, including global, regional and local economic conditions in the area where the underlying properties are located, the commercial real estate market in general, the borrower's equity and the financial circumstances of the borrower. A decline in the global or U.S. real estate markets (or any particular sub-market thereof) may result in higher delinquencies, defaults or foreclosures as borrowers may not be able to repay or refinance their outstanding debt obligations when due for a variety of reasons, which may adversely affect the performance of the Fund's investments and give rise to potential conflicts of interest.

Unsecured Loans and Collateral Impairment Risk

In the event of a default by a borrower, the Fund might not receive payments to which it is entitled and thereby could experience a decline in the value of its investments in the borrower. If the Fund invests in debt that is not secured by collateral, in the event of such default, the Fund will have only an unsecured claim against the borrower. In the case of second lien loans that are secured by collateral, while the Investment Manager generally expects the value of the collateral to be greater than the value of such secured second lien loans, the value of the collateral may actually be equal to or less than the value of such second lien loans or may decline below the outstanding amount of such second lien loans subsequent to the Fund's investment. The ability of the Fund to have access to the collateral may be limited by bankruptcy and other insolvency laws. Under certain circumstances, the collateral may be released with the consent of the lenders or pursuant to the terms of the underlying loan agreement with the borrower. There is no assurance that the liquidation of the collateral securing a loan would occur in a timely fashion or would satisfy the borrower's obligation in the event of nonpayment of scheduled interest or principal, or that the collateral could be readily liquidated. As a result, the Fund might not receive full payment on a secured loan investment to which it is entitled and thereby may experience a decline in the value of, or a loss on, the investment.

Covenant-Lite Loans Risk

The Fund may invest in, or obtain exposure to, loans that may be "covenant lite." The Fund uses the term "covenant-lite" to refer generally to loans that do not have financial maintenance covenants. Generally, "covenant-

lite” loans provide borrower companies more freedom to negatively impact lenders because their covenants are incurrence-based, which means they are only tested and can only be breached following an affirmative action of the borrower, rather than by a deterioration in the borrower’s financial condition or operating results. Accordingly, when the Fund invests in “covenant-lite” loans, the Fund may have fewer rights against a borrower and may have a greater risk of loss on such investments as compared to investments in or exposure to loans with financial maintenance covenants.

First Lien Senior Secured Loans Risk

It is expected that when the Fund makes a senior secured term loan investment in an issuer, it will generally take a security interest in substantially all of the available assets of the issuer, including the equity interests of its domestic subsidiaries, which the Fund expects to help mitigate the risk that it will not be repaid. However, there is a risk that the collateral securing the Fund’s loans may decrease in value over time, may be difficult to sell in a timely manner, may be difficult to appraise and may fluctuate in value based upon the success of the business and market conditions, including as a result of the inability of the issuer to raise additional capital, and, in some circumstances, the Fund’s lien could be subordinated to claims of other creditors. In addition, deterioration in an issuer’s financial condition and prospects, including its inability to raise additional capital, may be accompanied by deterioration in the value of the collateral for the loan. Consequently, the fact that a loan is secured does not guarantee that the Fund will receive principal and interest payments according to the loan’s terms, or at all, or that it will be able to collect on the loan should it be forced to enforce its remedies.

Second Lien Senior Secured Loans and Junior Debt Investments Risk

Second and third lien loans are subject to the same investment risks generally applicable to senior loans described above. The Fund’s second lien senior secured loans will be subordinated to first lien loans and the Fund’s junior debt investments, such as mezzanine loans, generally will be subordinated to both first lien and second lien loans and have junior security interests or may be unsecured. As such, to the extent the Fund holds second lien senior secured loans and junior debt investments, holders of first lien loans may be repaid before the Fund in the event of a bankruptcy or other insolvency proceeding. Therefore, second and third lien loans are subject to additional risk that the cash flow of the related obligor and the property securing the second or third lien loan may be insufficient to repay the scheduled payments to the lender after giving effect to any senior secured obligations of the related obligor. This may result in an above average amount of risk and loss of principal. Second and third lien loans are also expected to be more illiquid than senior loans.

Investments in subordinated debt involve greater credit risk of default and loss than the more senior classes or tranches of debt in an issuer’s capital structure. Subordinated tranches of debt instruments (including mortgage-backed securities) absorb losses from default before other more senior tranches of such instruments, which creates a risk particularly if such instruments (or securities) have been issued with little or no credit enhancement secured or equity. To the extent the Fund invests in subordinate debt instruments (including mortgage-backed securities), the Fund would likely receive payments or interest distributions after, and must bear the effects of losses or defaults on, the senior debt (including underlying mortgage loans, senior mezzanine debt or senior commercial mortgage-backed securities bonds) before, the holders of other more senior tranches of debt instruments with respect to such issuer. The Fund’s investments will be affected, where applicable, by (i) the relative payment priorities of the respective classes of instruments or securities issued by portfolio companies (or affiliates thereof), (ii) the order in which the principal balances of such respective classes with balances will be reduced in connection with losses and default-related shortfalls, and (iii) the characteristics and quality of the underlying loans in the Fund.

Privacy and Data Security Laws Risk

Many jurisdictions in which the Fund and its portfolio companies operate have laws and regulations relating to data privacy, cyber security and protection of personal information, including the General Data Protection Regulation (“GDPR”) in the European Union that went into effect in May 2018 and the California Consumer Privacy Act (“CCPA”) that took effect in January 2020 and provides for enhanced consumer protections for California residents, a private right of action for data breaches and statutory fines for data breaches or other CCPA violations. If the Fund or the Investment Manager fail to comply with the relevant laws and regulations, it could result in regulatory investigations and penalties, which could lead to negative publicity and may cause investors and clients to lose confidence in the effectiveness of the Fund’s security measures.

Prepayment Risk

Many issuers have a right to prepay their obligations. When interest rates decline, issuers may be more likely to pay off obligations earlier than expected by refinancing their mortgages, resulting in prepayment of the mortgage-backed securities held by the Fund. The Fund would not benefit from the rise in the market price of the securities that normally accompanies a decline in interest rates, would then lose any price appreciation above the mortgage's principal and would have to reinvest the proceeds at lower yields, resulting in a decline in the Fund's income. Prepayment reduces the yield to maturity and the average life of the security.

Extension Risk

When interest rates rise, certain obligations may be paid off by the obligor at slower rates, resulting in lengthening the average life of MBS held by the Fund and the Fund receiving principal later than expected which can cause additional volatility. This would delay the Fund's ability to reinvest proceeds at higher interest rates. Rising interest rates tend to extend the duration of securities, making them more sensitive to future changes in interest rates. As a result, in a period of rising interest rates, securities may exhibit additional volatility and may lose value.

Real Estate Risk

The value of real estate investments may be affected by risks similar to those associated with direct ownership of real estate such as declines in the value of real estate, overbuilding, rising operating costs, interest rates and property taxes. MBS and certain of the Fund's investments in private alternative credit opportunities are dependent on real estate prices and real estate fundamentals. Any negative trends in such real estate conditions may adversely affect the Fund's results of operations through decreased revenues or increased costs. These conditions include:

- changes in national, regional and local economic conditions, which may be negatively impacted by concerns about inflation, deflation, government deficits, high unemployment rates, decreased consumer confidence and liquidity concerns, particularly in markets in which the Fund has a high concentration of properties;
- fluctuations in interest rates, which could adversely affect the Fund's ability to obtain financing on favorable terms or at all;
- the inability of tenants to pay rent;
- the existence and quality of the competition, such as the attractiveness of the Fund's properties as compared to competitors' properties based on considerations such as convenience of location, rental rates and amenities;
- increased operating costs, including increased real property taxes, maintenance, insurance and utilities costs;
- weather conditions that may increase or decrease energy costs and other weather-related expenses;
- civil unrest, acts of God, including earthquakes, floods, hurricanes and other natural disasters, which may result in uninsured losses, and acts of war or terrorism;
- oversupply of, or a reduction in demand for, real estate in the markets in which properties are located; and
- changes in, or increased costs of compliance with, laws and/or governmental regulations, including those governing regulatory limitations on rents, operating expenses, usage, zoning, the environment and taxes.

Moreover, other factors may adversely affect the Fund's results of operations, including potential liability under environmental and other laws and other unforeseen events. Any or all of these factors could materially adversely affect the Fund's results of operations through decreased revenues or increased costs.

Derivatives Risk

The use of derivative instruments exposes the Fund to additional risks and transaction costs. A risk of the Fund's use of derivatives is that the fluctuations in their values may not correlate perfectly with the overall securities markets.

Rule 18f-4 under the 1940 Act provides a comprehensive regulatory framework for the use of derivatives by funds and imposes requirements and restrictions on funds using derivatives. The rule may affect the availability, liquidity or performance of derivatives, and may not effectively limit the risk of loss from derivatives.

Futures Contract Risk. The primary risks associated with the use of futures contracts are (a) the imperfect correlation between the change in market value of the instruments held by the Fund and the price of the forward or futures contract; (b) possible lack of a liquid secondary market for a forward or futures contract and the resulting inability to close a forward or futures contract when desired; (c) losses caused by unanticipated market movements, which are potentially unlimited; (d) the Investment Manager's inability to predict correctly the direction of securities prices, interest rates, currency exchange rates and other economic factors; (e) the possibility that the counterparty will default in the performance of its obligations; and (f) if the Fund has insufficient cash, it may have to sell securities from its portfolio to meet daily variation margin requirements, and the Fund may have to sell securities at a time when it may be disadvantageous to do so.

Options Risk. Purchasing and writing options, both put and call, are specialized activities that entail greater than normal investment risks. The Fund may not benefit to the same extent as directly holding the underlying asset. The Fund may also lose money on an option if changes in its value do not correspond to the changes in value of the underlying security. If the Fund is not able to close out an option position in its portfolio, it may have to exercise the option to realize any gain and may incur transaction costs upon the purchase or sale of such underlying securities. Some options involve the payment of premiums which may affect Fund performance. If the Fund invests in over-the-counter options, the Fund may be exposed to counterparty risk.

Swaps Risk. Swaps involve the risk that the party with whom the Fund has entered into the swap transaction with defaults on its obligation to pay or that the Fund cannot meet its obligation to the pay the other party. To the extent the swap agreement increases the Fund's exposure to long or short term interest rates, it may also affect the values of mortgage-backed securities, and inflation sensitivity, and borrowing rates.

To Be Announced Security Risk. A TBA is a contract to purchase or sell a MBS at some point in the future and may be classified as a derivative in certain circumstances. Due to the forward-settling nature of TBAs, there is risk that the value of the underlying MBS will fluctuate greater than anticipated or that the TBA may not correlate to the underlying MBS or to the MBS market as a whole. There is also counterparty risk with entering into a TBA contract.

Leverage Risk. Derivative instruments provide the economic effect of financial leverage by creating additional investment exposure, as well as the potential for greater loss. In such a case, the Fund has the risk of losing more than its original investment. The NAV of the Fund when employing leverage will be more volatile and sensitive to market movements. The use of leverage may cause the Fund to liquidate portfolio positions when it would not be advantageous to do so in order to satisfy its obligations. The use of leverage may also cause the Fund to have higher expenses than those of funds that do not use such techniques.

Credit Default Swaps Risk

Credit default swap agreements (including a swap on a credit default index, sometimes referred to as a credit default swap index) may involve greater risks than if the Fund had invested in the reference obligation directly since, in addition to general market risks, credit default swaps are subject to illiquidity risk, counterparty risk and credit risk. A buyer generally also will lose its investment and recover nothing should no credit event occur and the swap is held to its termination date. If a credit event were to occur, the value of any deliverable obligation received by the seller (if any), coupled with the upfront or periodic payments previously received, may be less than the full

notional value it pays to the buyer, resulting in a loss of value to the seller. When the Fund acts as a seller of a credit default swap, it is exposed to many of the same risks of leverage described herein since if an event of default occurs, the seller must pay the buyer the full notional value of the reference obligation. Although the Fund may seek to realize gains by selling credit default swaps that increase in value, to realize gains on selling credit default swaps, an active secondary market for such instruments must exist or the Fund must otherwise be able to close out these transactions at advantageous times. In addition to the risk of losses described above, if no such secondary market exists or the Fund is otherwise unable to close out these transactions at advantageous times, selling credit default swaps may not be profitable for the Fund. The Fund will be subject to credit risk with respect to the counterparties to the credit default swap contract (whether a clearing corporation in the case of a cleared credit default swap or another third party in the case of an uncleared credit default swap). If a counterparty's credit becomes significantly impaired, multiple requests for collateral posting in a short period of time could increase the risk that the Fund may not receive adequate collateral. The Fund may exit its obligations under a credit default swap only by terminating the contract and paying applicable breakage fees, or by entering into an offsetting credit default swap position, which may cause the Fund to incur more losses. The Fund may be unable to exit a credit default swap.

The Fund's return from investment in a credit default swap index may not match the return of the referenced index. Further, investment in a credit default swap index could result in losses if the referenced index does not perform as expected. Unexpected changes in the composition of the index may also affect performance of the credit default swap index. If a referenced index has a dramatic intraday move that causes a material decline in the Fund's net assets, the terms of the Fund's credit default swap index may permit the counterparty to immediately close out the transaction. In that event, the Fund may be unable to enter into another credit default swap index or otherwise achieve desired exposure, even if the referenced index reverses all or a portion of its intraday move.

Over-the-Counter Trading Risk

The Fund's investment and hedging strategies may involve it or its portfolio companies engaging in forward currency contracts and options, as well as currency and credit default swaps and other derivatives. There is no limitation on daily price movements on these instruments and speculative position limits are not currently applicable. The principals who deal in these markets are not required to continue to make markets and these markets can experience periods of illiquidity, sometimes of significant duration. There have been periods during which certain participants in these markets have refused to quote prices for certain contracts or have quoted prices with unusually wide spreads between the prices at which they were prepared to buy and those at which they were prepared to sell. Disruptions can also occur in any market in which the Fund or any of its portfolio companies trades due to unusually high trading volume, political intervention or other factors. The imposition of controls by governmental authorities might also limit such trading to less than that which the Investment Manager would otherwise recommend, to the possible detriment of the Fund. Market illiquidity or disruption could result in significant losses to the Fund.

Below Investment Grade Risk

The Fund intends to invest in securities that are rated below investment grade by rating agencies or that would be rated below investment grade if they were rated. The Fund intends to invest in securities that are rated below investment grade by rating agencies or that would be rated below investment grade if they were rated. Below investment grade securities, which are often referred to as "junk," have predominantly speculative characteristics with respect to the issuer's capacity to pay interest and repay principal. They may also be difficult to value and illiquid. The major risks of below investment grade securities include:

- Below investment grade securities may be issued by less creditworthy issuers. Issuers of below investment grade securities may have a larger amount of outstanding debt relative to their assets than issuers of investment grade securities. In the event of an issuer's bankruptcy, claims of other creditors may have priority over the claims of holders of below investment grade securities, leaving few or no assets available to repay holders of below investment grade securities.
- Prices of below investment grade securities are subject to extreme price fluctuations. Adverse changes in an issuer's industry and general economic conditions may have a greater impact on the prices of below investment grade securities than on other higher-rated fixed-income securities.

- Issuers of below investment grade securities may be unable to meet their interest or principal payment obligations because of an economic downturn, specific issuer developments or the unavailability of additional financing.
- Below investment grade securities frequently have redemption features that permit an issuer to repurchase the security from us before it matures. If the issuer redeems below investment grade securities, we may have to invest the proceeds in securities with lower yields and may lose income.
- Below investment grade securities may be less liquid than higher-rated fixed-income securities, even under normal economic conditions. There are fewer dealers in the below investment grade securities market, and there may be significant differences in the prices quoted by the dealers. Judgment may play a greater role in valuing these securities and the Fund may be unable to sell these securities at an advantageous time or price.
- The Fund may incur expenses to the extent necessary to seek recovery upon default or to negotiate new terms with a defaulting issuer.

The credit rating of a high-yield security does not necessarily address its market value risk. Ratings and market value may change from time to time, positively or negatively, to reflect new developments regarding the issuer.

Sub-Prime Mortgage Loan Risk

Sub-prime mortgage loans face the risk that the issuer of the security will default on interest or principal payments. Sub-prime borrowers typically have weakened credit histories that include payment delinquencies, and possibly more severe problems such as charge-offs, judgments and bankruptcies. The risk of non-payment is more pronounced in sub-prime mortgages than in highly ranked securities. Because there is increased risk of non-payment, the securities may be less liquid and subject to greater declines in value than highly rated instruments, especially in times of market stress. An economic downturn or period of rising interest rates could adversely affect the market for sub-prime notes and reduce the Fund's ability to sell these securities. Additionally, borrowers may seek bankruptcy protection which would delay resolution of security holder claims and may eliminate or materially reduce liquidity.

Counterparty Risk

Typically, a derivative contract involves leverage, i.e., it provides exposure to potential gain or loss from a change in the level of the market price of a security, currency or commodity (or a basket or index) in a notional amount that exceeds the amount of cash or assets required to establish or maintain the derivative contract. Many of these derivative contracts, including options and swaps, will be privately negotiated in the over-the-counter market. Fund transactions involving a counterparty are subject to the risk that the counterparty or a third party will not fulfill its obligation to the Fund. Counterparty risk may arise because of the counterparty's financial condition (i.e., financial difficulties, bankruptcy, or insolvency), market activities and developments, or other reasons, whether foreseen or not. As a result of counterparty's inability to fulfill its obligation, the Fund may obtain no or limited recovery of its investment, and any recovery may be significantly delayed which may result in significant financial loss to the Fund. Further, there is a risk that no suitable counterparties are willing to enter into, or continue to enter into, transactions with the Fund and, as a result, the Fund may not be able to achieve its investment objective.

Portfolio Turnover Risk

The Fund's annual portfolio turnover rate may vary greatly from year to year, as well as within a given year. However, portfolio turnover rate is not considered a limiting factor in the execution of investment decisions for the Fund. High portfolio turnover may result in the realization of taxable capital gains (including short-term capital gains by the Fund which, when distributed to the Fund and, ultimately, to the Fund's shareholders, will generally be taxable as ordinary income). In addition, a higher portfolio turnover rate results in correspondingly greater brokerage commissions and other transactional expenses that are borne by the Fund.

U.S. Government Securities Risk

U.S. government securities are obligations of, or guaranteed by, the U.S. Government, its agencies or government-sponsored entities. Certain U.S. government securities are backed by the U.S. Department of the Treasury or the full faith and credit of the United States and may include U.S. Treasury bills, Treasury Inflation-

Protected Securities, notes and bonds. Such securities are guaranteed only as to the timely payment of interest and principal when held to maturity. U.S. government securities include issues by non-governmental entities (like financial institutions) that carry direct guarantees from U.S. government agencies as part of government initiatives in response to the market crisis or otherwise. Although the U.S. Government guarantees principal and interest payments on securities issued by the U.S. Government and some of its agencies, such as securities issued by the Ginnie Mae, this guarantee does not apply to losses resulting from declines in the market value of these securities. Some of the U.S. Government securities that the Fund may hold are not guaranteed or backed by the full faith and credit of the U.S. Government, such as those issued by Fannie Mae and Freddie Mac. The total public debt of the United States as a percentage of gross domestic product has grown rapidly since the beginning of the 2008–2009 financial downturn. Although high debt levels do not necessarily indicate or cause economic problems, they may create certain systemic risks if sound debt management practices are not implemented. A high national debt can raise concerns that the U.S. Government will not be able to make principal or interest payments when they are due. This increase has also necessitated the need for the U.S. Congress to negotiate adjustments to the statutory debt ceiling to increase the cap on the amount the U.S. government is permitted to borrow to meet its existing obligations and finance current budget deficits. On June 3, 2023, the Fiscal Responsibility Act of 2023 was signed into law, which suspends the limit on federal debt through January 1, 2025. Any controversy or ongoing uncertainty regarding the statutory debt ceiling negotiations may impact the U.S. long-term sovereign credit rating and may cause market uncertainty. As a result, market prices and yields of securities supported by the full faith and credit of the U.S. Government may be adversely affected. On August 1, 2023, the credit rating agency Fitch Ratings downgraded U.S. Treasuries to AA+ from AAA.

Risk Retention Investment Risk

The Fund may invest in risk retention tranches of commercial mortgage-backed securities (“CMBS”) or other eligible securitizations, if any (“risk retention tranches”), which are eligible residual interests held by the sponsors of such securitizations pursuant to the final rules implementing the credit risk retention requirements of Section 941 of the Dodd-Frank Act (the U.S. Risk Retention Rules). In the case of CMBS transactions, for example, the U.S. Risk Retention Rules permit all or a portion of the retained credit risk associated with certain securitizations (i.e., retained risk) to be held by an unaffiliated “third party purchaser,” such as the Fund, if, among other requirements, the third-party purchaser holds its retained interest, unhedged, for at least five years following the closing of the CMBS transaction, after which it is entitled to transfer its interest in the securitization to another person that meets the requirements for a third-party purchaser. Even after the required holding period has expired, due to the generally illiquid nature of such investments, no assurance can be given as to what, if any, exit strategies will ultimately be available for any given position.

In addition, there is limited guidance on the application of the final U.S. Risk Retention Rules to specific securitization structures. There can be no assurance that the applicable federal agencies charged with the implementation of the final U.S. Risk Retention Rules (the Federal Deposit Insurance Corporation, the Comptroller of the Currency, the Federal Reserve Board, the SEC, the Department of Housing and Urban Development, and the Federal Housing Finance Agency) could not take positions in the future that differ from the interpretation of such rules taken or embodied in such securitizations, or that the final U.S. Risk Retention Rules will not change.

Furthermore, in situations where the Fund invests in risk retention tranches of securitizations structured by third parties, the Fund may be required to execute one or more letters or other agreements, the exact form and nature of which will vary (each, a “Risk Retention Agreement”) under which it will make certain undertakings designed to ensure such securitization complies with the final U.S. Risk Retention Rules. Such Risk Retention Agreements may include a variety of representations, warranties, covenants and other indemnities, each of which may run to various transaction parties. If the Fund breaches any undertakings in any Risk Retention Agreement, it will be exposed to claims by the other parties thereto, including for any losses incurred because of such breach.

Non-U.S. Instruments Risk

The Fund may invest in non-U.S. Instruments. Non-U.S. investments involve certain risks not typically associated with investing in the United States. Generally, there is less readily available and reliable information about non-U.S. issuers or borrowers due to less rigorous disclosure or accounting standards and regulatory practices. The cost of servicing external debt will also generally be adversely affected by rising international interest rates, as

many external debt obligations bear interest at rates which are adjusted based upon international interest rates. Because non-U.S. Instruments may trade on days when the Fund's Common Shares are not priced, the Fund's NAV may change at times when Common Shares cannot be sold.

Foreign Currency Risk

Because the Fund may in securities or other instruments denominated or quoted in currencies other than the U.S. dollar, changes in foreign currency exchange rates may affect the value of instruments held by the Fund and the unrealized appreciation or depreciation of investments. Currencies of certain countries may be volatile and therefore may affect the value of instruments denominated in such currencies, which means that the Fund's NAV could decline because of changes in the exchange rates between foreign currencies and the U.S. dollar. The Investment Manager may, but is not required to, elect for the Fund to seek to protect itself from changes in currency exchange rates through hedging transactions depending on market conditions. See "Risks—Swap Risk." The Fund may incur costs in connection with the conversions between various currencies. In addition, certain countries may impose foreign currency exchange controls or other restrictions on the repatriation, transferability or convertibility of currency.

Illiquidity Risk

It is expected that most of the securities and instruments held by the Fund will not trade on an exchange. Illiquid securities may be difficult to dispose of at a fair price at the times when the Fund believes it is desirable to do so. The Fund may be forced to sell securities at inopportune prices to meet Shareholder repurchase requests or to satisfy margin calls.

Management Risk

The skill of the Investment Manager will play a significant role in the Fund's ability to achieve its investment objective. The Fund's ability to achieve its investment objective depends on the ability of the Investment Manager to correctly identify economic trends, especially with regard to accurately forecasting inflationary and deflationary periods. The Fund's ability to achieve its investment objective depends on the ability of the Investment Manager to select securities, especially in volatile markets and the Investment Manager could be incorrect in its analysis of industries, companies, and the relative attractiveness of securities.

Market Events Risk

Market risks, including political, regulatory, market, and economic or other developments, and developments that impact specific economic sectors, industries or segments of the market, can affect the value of the Fund's shares. Local, regional, or global events such as war, acts of terrorism, natural disasters, the spread of infectious illness or other public health issues, recessions, and rapid technological developments or widespread adoption of emerging technologies (such as artificial intelligence) or other events could have a significant impact on the market generally and on specific securities. The Fund is subject to the risk that the prices of, and the income generated by, securities held by the Fund may decline significantly and/or rapidly in response to adverse issuer, political, regulatory, general economic and market conditions, or other developments, such as regional or global economic instability (including terrorism and related geopolitical risks), interest rate fluctuations, and those events directly involving the issuers that may cause broad changes in market value, public perceptions concerning these developments, and adverse investor sentiment. Such events may cause the value of securities owned by the Fund to go up or down, sometimes rapidly or unpredictably. Changes in the economic climate, investor perceptions and stock market volatility also can cause the prices of the Fund's investments to decline regardless of the conditions of the issuers held by the Fund. There is also a risk that policy changes by the U.S. Government and/or Federal Reserve, such as increasing interest rates, could cause increased volatility in financial markets and higher levels of Fund redemptions, which could have a negative impact on the Fund. These events may lead to periods of volatility and increased redemptions, which could cause the Fund to experience a loss when selling securities to meet redemption requests by shareholders. The risk of loss increases if the redemption requests are unusually large or frequent.

Prices may fluctuate widely over short or extended periods in response to company, market or economic news. Markets also tend to move in cycles, with periods of rising and falling prices. If there is a general decline in

the securities and other markets, your investment in the Fund may lose value, regardless of the individual results of the securities and other instruments in which the Fund invests.

In the past several years, financial markets, such as those in the United States, Europe, Asia and elsewhere, have experienced increased volatility, depressed valuations, decreased liquidity and heightened uncertainty. Governmental and non-governmental issuers have defaulted on, or been forced to restructure, their debts. These conditions may continue, recur, worsen or spread.

The U.S. government and the Federal Reserve, as well as certain foreign governments and central banks, took steps to support financial markets, including by keeping interest rates at historically low levels for an extended period. The Federal Reserve has concluded its market support activities and has raised, and may continue to raise, interest rates. Such actions, including additional interest rate hikes, could negatively affect financial markets generally, increase market volatility and reduce the value and liquidity of securities in which the Fund invests.

Policy and legislative changes in the United States and in other countries are affecting many aspects of financial regulation, and may in some instances contribute to decreased liquidity and increased volatility in the financial markets. The impact of these changes on the markets, and the practical implications for market participants, may not be fully known for some time.

Economies and financial markets throughout the world are becoming increasingly interconnected. As a result, whether or not the Fund invests in securities of issuers located in or with significant exposure to countries experiencing economic and financial difficulties, the value and liquidity of the Fund's investments may be negatively affected.

Periods of market volatility may occur in response to pandemics, acts of war, or events affecting global markets. The COVID-19 pandemic, Russia's invasion of Ukraine, and higher inflation have resulted in extreme volatility in the financial markets, economic downturns around the world, and severe losses, particularly to some sectors of the economy and individual issuers, and reduced liquidity of certain instruments. These events have caused significant disruptions to business operations, including business closures; strained healthcare systems; disruptions to supply chains and employee availability; large fluctuations in consumer demand; large expansion of government deficits and debt as a result of government actions to mitigate the effects of such events; and widespread uncertainty regarding the long-term effects of such events. Such events could be prolonged and could adversely affect the value and liquidity of the Fund's investments, impair the Fund's ability to satisfy redemption requests, and negatively impact the Fund's performance. Other market events may cause similar disruptions and effects. Investments in Russian securities may also require the Fund to write-down such positions.

Equity Investments Risk

When the Fund invests in senior, unitranche, second lien and subordinated loans, the Fund may acquire warrants or other equity securities of investments as well. The Fund may also invest in equity securities directly. To the extent the Fund holds equity investments, the Fund will seek to dispose of them and realize gains upon the Fund's disposition of them. However, the equity interests the Fund receives may not appreciate in value and may decline in value. As a result, the Fund may not be able to realize gains from its equity interests, and any gains that the Fund does realize on the disposition of any equity interests may not be sufficient to offset any other losses the Fund experiences.

Risk of No Controlling Equity Interests

Because the Fund generally does not hold controlling equity interests in the Fund's investments, the Fund may not be able to exercise control over the Fund's investments or to prevent decisions by management of the Fund's investments that could decrease the value of the Fund's investments. To the extent that the Fund does not hold controlling equity interests, the Fund will have a limited ability to protect the Fund's position in such investments.

Minority Investments and Joint Ventures Risk

The Fund may make minority equity investments in entities in which the Fund does not control the business or affairs of such entities. In addition, the Fund may enter into co-investment opportunities with other parties through partnerships, joint ventures or other entities and the Investment Manager may share the Management Fee

and/or other forms of compensation with such parties. The Investment Manager expects that in some cases the Fund will have control over, or significant influence on, the decision making of joint ventures. However, in other cases, in particular with respect to certain terms, amendments and waivers related to the underlying loans, the joint venture partner may have controlling or blocking rights (including because certain decisions require unanimous approval of the joint venture partners) or a tie vote among joint venture partners may be resolved by an appointed third party. Where a joint venture partner or third party has controlling or blocking rights or decision-making power with respect to a joint venture matter, there can be no assurance that the matter will be resolved in the manner desired by the Fund. In addition, these types of voting arrangements may slow the decision-making process and hinder the joint venture's ability to act quickly.

Cooperation among joint venture partners or co-investors on existing and future business decisions will be an important factor for the sound operation and financial success of any joint venture or other business in which the Fund is involved. In particular, a joint venture partner or co-investor may have economic or business interests or goals that are inconsistent with those of the Fund, and the Fund may not be in a position to limit or otherwise protect the value of one or more of the Fund's investments. Disputes among joint venture partners or co-investors over obligations, expenses or other matters could have an adverse effect on the financial conditions or results of operations of the relevant businesses. In addition, the Fund may in certain circumstances be liable for actions of its joint venture partners.

In certain cases, conflicts of interest may arise between the Fund and a joint venture partner, for example, because the joint venture partner has invested in a different level of the issuer's capital structure or because the joint venture partner has different investment goals or timelines. There can be no assurance that a joint venture partner with divergent interests from the Fund will cause the joint venture to be managed in a manner that is favorable to the Fund. In addition, it is anticipated that the Fund could be invested in debt instruments issued by a joint venture entity while one or more of other investment funds, pooled investment vehicles and client accounts (the "Other Clients") managed by the Investment Manager will be invested in equity interests in such entity or vice versa, which presents certain potential conflicts of interest with respect to the capital structure of such entity.

Hedging Risk

The Fund may be subject to risks under hedging transactions. The Fund may engage in hedging transactions to the extent permitted under applicable commodities laws and the 1940 Act. Engaging in hedging transactions would entail additional risks to the shareholders. The Fund could, for example, use instruments such as swaps, caps, collars and floors and, if the Fund were to invest in foreign securities, the Fund could use instruments such as forward contracts or currency options and borrow under a credit facility in currencies selected to minimize the Fund's foreign currency exposure. In each such case, the Fund generally would seek to hedge against fluctuations of the relative values of the Fund's portfolio positions from changes in market interest rates or currency exchange rates. Hedging against a decline in the values of the Fund's portfolio positions would not eliminate the possibility of fluctuations in the values of such positions or prevent losses if the values of the positions declined. However, such hedging could establish other positions designed to gain from those same developments, thereby offsetting the decline in the value of such portfolio positions. Such hedging transactions could also limit the opportunity for gain if the values of the underlying portfolio positions increased. Moreover, it might not be possible to hedge against an exchange rate or interest rate fluctuation that was so generally anticipated that the Fund would not be able to enter into a hedging transaction at an acceptable price. Use of a hedging transaction could involve counterparty credit risk.

The success of any hedging transactions the Fund may enter into will depend on the Fund's ability to correctly predict movements in currencies and interest rates. Therefore, while the Fund may enter into hedging transactions to seek to reduce currency exchange rate and interest rate risks, unanticipated changes in currency exchange rates or interest rates could result in poorer overall investment performance than if the Fund had not engaged in any such hedging transactions. In addition, the degree of correlation between price movements of the instruments used in a hedging strategy and price movements in the portfolio positions being hedged could vary.

Moreover, for a variety of reasons, the Fund might not seek to (or be able to) establish a perfect correlation between the hedging instruments and the portfolio holdings being hedged. Any such imperfect correlation could prevent the Fund from achieving the intended hedge and expose the Fund to risk of loss. In addition, it might not be possible to hedge fully or perfectly against currency fluctuations affecting the value of securities denominated in

non-U.S. currencies because the value of those securities is likely to fluctuate as a result of factors not related to currency fluctuations. The Fund's ability to engage in hedging transactions may also be adversely affected by rules adopted by the CFTC.

Force Majeure Risk

The Fund's investments may be affected by force majeure events (i.e., events beyond the control of the party claiming that the event has occurred, including, without limitation, acts of God, fire, flood, earthquakes, outbreaks of an infectious disease, pandemic or any other serious public health concern, war, terrorism and labor strikes). Some force majeure events may adversely affect the ability of a party (including a company or a counterparty to the Fund or a company) to perform its obligations until it is able to remedy the force majeure event. In addition, the cost to a company of repairing or replacing damaged assets resulting from such force majeure event could be considerable. Additionally, a major governmental intervention into industry, including the nationalization of an industry or the assertion of control over one or more companies or its assets, could result in a loss to the Fund, including if its investment in such company is cancelled, unwound, or acquired (which could be without what the Fund considers to be adequate compensation). To the extent the Fund is exposed to investments in companies that as a group are exposed to such force majeure events, the risks and potential losses to the Fund are enhanced.

Repurchase Agreements Risk

Subject to its investment objectives and policies, the Fund may invest in repurchase agreements as a buyer for investment purposes. Repurchase agreements typically involve the acquisition by the Fund of debt securities from a selling financial institution such as a bank, savings and loan association or broker-dealer. The agreement provides that the Fund will sell the securities back to the institution at a fixed time in the future for the purchase price plus premium (which often reflects the interests). The Fund does not bear the risk of a decline in the value of the underlying security unless the seller defaults under its repurchase obligation. In the event of the bankruptcy or other default of a seller of a repurchase agreement, the Fund could experience both delays in liquidating the underlying securities and losses, including (1) possible decline in the value of the underlying security during the period in which the Fund seeks to enforce its rights thereto; (2) possible lack of access to income on the underlying security during this period; and (3) expenses of enforcing its rights. In addition, as described above, the value of the collateral underlying the repurchase agreement will be at least equal to the repurchase price, including any accrued interest earned on the repurchase agreement. In the event of a default or bankruptcy by a selling financial institution, the Fund generally will seek to liquidate such collateral. However, the exercise of the Fund's right to liquidate such collateral could involve certain costs or delays and, to the extent that proceeds from any sale upon a default of the obligation to repurchase were less than the repurchase price, the Fund could suffer a loss.

Subsidiary Risk

The Fund may invest either directly or indirectly through one or more subsidiaries (each, a "Subsidiary," and together, the "Subsidiaries"), which exposes the Fund to the risks associated with the Subsidiaries' investments. These risks generally mirror the investment risks applicable to the Fund as described in this Prospectus. Subsidiaries, however, are not registered as investment companies under the 1940 Act and are therefore not subject to all the protections afforded to investors under the 1940 Act. The principal investment strategies and risks disclosed in this Prospectus apply to investments held directly by the Fund and indirectly by any Subsidiaries with respect to investment policies, capital structure and leverage. The Fund's Board of Trustees has oversight responsibility for the investment and other activities of the Fund, including the Fund's investments held through any Subsidiary, and the Fund's role as the sole shareholder of any Subsidiary. The Investment Manager will manage the investments held by the Fund directly and indirectly through any Subsidiaries pursuant to a contract that complies with the 1940 Act.

Convertible Securities Risk

Convertible securities are bonds, debentures, notes, preferred stocks or other securities that may be converted into or exchanged for a specified amount of common stock of the same or different issuer within a particular period of time at a specified price or formula. A convertible security entitles its holder to receive interest that is generally paid or accrued on debt or a dividend that is paid or accrued on preferred stock, in each case, until the convertible security matures or is redeemed, converted, or exchanged. Convertible securities have unique investment characteristics in that they generally (i) have higher yields than common stocks, but lower yields than comparable non-convertible securities; (ii) are less subject to fluctuation in value than the underlying common stock

due to their fixed income characteristics; and (iii) provide the potential for capital appreciation if the market price of the underlying common stock increases.

The value of a convertible security is a function of its “investment value” (determined by its yield in comparison with the yields of other securities of comparable maturity and quality that do not have a conversion privilege) and its “conversion value” (the security’s worth, at market value, if converted into the underlying common stock). The investment value of a convertible security is influenced by changes in interest rates, with investment value declining as interest rates increase and increasing as interest rates decline. The credit standing of the issuer and other factors may also have an effect on the convertible security’s investment value. The conversion value of a convertible security is determined by the market price of the underlying common stock. If the conversion value is low relative to the investment value, the price of the convertible security is governed principally by its investment value. To the extent the market price of the underlying common stock approaches or exceeds the conversion price, the price of the convertible security will be increasingly influenced by its conversion value. A convertible security generally will sell at a premium over its conversion value by the extent to which investors place value on the right to acquire the underlying common stock while holding a fixed income security. Generally, the amount of the premium decreases as the convertible security approaches maturity.

A convertible security may be subject to redemption at the option of the issuer at a price established in the convertible security’s governing instrument. If a convertible security held by the Fund is called for redemption, the Fund will be required to permit the issuer to redeem the security, convert it into the underlying common stock or sell it to a third party. Any of these actions could have an adverse effect on the Fund’s ability to achieve its investment objective.

Preferred Securities Risk

Preferred securities represent an equity interest in a company that generally entitle the holder to receive, in preference to the holders of other stocks such as common stock, dividends and a fixed share of the proceeds resulting from a liquidation of the company. The market value of preferred securities is subject to company-specific and market risks applicable generally to equity securities and is also sensitive to changes in the company’s creditworthiness, the ability of the company to make payments on the preferred securities, and changes in interest rates, typically declining in value if interest rates rise.

Repurchase Offer Risk

Repurchase offers and the need to fund repurchase obligations may affect the ability of the Fund to be fully invested or force the Fund to maintain a higher percentage of its assets in liquid investments, which may harm the Fund’s investment performance. Moreover, diminution in the size of the Fund through repurchases may result in untimely sales of portfolio securities (with associated imputed transaction costs, which may be significant), increased portfolio turnover and may limit the ability of the Fund to participate in new investment opportunities or to achieve its investment objective. A decrease in assets may also increase the Fund’s expenses. The Fund may accumulate cash by holding back (i.e., not reinvesting) payments received in connection with the Fund’s investments. If at any time cash and other liquid assets held by the Fund are not sufficient to meet the Fund’s repurchase obligations, the Fund intends, if necessary, to sell investments. To the extent the Fund employs investment leverage, repurchases of Common Shares would compound the adverse effects of leverage in a declining market. In addition, if the Fund borrows to finance repurchases, interest on that borrowing will negatively affect Common Shareholders who do not tender their Common Shares by increasing the Fund’s expenses and reducing any net investment income.

Although the Fund, as a fundamental policy, the Fund will make quarterly offers to repurchase at least 5% and up to 25% of its then outstanding Common Shares, the Fund currently expects to offer to repurchase 5% of then outstanding Common Shares quarterly. The number of shares tendered may exceed the number of Common Shares the Fund has offered to repurchase, in which case not all of your shares tendered in that offer will be repurchased. Accordingly, you may not be able to sell your Common Shares when and in the amounts you desire. A shareholder may be subject to market and other risks including currency fluctuations to the extent of non-dollar denominated holdings, and the NAV of Common Shares tendered in a repurchase offer may decline between the Repurchase Request Deadline and the date on which the NAV for tendered Common Shares is determined. In addition, the repurchase of Common Shares by the Fund may be a taxable event to shareholders.

Valuation Risk

A high portion of the securities in which the Fund invests will be less liquid, and more difficult to value than other types of securities, including due to unavailability or unreliability of third-party pricing information and acts or omissions of service providers to the Fund. Investments for which market quotations are not readily available are valued at fair value as determined in good faith pursuant to Rule 2a-5 under the 1940 Act. See “How Fund Shares are Priced.” Fair value pricing may require subjective determinations about the value of a security or other asset. As a result, there can be no assurance that fair value pricing will result in adjustments to the prices of securities or other assets, or that fair value pricing will reflect actual market value, and it is possible that the fair value determined for a security or other asset will be materially different from quoted or published prices, from the prices used by others for the same security or other asset and/or from the value that actually could be or is realized upon the sale of that security or other asset.

A high proportion of the Fund’s investments relative to its total investments are valued at fair value. Certain factors that may be considered in determining the fair value of the Fund’s investments include dealer quotes for securities traded on the OTC secondary market for institutional investors, the nature and realizable value of any collateral, the portfolio company’s earnings and its ability to make payments on its indebtedness, the markets in which the portfolio company does business, comparison to selected publicly traded companies, discounted cash flow and other relevant factors. The factors and methodologies used for the valuation of such securities are not necessarily an indication of the risks associated with investing in those securities nor can it be assured that the Fund can realize the fair value assigned to a security if it were to sell the security. Such valuations, and particularly valuations of private securities and private companies, are inherently uncertain, and they often reflect only periodic information received by the Investment Manager about such companies’ financial condition and/or business operations, which may be on a lagged basis and can be based on estimates. Determinations of fair value may differ materially from the values that would have been used if an exchange-traded market for these securities existed. Investments in private companies are typically governed by privately negotiated credit agreements and covenants, and reporting requirements contained in the agreements may result in a delay in reporting their financial position to lenders, which in turn may result in the Fund’s investments being valued on the basis of this reported information. Further, the Fund is offered on a monthly basis, except that Common Shares may be offered more or less frequently as determined by the Fund in its sole discretion. The Fund calculates a daily NAV per share. The Investment Manager seeks to evaluate on a daily basis material information about the Fund’s portfolio companies; however, for the reasons noted herein, the Investment Manager may not be able to acquire and/or evaluate properly such information on a daily basis. Due to these various factors, the Investment Manager’s fair value determinations could cause the Fund’s NAV on a valuation day to materially differ from what it would have been had such information been fully incorporated. As a result, investors who purchase Common Shares may receive more or less Common Shares and investors who tender their Common Shares may receive more or less cash proceeds than they otherwise would receive.

Borrowing Risk

In the event the Fund defaults under a credit facility or other borrowings, the Fund could be adversely affected as the Investment Manager may be forced to sell a portion of the Fund’s investments quickly and prematurely at what may be disadvantageous prices to us in order to meet our outstanding payment obligations and/or support working capital requirements under such borrowing facility, any of which would have a material adverse effect on our business, financial condition, results of operations and cash flows. In addition, following any such default, the agent for the lenders under such borrowing facility could assume control of the disposition of any or all of our assets, including the selection of such assets to be disposed and the timing of such disposition, which would have a material adverse effect on the Fund, financial condition, results of operations and cash flows.

Non-Public Information Risk

From time to time, the Investment Manager may come into possession of non-public information concerning specific companies or investments. Under applicable securities laws, this may limit the Investment Manager’s flexibility to buy or sell portfolio securities issued by such companies. The Fund’s investment flexibility may be constrained as a consequence of the Investment Manager’s inability to use such information for investment purposes.

Inflation Risk

Inflation risk is the risk that the real value of certain assets or real income from investments (the value of such assets or income after accounting for inflation) will be less in the future as inflation decreases the value of money. Inflation, and investors' expectation of future inflation, can impact the current value of the Fund's portfolio, resulting in lower asset values and losses to shareholders. This risk may be elevated compared to historical market conditions and could be impacted by monetary policy measures and the current interest rate environment.

Focus Risk

The Fund may invest in securities that it believes will benefit from a common macroeconomic, socioeconomic, political or other investment theme. To the extent that the Fund focuses its investments in particular industries, asset classes or sectors of the economy or that are expected to benefit from a common investment theme, any market price movements, regulatory or technological changes, or economic conditions affecting companies in those industries, asset classes or sectors may have a significant impact on the Fund's performance. The Fund may become more focused in particular industries, asset classes or sectors of the economy as a result of changes in the valuation of the Fund's investments or fluctuations in the Fund's assets, and the Fund is not required to reduce such exposures under these circumstances.

Investment Fund Risk

The Fund may invest in securities of other investment funds that invest in the types of securities in which the Fund may invest directly. As a shareholder in an investment fund, the Fund will bear its ratable share of that investment fund's expenses and would remain subject to payment of the Fund's investment management fees and other expenses with respect to the assets so invested. The investment funds in which the Fund will invest may in turn acquire securities or other instruments issued by certain companies that involve a high degree of business or financial risk. Such companies may be distressed or have operating losses or significant variations in operating results and may be engaged in a rapidly changing business with products subject to a substantial risk of obsolescence. The investment funds may also invest in companies that are experiencing or are expected to experience financial difficulties that may never be overcome. Many of these companies are highly leveraged, which can limit their ability to finance future operations and capital needs and may result in restrictive financial and operating covenants. As a result, a company's flexibility to respond to changing business and economic conditions may be limited.

Shares Not Listed; No Market for Shares

The Fund has been organized as a closed-end management investment company. Closed-end funds differ from open-end management investment companies (commonly known as mutual funds) because investors in a closed-end fund do not have the right to redeem their shares on a daily basis. Unlike most closed-end funds, which typically list their shares on a securities exchange, the Fund does not currently intend to list the Shares for trading on any securities exchange, and the Fund does not expect any secondary market to develop for the Shares in the foreseeable future. Therefore, an investment in the Fund, unlike an investment in exchange-traded closed-end funds, is not a liquid investment.

Closed-end Interval Fund; Liquidity Risk

The Fund is a non-diversified, closed-end management investment company structured as an "interval fund" and designed primarily for long-term investors. The Fund is not intended to be a typical traded investment. There is no secondary market for the Common Shares and the Fund expects that no secondary market will develop. An investor should not invest in the Fund if the investor needs a liquid investment. Closed-end funds differ from open-end management investment companies, commonly known as mutual funds, in that investors in a closed-end fund do not have the right to redeem their shares on a daily basis at a price based on NAV. Although the Fund, as a fundamental policy, will make quarterly offers to repurchase between 5% and 25% of its outstanding Common Shares at NAV, the number of Common Shares tendered in connection with a repurchase offer may exceed the number of Common Shares the Fund has offered to repurchase, in which case not all of your Common Shares tendered in that offer will be repurchased. In connection with any given repurchase offer, it is likely that the Fund may offer to repurchase only the minimum amount of 5% of its outstanding Common Shares. Hence, you may not be able to sell your Common Shares when and/or in the amount that you desire.

Inadequate Return Risk

No assurance can be given that the returns on the Fund's investments will be commensurate with the risk of investment in its Shares.

Investment Dilution Risk

The Fund's investors do not have preemptive rights to any Common Shares the Fund may issue in the future. The Fund's Amended and Restated Declaration and Agreement of Trust (the "Declaration of Trust") authorizes it to issue an unlimited number of Common Shares. The Board may make certain amendments to the Declaration of Trust. After an investor purchases Common Shares, the Fund may sell additional Common Shares in the future or issue equity interests in private offerings. To the extent the Fund issues additional equity interests after an investor purchases its Common Shares, such investor's percentage ownership interest in the Fund will be diluted.

Conflicts of Interest Risk

The Investment Manager is an entity in which certain of the Fund's officers and members of the investment committee of the Investment Manager may have indirect ownership and economic interests. Certain of the Fund's officers and members of the investment committee of the Investment Manager also serve as officers or principals of other investment managers affiliated with the Investment Manager that currently, and may in the future, manage investment funds with investment objectives similar to the Fund's investment objective. In addition, certain of the Fund's officers and the members of the investment committee of the Investment Manager serve or may serve as officers, trustees or principals of entities that operate in the same or related line of business as the Fund does or of investment funds managed by the Fund's affiliates. Accordingly, the Fund may not be made aware of and/or given the opportunity to participate in certain investments made by investment funds managed by advisers affiliated with the Investment Manager. However, the Investment Manager intends to allocate investment opportunities in a fair and equitable manner in accordance with the Investment Manager's investment allocation policy, consistent with each fund's or separate account's investment objective and strategies and legal and regulatory requirements.

Allocation of Investment Opportunities Risk

The Fund's Employees of the Investment Manager and its affiliates serve or may serve as officers, trustees, principals or general partners of entities that operate in the same or a related line of business as the Fund or of other LibreMax-advised funds ("Other Managed Funds"). As a result, they may have obligations to investors in those entities, the fulfillment of which might not be in the best interests of the Fund or its Shareholders. Moreover, notwithstanding the difference in principal investment objectives between the Fund and the Other Managed Funds, such other funds, including potential new pooled investment vehicles or managed accounts not yet established (whether managed or sponsored by affiliates or the Investment Manager), have, and may from time to time have, overlapping investment objectives with the Fund and, accordingly, invest in, whether principally or secondarily, asset classes similar to those targeted by the Fund. To the extent the Other Managed Funds have overlapping investment objectives, the scope of opportunities otherwise available to the Fund may be adversely affected and/or reduced. Additionally, certain employees of the Investment Manager and its management may face conflicts in their time management and commitments as well as in the allocation of investment opportunities to Other Managed Funds.

The results of the Fund's investment activities may differ significantly from the results achieved by the Other Managed Funds. It is possible that one or more of such funds will achieve investment results that are substantially more or less favorable than the results achieved by the Fund. Moreover, it is possible that the Fund will sustain losses during periods in which one or more affiliates achieve significant profits on their trading for proprietary or other accounts. The opposite result is also possible. The investment activities of one or more Investment Manager affiliates for their proprietary accounts and accounts under their management may also limit the investment opportunities for the Fund in certain markets.

The Investment Manager may determine that the Fund should invest on a side-by-side basis with one or more Other Managed Funds. In certain circumstances, negotiated co-investments may be made only in accordance with the terms of the exemptive order the Fund and LibreMax are seeking from the SEC (the "Order"). Co-investments made under the Order, if granted, will be subject to compliance with the conditions and other requirements contained in the Order, which could limit the Fund's ability to participate in a co-investment

transaction. The co-investment would generally be allocated to the Fund and Other Managed Funds that target similar assets pro rata based on available capital for the particular investment.

In the event investment opportunities are allocated among the Fund and Other Managed Funds, including prior to the receipt of an Order, the Fund may not be able to structure its investment portfolio in the manner desired. Although the Investment Manager endeavors to allocate investment opportunities in a fair and equitable manner, the Fund is not generally permitted to co-invest in any portfolio company in which a fund managed by LibreMax or any of its downstream affiliates (other than the Fund and its downstream affiliates) currently has an investment. However, the Fund may co-invest with funds managed by LibreMax or any of its downstream affiliates, subject to compliance with existing regulatory guidance, applicable regulations, and its allocation procedures. There is no assurance if or when the Order will be granted.

Large Shareholder Risk

To the extent a large proportion of Common Shares are held by a small number of shareholders (or a single shareholder), including affiliates of the Investment Manager, the Fund is subject to the risk that these shareholders will seek to sell Common Shares in large amounts rapidly in connection with repurchase offers. These transactions could adversely affect the ability of the Fund to conduct its investment program. Furthermore, it is possible that in response to a repurchase offer, the total amount of Common Shares tendered by a small number of shareholders (or a single shareholder) may exceed the number of Common Shares that the Fund has offered to repurchase. If a repurchase offer is oversubscribed by shareholders, the Fund will repurchase only a pro rata portion of shares tendered by each shareholder. However, the Fund may determine to increase the repurchase offer by up to 2% of the Fund's outstanding Common Shares as of the date of the Repurchase Request Deadline. If the Fund only repurchases a pro rata portion of shares tendered in connection with an oversubscribed repurchase offer, shareholders unaffiliated with the Investment Manager will not be given priority over shareholders that are affiliates of the Investment Manager, whose holdings in the Fund may be significant and may have the effect of diluting third-party shareholders with respect to any repurchase offer.

Distribution Rate Risk

The Fund's distribution rates may be affected by numerous factors, including but not limited to changes in realized and projected market returns, fluctuations in market interest rates, Fund performance, and other factors. There can be no assurance that a change in market conditions or other factors will not result in a change in the Fund's distribution rate or that the rate will be sustainable in the future. For instance, during periods of low or declining interest rates, the Fund's distributable income and dividend levels may decline for many reasons.

For example, the Fund may have to deploy uninvested assets (whether from sales of Fund shares, proceeds from matured, traded or called debt obligations or other sources) in new, lower yielding instruments. Additionally, payments from certain instruments that may be held by the Fund (such as variable and floating rate securities) may be negatively impacted by declining interest rates, which may also lead to a decline in the Fund's distributable income and dividend levels.

Anti-Takeover Provisions

The Fund's Declaration includes provisions that could limit the ability of other entities or persons to acquire control of the Fund. See "Anti-Takeover and Other Provisions in the Declaration of Trust."

Federal Income Tax Risk

Failure to Maintain RIC Tax Treatment

As discussed above, the Fund intends to elect to be taxed as a RIC and intends each year to qualify and be eligible to be treated as such, so that it generally will not be subject to U.S. federal income tax on its net investment income or net short-term or long-term capital gains that is distributed (or deemed distributed) to shareholders. To qualify for and maintain RIC tax treatment under Subchapter M of the Code, the Fund must, among other things, meet annual distribution, income source and quarterly asset diversification requirements. The Fund may have difficulty complying with these requirements. In particular, if the Fund has equity investments that are treated as partnerships or other pass-through entities for tax purposes, the Fund may not have control over, or receive accurate information about, the underlying income and assets of those investments that are taken into account in determining

our compliance with the income source and quarterly asset diversification requirements. If the Fund does not qualify for and maintain the RIC tax treatment for any reason and is subject to corporate income tax, the resulting corporate taxes could substantially reduce our net assets, the amount of income available for distribution and the amount of our distributions. In addition to potentially paying substantial taxes, we could also be required to recognize unrealized gains and make substantial distributions before re-qualifying as a RIC.

Recognizing Income Before or Without Receiving Cash

For federal income tax purposes, the Fund may be required to recognize taxable income in circumstances in which we do not receive a corresponding payment in cash. For example, if the Fund holds debt obligations that are treated under applicable tax rules as having original issue discount (such as zero-coupon securities, debt instruments with PIK interest or, in certain cases, increasing interest rates or debt instruments that were issued with warrants), the Fund must include in income each year a portion of the original issue discount that accrues over the life of the obligation, regardless of whether cash representing such income is received by us in the same taxable year. The Fund may also have to include in income other amounts that it has not yet received in cash, such as deferred loan origination fees that are paid after origination of the loan or are paid in non-cash compensation such as warrants or stock. A portion of the Fund's income may constitute original issue discount or other income required to be included in taxable income prior to receipt of cash. Any original issue discount, market discount or other amounts accrued will be included in our investment company taxable income for the year of the accrual.

In any such instance, the Fund may be required to make a distribution to our shareholders to satisfy the annual distribution requirement, even though we will not have received any corresponding cash amount. Additionally, if the Fund is required to include amounts from CLO securities in income prior to receiving the cash distributions representing such income, the Fund may have to sell some of its investments at times and/or at prices it would not consider advantageous, raise additional debt or equity capital, or forego new investment opportunities for this purpose. As a result, the Fund may have difficulty meeting the annual distribution requirement necessary to qualify for taxation as a RIC under Subchapter M of the Code. The Fund may have to sell some of our investments at times and/or at prices the Fund would not consider advantageous, raise additional debt or equity capital or forego new investment opportunities for this purpose. If the Fund is not able to obtain cash from other sources, the Fund may not qualify for or maintain RIC tax treatment and thus the Fund may become subject to corporate-level income tax.

Corporate-Level Income Tax

The Fund may invest in certain debt and equity investments through taxable subsidiaries and the taxable income, if any, of these taxable subsidiaries may be subject to federal, state, and/or local tax. The Fund may invest in certain foreign debt and equity investments which could be subject to foreign taxes (such as income tax, withholding and value added taxes).

Special Tax Issues

The Fund may invest in debt securities that are rated below investment grade by rating agencies or that would be rated below investment grade if they were rated. Investments in these types of instruments may present special tax issues for the Fund. U.S. federal income tax rules are not entirely clear about issues such as when the Fund may cease to accrue interest, original issue discount or market discount, when and to what extent deductions may be taken for bad debts or worthless instruments, how payments received on obligations in default should be allocated between principal and income and whether exchanges of debt obligations in a bankruptcy or workout context are taxable. These and other issues will be addressed by the Fund, to the extent necessary, to preserve its status as a RIC and to distribute sufficient income to not become subject to U.S. federal income tax.

Legislative or Regulatory Tax Changes

At any time, the federal income tax laws and underlying U.S. Treasury regulations governing RICs or the administrative interpretations of those tax laws or U.S. Treasury regulations may be amended. Any of those new tax laws, U.S. Treasury regulations or administrative interpretations may take effect retroactively and could adversely affect the taxation of us or our shareholders. Therefore, changes in tax laws, U.S. Treasury regulations or administrative interpretations or any amendments thereto could diminish the value of an investment in our Common Shares or the value or the resale potential of our investments.

HOW THE FUND MANAGES RISK

Hedging and Related Strategies

In order to maximize its defensiveness and flexibility, the Fund may also engage in hedging techniques to manage the level of credit, foreign exchange, interest rate or other risks in the Fund. This hedging can be used through a variety of products, including exchange-traded and over-the-counter derivatives, including futures, options and swaps, such as interest rate swaps, total rate of return swaps, swaptions, and TBA securities, as well as treasuries, options on treasuries, credit derivatives, credit default swaps on single name, asset-backed, mortgage-backed, commercial and corporate indices and currency pairs. The Fund may also enter into currency transactions to provide for the purchase or sale of a currency needed to purchase a security denominated in such currency. In addition, the Fund may enter into forward currency contracts to protect against changes in currency exchange rates, to increase exposure to a particular foreign currency, to shift exposure to currency fluctuations from one currency to another or to seek to increase returns.

When buying or selling credit default swaps, the Fund will maintain appropriate asset coverage up to the full notional value of the credit default swap. Income earned by the Fund from its hedging and related transactions may be subject to one or more special U.S. federal income tax rules that can affect the amount, timing and/or character of distributions to Common Shareholders. For instance, many hedging activities will be treated as capital gain and, if not offset by net realized capital loss, will be distributed to shareholders in taxable distributions. If effectively used, hedging strategies will offset in varying percentages losses incurred on the Fund's investments due to adverse interest rate changes. There is no assurance that these hedging strategies will be available at any time or that the Investment Manager will determine to use them for the Fund or, if used, that the strategies will be successful. The Investment Manager may determine not to engage in hedging strategies or to do so only in unusual circumstances or market conditions.

Investment Limitations

In addition, the Fund has adopted certain investment limitations designed to limit investment risk. See "Investment Restrictions" in the SAI for a description of these limitations.

MANAGEMENT OF THE FUND

Trustees and Officers

The business of the Fund is managed under the direction of the Fund's Board, including oversight of the duties performed by the Investment Manager. The Board is currently composed of four Trustees, all of whom are not "interested persons" of the Fund (as that term is defined by Section 2(a)(19) of the 1940 Act). The Trustees meet periodically throughout the year to discuss and consider matters concerning the Fund and to oversee the Fund's activities, including its investment performance, compliance program and risks associated with its activities. The names and business addresses of the Trustees and officers of the Fund and their principal occupations and other affiliations during the past five years are set forth under "Management of the Fund" in the SAI.

Investment Manager

LibreMax Capital, LLC, a Delaware limited liability company, serves as investment manager to the Fund. Subject to the oversight of the Board, LibreMax is responsible for managing the investment activities of the Fund. Greg Lippmann is responsible for the day-to-day management of the Fund.

LibreMax Capital, LLC, located at 601 Lexington Avenue, 30th Floor New York, New York 10022, is an SEC-registered investment advisory firm formed in 2010 and has been registered with the Securities and Exchange Commission as an investment advisory since 2011. In addition to the Fund, LibreMax currently provides investment advisory services to privately offered pooled investment funds, non-U.S. private investment funds and separately managed accounts. LibreMax Capital, LLC is wholly owned by LibreMax Intermediate Holdings, LP ("LibreMax Holdings"). GKL Holdings, LLC (a holding company that is majority owned by Greg Lippmann) is the principal underlying owner of LibreMax Holdings.

As of December 31, 2025, LibreMax and its affiliates had approximately \$14.32 billion in assets under management.

Investment Management Agreement

Pursuant to an investment management agreement between the Investment Manager and the Fund (the “Investment Management Agreement”), the Fund has agreed to pay the Investment Manager an annual fee, accrued daily and payable monthly, in an amount equal to 1.50% of the Fund’s “Managed Assets.” “Managed Assets” under the Investment Management Agreement means the total value of all assets of the Fund (including any assets attributable to any leverage that is outstanding), less the amount equal to all accrued debts, liabilities and obligations of the Fund (excluding debts, liabilities and obligations representing financial leverage and the aggregate liquidation preference of any outstanding preferred shares). The value of the Fund’s assets for this purpose shall be computed in accordance with the Fund’s policies and procedures for calculating its NAV.

For purposes of calculating “Managed Assets,” the liquidation preference of any preferred shares outstanding is not considered a liability. With respect to any reverse repurchase agreement, or similar transaction, “Managed Assets” includes any proceeds from the sale of an asset of the Fund to a counterparty in such a transaction, in addition to the value of the underlying asset as of the relevant measuring date. Furthermore, to the extent applicable, assets attributable to tender option bonds would be included as assets irrespective of whether or not they are included as assets for financial reporting purposes. However, to the extent the Fund does not contribute municipal bonds to a tender option bond trust but holds residual interests issued by such trust, the tender option bonds outstanding would not be included in the calculation of “Managed Assets.” In addition, for purposes of calculating “total managed assets,” the Fund’s derivative investments will be valued based on their market value.

Because the management fee received by the Investment Manager is based on the average daily managed assets of the Fund, which includes total assets of the Fund (including assets attributable to any reverse repurchase agreements, dollar rolls/buybacks, tender option bonds, borrowings and preferred shares that may be outstanding, if any), the Investment Manager has a financial incentive for the Fund to utilize reverse repurchase agreements, dollar rolls/buybacks, tender option bonds and borrowings or to issue preferred shares, which may create a conflict of interest between the Investment Manager, on the one hand, and Fund shareholders, on the other hand.

The Investment Management Agreement became effective upon the commencement of the Investment Manager’s management of the continuous investment program for the Fund and will continue in effect for an initial two-year term. Thereafter, the Investment Management Agreement continues in effect from year to year provided such continuance is specifically approved at least annually by (i) the vote of a majority of the outstanding voting securities of the Fund or a majority of the Board and (ii) the vote of a majority of the Independent Trustees of the Fund, cast in person at a meeting called for the purpose of voting on such approval. A discussion regarding the basis for the Board’s approval of the Investment Management Agreement will be available in the Fund’s first report to shareholders.

Expense Limitation Agreement

The Investment Manager has contractually agreed, through January 31, 2028, to waive its management fee or reimburse Fund expenses to the extent that the Fund’s total annual operating expenses (excluding any (i) taxes; (ii) brokerage commissions and expenses; (iii) acquired fund fees and expenses (as determined in accordance with SEC Form N-2); (iv) dividend expenses on short sales; (v) transactional costs, including legal costs, accounting costs and broker-dealer expenses, associated with the acquisition, monitoring and disposition of investments (including broken-deal expenses); (vi) loan servicing fees; (vii) fees and expenses in connection with establishing and maintaining leverage including a line of credit, other borrowings or the issuance of preferred shares; (viii) dividend and interest expenses with respect to preferred shares and borrowings; (ix) distribution and shareholder service fees; (x) expenditures which are capitalized in accordance with GAAP and (xi) extraordinary or non-routine expenses (such as expenses incurred in connection with any merger or reorganization, or litigation expenses) exceed 2.50% of the Fund’s average daily net assets (the “Expense Limitation Agreement”). After its initial term, the Expense Limitation Agreement will automatically renew for consecutive one-year terms unless terminated by the Investment Manager or the Fund upon 30 days written notice to other party prior to the end of the then-current term. In addition, the Investment Manager has contractually agreed to further waive its management fee or reimburse Fund expenses (subject to the exclusions detailed above) to the extent that the Fund’s total annual operating expenses: (i) exceed 2.00% of the Fund’s average daily net assets for the one-year period ending on the first anniversary of the effective date of the Expense Limitation Agreement and (ii) exceed 2.25% of the Fund’s average daily net assets for the one-year period ending on the second anniversary of the effective date of the Expense Limitation Agreement.

Under the Expense Limitation Agreement, in any month in which the Investment Management Agreement is in effect, the Investment Manager may recoup from the Fund amounts previously waived or reimbursed during the previous three years from the date of the waiver or reimbursement, provided that such amount paid to the Investment Manager will not cause the Fund's total annual operating expenses (excluding any (i) taxes; (ii) brokerage commissions and expenses; (iii) acquired fund fees and expenses (as determined in accordance with SEC Form N-2); (iv) dividend expenses on short sales; (v) transactional costs, including legal costs, accounting costs and broker-dealer expenses, associated with the acquisition, monitoring and disposition of investments (including broken-deal expenses); (vi) loan servicing fees; (vii) fees and expenses in connection with establishing and maintaining leverage including a line of credit, other borrowings or the issuance of preferred shares; (viii) dividend and interest expenses with respect to preferred shares and borrowings; (ix) distribution and shareholder service fees; (x) expenditures which are capitalized in accordance with GAAP and (xi) extraordinary or non-routine expenses (such as expenses incurred in connection with any merger or reorganization, or litigation expenses subject to the exclusions above) to exceed (i) the expense limit in effect at the time of waiver or reimbursement or (ii) the expense limit in effect at the time of recoupment.

Portfolio Manager

The following individual is primary responsible for managing the Fund and has served as portfolio manager since the inception of the Fund.

Greg Lippmann, CIO/Portfolio Manager. Mr. Lippmann is a Co-Founder, CIO and Portfolio Manager of the Investment Manager. He chairs the Investment Manager's investment committee and is a non-voting member of its risk committee. Prior to co-founding the Investment Manager, Mr. Lippmann was most recently head of all non-agency RMBS, ABS and CDO trading globally at Deutsche Bank, where he led a team of 30 senior professionals in New York and London. Mr. Lippmann began his career at Deutsche Bank as a trader of non-investment grade ABS and RMBS securities. In 2003, he became Global Head of ABS and CDO trading, adding non-agency MBS to his business in late 2008. Prior to joining Deutsche Bank in 2000, Mr. Lippmann was a Director and head of ABS/MBS Subordinate and CDO trading at Credit Suisse, which he joined in 1991. Mr. Lippmann graduated from the University of Pennsylvania in 1991, magna cum laude, with a B.A. in Economics.

Please see the SAI for additional information about other accounts managed by the portfolio manager, the portfolio manager's compensation, and the portfolio manager's ownership of shares of the Fund.

Control Persons

A control person is a person who owns, either directly or indirectly, beneficially more than 25% of the voting securities of a company. Prior to the date of this Prospectus, the Fund had no Common Shares outstanding.

Additional Information

Neither this Prospectus, the Fund's SAI, any contracts filed as exhibits to the Fund's registration statement, nor any other communications or disclosure documents from or on behalf of the Fund creates a contract between a shareholder of the Fund and the Fund, a service provider to the Fund, and/or the Trustees or officers of the Fund. The Fund may amend this Prospectus, the SAI, and any other contracts to which the Fund is a party, and interpret the investment objective, policies, restrictions and contractual provisions applicable to the Fund without shareholder input or approval, except in circumstances in which shareholder approval is specifically required by law (such changes to fundamental investment policies) or where a shareholder approval requirement is specifically disclosed in this Prospectus or the SAI. Nothing in this Prospectus or the SAI limits any rights under federal or state law that cannot be waived.

PRIOR RELATED PERFORMANCE OF THE INVESTMENT MANAGER

The performance below shows a composite of the performance of all of the institutional accounts that were managed by the Investment Manager that had an investment objective, investment strategies and investment policies that are substantially similar to those of the Fund. The Fund has the same investment manager and portfolio manager as the accounts included in the composite. The composite is comprised of four accounts. The performance composite returns are unaudited and are calculated by the Investment Manager on a total return basis. After-tax performance returns are not included. The composite accounts are not registered under the 1940 Act and were not subject to certain investment limitations, diversification requirements, and other restrictions imposed by the 1940 Act and the

Code, which, if applicable, may have adversely affected their performance. The performance of the accounts comprising the composite are not necessarily indicative of the future performance of the Fund.

Average Annual Total Returns¹
(for the periods ended December 31, 2025)

	1 Year	3 Years	Since Inception (September 2, 2021)
Composite Performance	8.10%	10.32%	9.41%
Morningstar LSTA US Leveraged Loan 100 Index	7.24%	9.69%	9.06%
Bloomberg US Aggregate Bond Index	7.30%	4.66%	2.44%

¹ The performance shown is unaudited and net of all fees and expenses, including management fees, incentive fees and brokerage and other commissions. The net of fee returns are shown for the feeder fund with the greater percentage interest in the underlying master fund and reflects the deduction of the highest actual base management fee (an annual rate of 0.75% of the value of the fund's portfolio investments) and incentive-based fee (15% after the application of an 8% hurdle return and full catch-up). Composite returns are based on weighted monthly returns of constituent accounts based on Opening NAV calculated based on the highest rate charge for the onshore feeder fund adjusted for any capital activity occurring in the beginning of the month. Beginning of month activity is activity on or prior to the 15th of the month. Opening NAV is calculated gross of incentive fee and net of all other fees.

Year to date performance from January 1, 2026 through February 28, 2026 was 1.56%.

PLAN OF DISTRIBUTION

Quasar Distributors, LLC, a wholly owned subsidiary of Foreside Financial Group, LLC (dba ACA Group) (the "Distributor") is the principal underwriter and distributor of the Fund's Common Shares pursuant to a distribution agreement (the "Distribution Agreement") with the Fund. The Distributor, located at 190 Middle Street, Suite 301, Portland, Maine 04101, is a broker-dealer registered with the SEC and is a member of the Financial Industry Regulatory Authority.

The Distributor acts as the distributor of Common Shares for the Fund on a best-efforts basis (meaning the Distributor shall use commercially reasonable efforts to distribute the Shares), subject to various conditions, pursuant to the terms of the Distribution Agreement. The Distributor is not obligated to sell any specific amount of Common Shares of the Fund.

Common Shares of the Fund are continuously offered through the Distributor. As discussed below, the Fund may authorize one or more intermediaries (e.g., broker-dealers and other financial firms) to receive orders on its behalf. The Common Shares will be offered at NAV per share (plus any applicable sales charge) calculated each regular business day. Please see "How Fund Shares are Priced" below.

The Fund and the Distributor each reserve the right, in their sole discretion, to suspend the offering of shares of the Fund or to reject any purchase order, in whole or in part, when, in the judgment of management, such suspension or rejection is in the best interests of the Fund or for other reasons such as compliance with anti-money laundering or sanctions obligations and requirements.

The Fund generally does not offer or sell its shares outside of the United States, except to certain investors in approved jurisdictions and in conformity with local legal requirements.

Common Shares are not listed for trading on any securities exchange. There is currently no secondary market for the Common Shares and the Fund does not anticipate that a secondary market will develop for its Common Shares. Investors should consider Common Shares of the Fund to be an illiquid investment. Neither the Investment Manager nor the Distributor intends to make a market in the Common Shares.

The Distribution Agreement became effective upon the Distributor's commencement of services as the principal underwriter of the Fund for the distribution of Shares of the Fund and will continue in effect for an initial two-year term. Thereafter, the Distribution Agreement continues in effect from year to year provided such continuance is specifically approved at least annually by (i) the vote of a majority of the outstanding voting

securities of the Fund or a majority of the Board and (ii) the vote of a majority of the Independent Trustees of the Fund, cast in person at a meeting called for the purpose of voting on such approval.

The Fund has agreed to indemnify the Distributor and certain of the Distributor's affiliates against certain liabilities, including certain liabilities arising under the 1933 Act. To the extent consistent with applicable law, the Distributor has agreed to indemnify the Fund and each Trustee against certain liabilities, including certain liabilities under the 1933 Act and in connection with the services rendered to the Fund.

Share Classes

The Fund has received an exemptive order from the SEC that permits the Fund to issue multiple classes of its shares and to impose distribution and shareholder servicing fees. The Fund has adopted a multiple class plan pursuant to Rule 18f-3 under the 1940 Act. Although the Fund is not an open-end investment company, it will undertake to comply with the terms of Rule 18f-3 as a condition of the exemptive relief. Under the multiple class plan, shares of each class of the Fund represent an equal pro rata interest in the Fund and, generally, have identical voting, dividend, liquidation, and other rights, preferences, powers, restrictions, limitations, qualifications and terms and conditions, except that: (a) each class has a different designation; (b) each class of shares bears any class-specific expenses; and (c) each class shall have separate voting rights on any matter submitted to shareholders in which the interests of one class differ from the interests of any other class, and shall have exclusive voting rights on any matter submitted to shareholders that relates solely to that class.

The Fund currently offers Class I Common Shares. The Fund intends to offer Class A and Class L Common Shares in the future. Each share class represents an investment in the same portfolio of investments, but each class has its own expense structure and arrangements for shareholder services or distribution, which allows you to choose the class that best fits your situation and eligibility requirements.

Class A Common Shares: The minimum initial investment is \$10,000 per account.

Class I Common Shares: The minimum initial investment is \$100,000 per account.

Class L Common Shares: The minimum initial investment is \$50,000 per account.

Distribution and Service Plan

The Fund has adopted a plan pursuant to Rule 12b-1 for the Fund's Class A Common Shares and Class L Common Shares that would allow the Fund to pay fees for the sale, distribution and servicing of its Class A Common Shares and Class L Common Shares (the "Distribution and Service Plan"). The Distribution and Service Plan provides for a distribution and shareholder servicing fee of up to 0.75% of the Class A Common Shares' average daily net assets (0.25% is characterized as a "shareholder service fee" and the remaining portion is characterized as a "distribution fee") and up to 0.25% of the Class L Common Shares' average daily net assets. Because these fees are paid out over the life of the Fund's Class A Common Shares and Class L Common Shares, over time, these fees (to the extent they are accrued and paid) would increase the cost of your investment and may cost you more than paying other types of sales charges. Class I Common Shares of the Fund are not subject to the distribution and shareholder servicing fee.

The Fund has policies and procedures in place for the monitoring of payments to broker-dealers and other financial intermediaries for distribution-related and non-distribution activities such as sub-transfer agent, administrative, and other shareholder servicing services.

Additional Payments to Dealers

If you purchase Common Shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund Common Shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Class I and Class L Common Shares may also be available on brokerage platforms of firms that have agreements with the Fund's distributor to offer such Common Shares solely when acting as an agent for the investor. An investor transacting in these programs may be required to pay a commission and/or other forms of compensation to the broker. Ask your salesperson or visit your financial intermediary's website for more information.

Service Fees – Other Payments to Third Parties

The Investment Manager, out of its own resources, and without additional cost to the Fund or its shareholders, may provide additional cash payments or non-cash compensation to intermediaries who sell Common Shares of the Fund. Such payments and compensation are in addition to Rule 12b-1 distribution and shareholder servicing fees paid by the Fund. These additional cash payments are generally made to intermediaries that provide shareholder servicing, marketing support and/or access to sales meetings, sales representatives and management representatives of the intermediary. Cash compensation may also be paid to intermediaries for inclusion of the Fund on a sales list, in other sales programs or as an expense reimbursement in cases where the intermediary provides shareholder services to the Fund's shareholders. The Investment Manager may also pay cash compensation in the form of finder's fees that vary depending on the dollar amount of the Common Shares sold.

Purchasing Shares

The following section provides basic information about how to purchase Common Shares of the Fund. The Fund typically does not offer or sell its shares to non-U.S. residents. For purposes of this policy, a U.S. resident is defined as an account with (i) a U.S. address of record and (ii) all account owners residing in the U.S. at the time of sale.

The Fund and the Distributor each reserve the right, in their sole discretion, to suspend the offering of shares of the Fund or to reject any purchase order, in whole or in part, when, in the judgment of management, such suspension or rejection is in the best interests of the Fund or for other reasons such as compliance with anti-money laundering or sanctions obligations and requirements.

In the interest of economy and convenience, certificates for shares will not be issued.

Class A, Class I and Class L Common Shares. Eligible investors may purchase Class A, Class I or Class L Common Shares in the following ways:

Through your broker-dealer or other financial firm. Common Shares may be offered through certain financial firms that charge their customers transaction or other fees with respect to their customers' investments in the Fund. Your broker-dealer or other financial firm may establish higher or lower minimum investment requirements than the Fund and may also independently charge you transaction or other fees and additional amounts (which may vary) in return for its services, which will reduce your return. Shares you purchase through your broker-dealer or other financial firm will normally be held in your account with that firm. If you purchase shares through a broker-dealer or other financial firm, instructions for buying, selling, exchanging or transferring Common Shares must be submitted by your financial firm or broker-dealer on your behalf.

Through the Distributor. You should discuss your investment with your financial advisor before you make a purchase to be sure the Fund is appropriate for you. Individual investors who meet the minimum investment amount and wish to invest directly in Common Shares may obtain an Account Application online at www.libremax.com or by calling 1-855-965-5812.

The completed Account Application may be submitted using the following methods:

Overnight Mail:

LibreMax Asset-Backed Income Fund
c/o U.S. Bank Global Fund Services
801 Pennsylvania Avenue, Suite 219252
Kansas City, Missouri 64105-1307

Regular Mail:

LibreMax Asset-Backed Income Fund
c/o U.S. Bank Global Fund Services
PO Box 219252
Kansas City, Missouri 64121-9252

For inquiries, please call 1-855-965-5812.

Payment for the purchase of Common Shares may be made by check payable to LibreMax Asset-Backed Income Fund and sent to the Regular Mail address above; or by wiring federal funds to:

LibreMax Asset-Backed Income Fund
Attn: U.S. Bancorp Fund Services, LLC
ABA #091000022
Account #167503973783
Account Name: U.S. Bancorp Fund Services, LLC; FBO LibreMax Asset-Backed Income Fund
FBO: (Insert Investor Name)

Before wiring federal funds, the investor must provide order instructions to the transfer agent by calling 1-855-965-5812. In order to receive the current day's NAV, order instructions must be received in good order prior to the close of regular trading on the New York Stock Exchange ("NYSE") (ordinarily 4:00 p.m., Eastern time) ("NYSE Close"). Instructions must include the name and signature of an appropriate person designated on the Account Application ("Authorized Person"), account name, account number, name of the Fund and dollar amount. Payments received without order instructions could result in a processing delay or a return of wire. Failure to send the accompanying payment on the same day may result in the cancellation of the order.

An investor may place a purchase order for Common Shares without first wiring federal funds if the purchase amount is to be derived from an advisory account managed by the Investment Manager or one of its affiliates, or from an account with a broker-dealer or other financial firm that has established a processing relationship with the Fund on behalf of its customers.

Investment Minimums

For Class A Common Shares, the minimum initial investment is \$10,000 and no minimum for subsequent investments. For Class I Common Shares, the minimum initial investment is \$100,000 and no minimum for subsequent investments. For Class L Common Shares, the minimum initial investment is \$50,000 and no minimum for subsequent investments.

Sales Charges

Class A Common Shares in the Fund are offered at their current net asset value plus a maximum sales charge of 3.00%.

Exchanging Shares

To the extent that an investor becomes eligible for another share class, the shares of each class are exchangeable for each other class.

Signature Validation

When a signature validation is called for, a Medallion signature guarantee or Signature validation program ("SVP") stamp may be required. A Medallion signature guarantee is intended to provide signature validation for transactions considered financial in nature, and an SVP stamp is intended to provide signature validation for transactions non-financial in nature. In certain situations, a notarized signature may be used instead of a Medallion signature guarantee or an SVP stamp. A Medallion signature guarantee or SVP stamp may be obtained from a domestic bank or trust company, broker, dealer, clearing agency, savings association or other financial institution which is participating in a Medallion program or SVP recognized by the Securities Transfer Association. When a Medallion signature guarantee or SVP stamp is required, signature validations from financial institutions which are not participating in one of these programs will not be accepted. Please note that financial institutions participating in a recognized Medallion program may still be ineligible to provide a signature validation for transactions of greater than a specified dollar amount. The Fund may change the signature validation requirements from time to time upon notice to shareholders, which may be given by means of a new or supplemented prospectus. Shareholders should contact the Fund for additional details regarding the Fund's signature validation requirements.

In addition, corporations, trusts, and other institutional organizations are required to furnish evidence of the authority of the persons designated on the Account Application to effect transactions for the organization.

Request for Multiple Copies of Shareholder Documents

To reduce expenses, it is intended that only one copy of the Fund's prospectus and each annual and semi-annual report or notice of availability, when available, will be mailed to those addresses shared by two or more accounts. If you wish to receive individual copies of these documents and your shares are held directly with the Fund, call the Fund at 1-855-965-5812. You will receive the additional copy within 30 days after receipt of your request by the Fund. Alternatively, if your shares are held through a financial institution, please contact the financial institution directly.

Acceptance and Timing of Purchase Orders

Common Shares may be purchased at a price equal to their NAV per share, plus any applicable sales charge, next determined after receipt of an order. Under normal circumstances, all purchase orders received by the Fund or its designee prior to the NYSE Close on a regular business day are processed at that day's offering price. An order received after the NYSE Close will be effected at the offering price determined on the next business day. However, orders received by the Fund or its designee after the offering price is determined that day from financial firms or certain retirement plans will receive such offering price if the orders were received by the financial firm or retirement plan from its customer or participant prior to such offering price determination and were transmitted to and received by the Fund or its designee prior to such time as agreed upon in accordance with an agreement or as allowed by applicable law. Purchase orders will be accepted only on days on which the Fund is open for business. The Fund is "open for business" on each day the NYSE is open for trading, which excludes the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. On any day that regular trading on the NYSE closes earlier than scheduled, the Fund reserves the right to: (i) advance the time as of which the NAV is calculated and, therefore, the time by which purchase orders must be received to receive that day's NAV or (ii) accept purchase orders until, and calculate its NAV as of, the normally scheduled NYSE Close. On any day that the NYSE is closed when it would normally be open for business, the Fund may accept purchase orders until, and calculate its NAV as of, the normally scheduled close of regular trading on the NYSE or such other time that the Fund may determine.

The Fund reserves the right to close if the primary trading markets of the Fund's portfolio instruments are closed and the Fund's management believes that there is not an adequate market to meet purchase requests. On any business day when the Securities Industry and Financial Markets Association recommends that the securities markets close trading early, the Fund may close trading early. Purchase orders will be accepted only on days which the Fund is open for business.

Broker-dealers and other financial firms are obligated to transmit purchase orders promptly. The Fund and the Distributor each reserve the right, in their sole discretion, to suspend the offering of shares of the Fund or to reject any purchase order, in whole or in part, when, in the judgment of management, such suspension or rejection is in the best interests of the Fund or for other reasons such as compliance with anti-money laundering or sanctions obligations and requirements. The sale of Common Shares may be suspended during any period in which the NYSE is closed other than weekends or holidays, or if permitted by the rules of the SEC, when trading on the NYSE is restricted or during an emergency which makes it impracticable for the Fund to dispose of its securities or to determine fairly the value of its net assets, or during any other period as permitted by the SEC for the protection of investors.

INFORMATION REGARDING STATE ESCHEATMENT LAWS

It is important that the Fund maintain a correct address for each direct shareholder. An incorrect address may cause a direct shareholder's account statements and other mailings to be returned to the Fund. Closed-end fund accounts can be considered abandoned property. States increasingly are looking at inactive closed-end fund accounts as possible abandoned or unclaimed property. Under certain circumstances, the Fund (or the broker or custodian of record having beneficial owner information) may be legally obligated to escheat (or transfer) an investor's account to the appropriate state's unclaimed property administrator. The Fund will not be liable to investors or their representatives for good-faith compliance with state unclaimed or abandoned property (escheatment) laws.

Escheatment laws vary by state, and states have different criteria for defining inactivity and abandoned property. Generally, a closed-end account may be subject to "escheatment" (i.e., considered to be abandoned or

unclaimed property) if the account owner has not initiated any activity in the account or contacted the Fund for an “inactivity period” as specified in applicable state laws. Typically, an investor’s last known address of record determines the state that has jurisdiction. The process described above, and the application of state escheatment laws, may vary depending on how shareholders hold their shares in the Fund. If your shares are held directly with the Fund, please proactively contact the Fund’s transfer agent at 1-855-965-5812 at least annually to ensure your account remains in active status. Alternatively, if your shares are held through a financial institution, please work with your financial institution directly to check your account status.

VERIFICATION OF IDENTITY AND COMPLIANCE WITH ECONOMIC SANCTIONS AND ANTI-MONEY LAUNDERING LAWS

To help the federal government combat the funding of terrorism and money laundering activities, federal law generally requires all financial institutions to obtain, verify and record information that identifies each person (and natural person beneficial owners, if applicable) that opens a new account, and to determine whether such person’s (or natural person beneficial owner’s) name appears on government lists of known or suspected terrorists and terrorist organizations. As a result, unless there is an applicable exception or exemption, the Fund must obtain the following information for each person (or natural person beneficial owner, if applicable) that opens a new account:

- Name;
- Date of birth (for individuals);
- Residential or business street address; and
- Social Security number, taxpayer identification number, or other identifying number.

Individuals may also be asked for a copy of their driver’s license, passport or other identifying document in order to verify their identity. In addition, it may be necessary to verify an individual’s identity by cross-referencing the identification information with a consumer report or other electronic database. Additional information may be required to open accounts for corporations and other entities, and the Fund or its affiliates or agents may request information about the investor’s source of funds and source of wealth before permitting investment in the Fund.

After an account is opened, the Fund may restrict your ability to purchase additional Common Shares until your identity is verified and all other requested information is provided to the Fund’s satisfaction. The Fund also may close or freeze your account and redeem your shares or take other appropriate action if it is unable to verify your identity or obtain other requested information within a reasonable time at any point in the lifecycle of the account.

The Fund and its affiliates are subject to various anti-money laundering laws in addition to those set forth above, as well as laws that restrict them from dealing with entities, individuals, organizations and/or investments that are subject to applicable sanctions regimes. Each investor acknowledges that (i) if the Fund or its affiliates or agents reasonably believes that such investor (or any of its underlying beneficial owners) is the subject or target of relevant economic or trade sanctions programs or has used proceeds of crime to fund their investment, (ii) if the investor fails to provide information to the Fund or its affiliates or agents for purposes of assessing the Fund’s compliance with economic or trade sanctions or anti-money laundering laws, or (iii) if otherwise required by applicable law or regulation, the Fund or its affiliates or agents may, in their sole discretion, undertake appropriate actions to ensure compliance with applicable law or regulations, including but not limited to freezing, segregating or redeeming such investor’s subscription in the Fund and/or making disclosures to appropriate regulators. In this event, the affected investor shall have no claim against the Fund or any of its affiliates or agents, for any form of damages that result from any such actions.

PERIODIC REPURCHASE OFFERS

The Fund is a closed-end interval fund and, to provide liquidity and the ability to receive NAV on a disposition of at least a portion of your Common Shares, will make periodic offers to repurchase Common Shares. No shareholder will have the right to require the Fund to repurchase its Common Shares, except as permitted by the Fund’s interval structure. No public market for the Common Shares exists, and none is expected to develop in the

future. Consequently, shareholders will not be able to liquidate their investment other than as a result of repurchases of their Common Shares by the Fund, and then only on a limited basis.

The Fund has adopted, pursuant to Rule 23c-3 under the 1940 Act, a fundamental policy, which cannot be changed without shareholder approval, requiring the Fund to offer to repurchase at least 5% and up to 25% of its Common Shares at NAV on a regular schedule. Although the policy permits repurchase of between 5% and 25% of the Fund's outstanding Common Shares, for each quarterly repurchase offer, the Fund currently expects to offer to repurchase 5% of the Fund's outstanding Common Shares at NAV subject to approval of the Board. The Board will consider such factors as it deems relevant including the Investment Manager's views, liquidity of the portfolio and investor demand in considering whether the level or repurchase. The schedule requires the Fund to make repurchase offers every three months.

If a repurchase offer is oversubscribed, the Fund may, but is not required to, determine to increase the amount repurchased by up to 2% of the Fund's outstanding shares as of the date of the Repurchase Request Deadline. In the event that the Fund determines not to repurchase more than the repurchase offer amount, or if shareholders tender more than the repurchase offer amount plus 2% of the Fund's outstanding shares as of the date of the Repurchase Request Deadline, the Fund will repurchase the Common Shares tendered on a pro rata basis, and shareholders will have to wait until the next repurchase offer to make another repurchase request. As a result, shareholders may be unable to liquidate all, or a given percentage of, their investment in the Fund during a particular repurchase offer. Some shareholders, in anticipation of proration, may tender more Common Shares than they wish to have repurchased in a particular quarter, thereby increasing the likelihood that proration will occur.

Quarterly repurchases by the Fund of its Common Shares typically will be funded from available cash. However, repurchase offers and the need to fund repurchase obligations may affect the ability of the Fund to be fully invested or force the Fund to maintain a higher percentage of its assets in liquid investments, which may harm the Fund's investment performance. In addition, the Fund may be required to sell portfolio securities (including at inopportune times) to satisfy repurchase requests, resulting in increased transaction costs that the Fund and its shareholders must bear. The sale of Fund assets to satisfy repurchase requests may also result in higher short-term capital gains for taxable shareholders. Furthermore, a diminution in the Fund's size may limit the Fund's ability to participate in new investment opportunities or achieve its investment objective. If the Fund borrows money to finance repurchases, interest on that borrowing will negatively affect shareholders who do not tender their Shares by increasing Fund expenses and reducing any net investment income.

In the event that the Investment Manager holds Common Shares in its capacity as a Shareholder, such Shares may be tendered for repurchase in connection with any repurchase offer made by the Fund, without notice to Shareholders.

Please also see "Repurchase Offer Risk" at page 45.

Repurchase Dates

The Fund will make quarterly repurchase offers. Subject to Board approval, Repurchase Request Deadlines are expected to occur each January, April, July, and October, and Repurchase Offer Notices are expected to be sent to shareholders each December, March, June, and September preceding each such Repurchase Request Deadline. As discussed below, the date on which the repurchase price for Common Shares is determined will occur no later than the 14th day after the Repurchase Request Deadline (or the next business day, if the 14th day is not a business day). A repurchase schedule setting forth each of these dates for the Fund's current calendar year is available on the Fund's website at www.libremax.com.

Repurchase Request Deadline

The date by which shareholders wishing to tender Common Shares for repurchase must respond to the repurchase offer will be no more than 14 days before the Repurchase Pricing Date (defined below). When a repurchase offer commences, the Fund sends, at least 21 days and no more than 42 days before the Repurchase Request Deadline, written notice to each shareholder setting forth, the following, among other things:

- The percentage of outstanding Common Shares that the Fund is offering to repurchase and how the Fund will purchase Common Shares on a pro rata basis if the offer is oversubscribed.

- The date on which a shareholder's repurchase request is due.
- The date that will be used to determine the Fund's NAV applicable to the repurchase offer (the "Repurchase Pricing Date").
- The date by which the Fund will pay to shareholders the proceeds from their Common Shares accepted for repurchase.
- The NAV of the Common Shares as of a date no more than seven days before the date of the written notice and how shareholders may ascertain the NAV.
- The procedures by which shareholders may tender their Common Shares and the right of shareholders to withdraw or modify their tenders before the Repurchase Request Deadline.
- The circumstances in which the Fund may suspend or postpone the repurchase offer.

This notice may be included in a shareholder report or other Fund document. Shareholders that hold Common Shares through a financial intermediary will need to ask their financial intermediary to submit their repurchase requests and tender shares on their behalf. **The Repurchase Request Deadline will be strictly observed. There is a risk that the Fund's NAV will fluctuate between the Repurchase Request Deadline and the Repurchase Pricing Date.** If a shareholder's repurchase request is not submitted to the Fund's transfer agent in properly completed form by the Repurchase Request Deadline, the shareholder will be unable to sell his or her shares to the Fund until a subsequent repurchase offer, and the shareholder's request for that offer must be resubmitted. If a shareholder's authorized intermediary will submit his or her repurchase request, the shareholder should submit his or her request to the Authorized Intermediary in the form requested by the Authorized Intermediary sufficiently in advance of the Repurchase Request Deadline to allow the Authorized Intermediary to submit the request to the Fund. If a shareholder's Authorized Intermediary is unable or fails to submit the shareholder's request to the Fund in a timely manner, or if the shareholder fails to submit his or her request to the shareholder's Authorized Intermediary, the shareholder will be unable to sell his or her shares to the Fund until a subsequent repurchase offer, and the shareholder's request for that offer must be resubmitted.

Shareholders may withdraw or change a repurchase request with a proper instruction submitted in good form at any point before the Repurchase Request Deadline.

Determination of Repurchase Price and Payment for Shares

The Repurchase Pricing Date will occur no later than the 14th day after the Repurchase Request Deadline (or the next business day, if the 14th day is not a business day). The Fund expects to distribute payment to shareholders within three (3) business days after the Repurchase Pricing Date and will distribute such payment in settlement of the Fund's repurchase of shares no later than seven (7) calendar days after such Repurchase Pricing Date. The Fund's NAV per share may change materially between the date a repurchase offer is mailed and the Repurchase Request Deadline, and it may also change materially between the Repurchase Request Deadline and Repurchase Pricing Date. The method by which the Fund calculates NAV is discussed below under "How Fund Shares are Priced." During the period an offer to repurchase is open, shareholders may obtain the current NAV by calling the Fund's transfer agent at 1-855-965-5812.

Suspension or Postponement of Repurchase Offers

The Fund may suspend or postpone a repurchase offer in limited circumstances set forth in Rule 23c-3 under the 1940 Act, as described below, but only with the approval of a majority of the Trustees, including a majority of Trustees who are not "interested persons" of the Fund, as defined in the 1940 Act. The Fund may suspend or postpone a repurchase offer as may be permitted under Rule 23c-3, including (but not limited to): (1) if making or effecting the repurchase offer would cause the Fund to lose its status as a RIC under Subchapter M of the Code; (2) for any period during which the NYSE or any other market in which the securities owned by the Fund are principally traded is closed, other than customary weekend and holiday closings, or during which trading in such market is restricted; (3) for any period during which an emergency exists as a result of which disposal by the Fund of securities owned by it is not reasonably practicable, or during which it is not reasonably practicable for the Fund fairly to determine the value of its net assets; or (4) for such other periods as the SEC may by order permit for the protection of shareholders of the Fund.

Oversubscribed Repurchase Offers

There is no minimum number of Common Shares that must be tendered before the Fund will honor repurchase requests. The Fund intends to make quarterly offers to repurchase between 5% and 25% of its outstanding Common Shares at NAV per share. Subject to applicable law and approval of the Board, for each quarterly repurchase offer the Fund currently expects to offer to repurchase 5% of the Fund's then outstanding Common Shares. In the event a repurchase offer by the Fund is oversubscribed, the Fund may repurchase, but is not required to repurchase, additional Common Shares up to a maximum amount of 2% of the outstanding Common Shares of the Fund. If the Fund determines not to repurchase additional Common Shares beyond the repurchase offer amount, or if shareholders tender an amount of Common Shares greater than that which the Fund is entitled to repurchase, the Fund will repurchase the Common Shares tendered on a pro rata basis. However, the foregoing will not prohibit the Fund from accepting all Common Shares tendered for repurchase by shareholders who own less than one hundred (100) Common Shares and who tender all of their Common Shares, before prorating Common Shares tendered by other shareholders; provided that if a shareholder holds his or her shares through an Authorized Intermediary, such shareholder's Authorized Intermediary may not be willing or able to arrange for this treatment on the shareholder's behalf.

If any Common Shares that you wish to tender to the Fund are not repurchased because of proration, you will have to wait until the next repurchase offer and resubmit a new repurchase request, and your repurchase request will not be given any priority over other shareholders' requests. Thus, there is a risk that the Fund may not purchase all Common Shares you wish to have repurchased in a given repurchase offer or in any subsequent repurchase offer. In anticipation of the possibility of proration, some shareholders may tender more Common Shares than they wish to have repurchased in a particular quarter, increasing the likelihood of proration.

There is no assurance that you will be able to tender your Common Shares when or in the amount that you desire.

HOW FUND SHARES ARE PRICED

The NAV of the Common Shares will be determined by dividing the total value of the Fund's portfolio investments and other assets, less any liabilities, by the total number of shares outstanding.

On each day that the NYSE is open, the Common Shares will be ordinarily valued as of the NYSE Close. Information that becomes known to the Fund or its agents after the time as of which NAV has been calculated on a particular day will not generally be used to retroactively adjust the price of a security or the NAV determined earlier that day. If regular trading on the NYSE closes earlier than scheduled, the Fund may calculate its NAV as of the earlier closing time or calculate its NAV as of the normally scheduled close of regular trading on the NYSE for that day. The Fund generally will not calculate its NAV on days on which the NYSE is not open for business. If the NYSE is closed on a day it would normally be open for business, the Fund may calculate its NAV as of the normally scheduled NYSE Close or such other time that the Fund may determine.

For purposes of calculating NAV, portfolio securities and other assets for which market quotations are readily available are valued at market value. A market quotation is readily available only when that quotation is a quoted price (unadjusted) in active markets for identical investments that the Fund can access at the measurement date, provided that a quotation will not be readily available if it is not reliable. Market value is generally determined on the basis of official closing prices or the last reported sales prices.

Investments for which market quotations are not readily available are valued at fair value as determined in good faith pursuant to Rule 2a-5 under the 1940 Act. As a general principle, the fair value of a security or asset is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Pursuant to Rule 2a-5, the Board has designated the Investment Manager as the Valuation Designee ("Valuation Designee") for the Fund to perform the fair value determination relating to all Fund investments. The Investment Manager may carry out its designated responsibilities as Valuation Designee through various teams and committees. The Valuation Designee's policies and procedures govern the Valuation Designee's selection and application of methodologies for determining and calculating the fair value of Fund investments. The Valuation Designee may value Fund portfolio securities for which market quotations are not readily available and other Fund assets utilizing inputs from pricing services, quotation reporting systems, valuation agents and other third-party sources (together, "Pricing Sources").

Domestic fixed income securities and non-exchange-traded derivatives are normally valued on the basis of quotes obtained from brokers and dealers or Pricing Sources using data reflecting the earlier closing of the principal markets for those securities. Prices obtained from Pricing Sources may be based on, among other things, information provided by market makers or estimates of market values obtained from yield data relating to investments or securities with similar characteristics. Certain fixed income securities purchased on a delayed-delivery basis are marked to market daily until settlement at the forward settlement date. Exchange-traded options, futures and options on futures are valued at the settlement price determined by the relevant exchange. Swap agreements are valued on the basis of bid quotes obtained from brokers and dealers or market-based prices supplied by Pricing Sources. With respect to any portion of the Fund's assets that are invested in one or more open-end management investment companies (other than exchange-traded funds), the Fund's NAV will be calculated based upon the NAVs of such investments.

Investments valued in currencies other than the U.S. dollar are converted to the U.S. dollar using exchange rates obtained from Pricing Sources. As a result, the value of such investments and, in turn, the NAV of the Fund's shares may be affected by changes in the value of currencies in relation to the U.S. dollar. The value of investments traded in markets outside the United States or denominated in currencies other than the U.S. dollar may be affected significantly on a day that the Fund is not open for business. As a result, the value of the Fund's foreign (non-U.S.) investments may change at times when shareholders are unable to buy or sell shares and the value of such investments will be reflected in the Fund's next calculated NAV.

Fair valuation may require subjective determinations about the value of a security. While the Fund's and Valuation Designee's policies and procedures are intended to result in a calculation of the Fund's NAV that fairly reflects security values as of the time of pricing, the Fund cannot ensure that fair values accurately reflect the price that the Fund could obtain for a security if it were to dispose of that security as of the time of pricing (for instance, in a forced or distressed sale). The prices used by the Fund may differ from the value that would be realized if the securities were sold.

DISTRIBUTIONS

The Fund currently intends to declare income dividends quarterly and distribute them to its Common Shareholders quarterly, which may be rates that reflect past and projected net income of the Fund. Subject to applicable law, the Fund may fund a portion of its distributions with gains from the sale of portfolio securities and other sources. The dividend rate that the Fund pays on its Common Shares may vary as portfolio and market conditions change, and will depend on several factors, including without limitation the amount of the Fund's undistributed net investment income and net short- and long-term capital gains. The rate of distributions on the Common Shares and the Fund's dividend policy could change based on several factors, including the amount of the Fund's undistributed net investment income and historical and projected investment income. For a discussion of factors that may cause the Fund's income and capital gains (and therefore the dividend) to vary, see "Principal Risks of the Fund." The Fund intends to distribute each year substantially all its net investment income and net short-term capital gains. In addition, at least annually, the Fund intends to distribute net realized long-term capital gains not previously distributed, if any. The net investment income of the Fund consists of all income (other than net short-term and long-term capital gains) less all expenses of the Fund. The Fund's distribution rates may be based, in part, on projections as to annual cash available for distribution and, therefore, the distributions paid by the Fund for any quarter may be more or less than the amount of cash available to the Fund for distribution for that quarterly period.

The Fund may distribute less than the entire amount of net investment income earned in a particular period. The undistributed net investment income would be available to supplement future distributions. As a result, the distributions paid by the Fund for any quarterly period may be more or less than the amount of net investment income earned by the Fund during the period. Undistributed net investment income will be added to the Fund's NAV and, correspondingly, distributions from undistributed net investment income will be deducted from the Fund's NAV. To the extent that distributions exceed available cash flow, the Fund may need to sell securities or borrow funds temporarily to fund such distributions which would result in additional costs to the Fund.

The tax treatment and characterization of the Fund's distributions may vary significantly from time to time because of the varied nature of the Fund's investments. If the Fund estimates that a portion of one of its dividend distributions may be comprised of amounts from sources other than net investment income in accordance with its internal policies, accounting records and related accounting practices, the Fund will notify shareholders of record of

the estimated composition of such distribution through a Section 19 Notice. For these purposes, the Fund estimates the source or sources from which a distribution is paid, to the close of the period as of which it is paid, in reference to its internal accounting records and related accounting practices. If, based on such accounting records and practices, it is estimated that a particular distribution does not include capital gains or paid-in surplus or other capital sources, a Section 19 Notice generally would not be issued. It is important to note that differences exist between the Fund's daily internal accounting records and practices, the Fund's financial statements presented in accordance with U.S. GAAP, and recordkeeping practices under the U.S. Treasury regulations. For instance, the Fund's internal accounting records and practices may consider, among other factors, tax-related characteristics of certain sources of distributions that differ from treatment under U.S. GAAP. Examples of such differences may include, among others, the treatment of paydowns on mortgage-backed securities purchased at a discount and periodic payments under interest rate swap contracts. Accordingly, among other consequences, it is possible that the Fund may not issue a Section 19 Notice in situations where the Fund's financial statements prepared later and in accordance with U.S. GAAP and/or the final tax character of those distributions might later report that the sources of those distributions included capital gains and/or a return of capital.

The tax characterization of the Fund's distributions made in a taxable year cannot finally be determined until at or after the end of the year. As a result, there is a possibility that the Fund may make total distributions during a taxable year in an amount that exceeds the Fund's net investment income and net realized capital gains (as reduced by any capital loss carryforwards) for the relevant year. For example, the Fund may distribute amounts early in the year that are derived from short-term capital gains but incur net short-term capital losses later in the year, thereby offsetting short-term capital gains out of which distributions have already been made by the Fund. Additionally, the Fund's distributions may be funded from unlimited amounts of offering proceeds or borrowings, which may constitute a return of capital and reduce the amount of capital available to the Fund for investment. In such situations, the amount by which the Fund's total distributions exceed net investment income and net realized capital gains would generally be treated first as a tax-free return of capital up to the amount of a shareholder's tax basis in his or her Common Shares, with any amounts exceeding such basis treated as gain from the sale of Common Shares. In general terms, a return of capital would occur where a Fund distribution (or portion thereof) represents a return of a portion of your investment, rather than net income or capital gains generated from your investment during a particular period. A return of capital is not taxable, but it reduces a shareholder's tax basis in the Common Shares, thus reducing any capital loss or increasing any capital gain on a subsequent taxable disposition by the shareholder of the Common Shares. Any capital returned to Shareholders through distributions will be distributed after payment of fees and expenses. The Fund will send shareholders detailed tax information with respect to the Fund's distributions annually. See "Tax Matters."

The 1940 Act currently limits the number of times the Fund may distribute long-term capital gains in any taxable year, which may increase the variability of the Fund's distributions and result in certain distributions being comprised more or less than others of long-term capital gains currently eligible for favorable income tax rates.

Unless a Common Shareholder elects to receive distributions in cash, all distributions of Common Shareholders whose shares are registered with the plan agent will be automatically reinvested in additional Common Shares under the Plan. See "Dividend Reinvestment Plan."

The Board may change the Fund's distribution policy and the amount or timing of distributions, based on several factors, including the amount of the Fund's undistributed net investment income and net short- and long-term capital gains and historical and projected net investment income and net short- and long-term capital gains.

DIVIDEND REINVESTMENT PLAN

Pursuant to the Dividend Reinvestment Plan, all common shareholders of the Fund will have all dividends, including any capital gain dividends, reinvested automatically in additional Common Shares by U.S. Bank Global Fund Services as agent for such shareholders (the "Plan Agent"), unless the shareholder elects to receive cash. An election to receive cash may be revoked or reinstated at the option of the shareholder. In the case of record shareholders such as banks, brokers or other nominees that hold Common Shares for others who are the beneficial owners, the Plan Agent will administer the Dividend Reinvestment Plan on the basis of the number of Common Shares certified from time to time by the record shareholder as representing the total amount registered in such shareholder's name and held for the account of beneficial owners who are to participate in the Dividend Reinvestment Plan. Shareholders whose shares are held in the name of a bank, broker or nominee should contact the

bank, broker, or nominee for details. Shareholders that participate in the Dividend Reinvestment Plan in a brokerage account may not be able to transfer the Common Shares to another broker and continue to participate in the Dividend Reinvestment Plan. Pursuant to the Dividend Reinvestment Plan, the Fund's dividends to shareholders are reinvested in full and fractional Common Shares as described below.

The number of Common Shares to be received when dividends are reinvested will be determined by dividing the amount of the dividend by the Fund's NAV per share as of the date of such dividend. Common Shares received under the Dividend Reinvestment Plan will be issued to you at their NAV on the ex-dividend date; there is no sales or other charge for reinvestment. You are free to withdraw from the Dividend Reinvestment Plan and elect to receive cash at any time by giving written notice to the Plan Agent or by contacting your broker or dealer, who will inform the Fund. Your request must be received by the Fund at least ten days prior to the payment date of the distribution to be effective for that dividend or capital gain distribution.

The Plan Agent provides written confirmation of all transactions in the shareholder accounts in the Dividend Reinvestment Plan, including information you may need for tax records. Any proxy you receive will include all Common Shares you have received under the Dividend Reinvestment Plan.

Automatically reinvested dividends and distributions are taxed in the same manner as cash dividends and distributions. See "U.S. Federal Income Tax Matters" at page 67.

The Fund and the Plan Agent reserve the right to amend or terminate the Dividend Reinvestment Plan. There is no direct service charge to participants in the Dividend Reinvestment Plan; however, the Fund reserves the right to amend the Dividend Reinvestment Plan to include a service charge payable by the participants. If the Dividend Reinvestment Plan is amended to include such service charges, the Plan Agent will include a notification to shareholders that are registered with the Plan Agent. Additional information about the Dividend Reinvestment Plan may be obtained from the Plan Agent.

DESCRIPTION OF CAPITAL STRUCTURE AND COMMON SHARES

The following is a brief description of the capital structure of the Fund. This description does not purport to be complete. The Declaration and the Fund's Bylaws, as amended and restated through the date hereof (the "Bylaws") are on file with the SEC as an exhibit to the Fund's registration statement, of which this Prospectus is a part.

The Fund is a statutory trust established under the laws of State of Delaware on June 2, 2025. The Declaration provides that the Trustees of the Fund may authorize separate classes of shares of beneficial interest.

Common Shares

The Declaration authorizes the issuance of an unlimited number of Common Shares. The Common Shares will be issued with no par value per share. The fees and expenses for the Fund are set forth in "Summary of Fund Expenses" above. See also "Plan of Distribution" above.

Common Shareholders will be entitled to the payment of dividends and other distributions when, as and if declared by the Board. All Common Shares have equal rights to the payment of dividends and the distribution of assets upon liquidation. Common Shares will, when issued, be fully paid and, subject to matters discussed in "Anti-Takeover and Other Provisions in the Declaration of Trust," non-assessable, and will have no pre-emptive rights, rights to cumulative voting or, unless authorized by the Trustees, conversion rights. Upon liquidation of the Fund, after paying or adequately providing for the payment of all liabilities of the Fund, and upon receipt of such releases, indemnities, and refunding agreements as they deem necessary for their protection, the Trustees may distribute the remaining assets of the Fund among the Fund's Common Shareholders.

The Fund does not intend to hold annual meetings of shareholders. If the Fund does hold a meeting of shareholders, Common Shares of the Fund entitle their holders to one vote for each Common Share held. Each fractional share shall be entitled to a proportionate fractional vote.

The Fund will send semi-annual unaudited financial statements and audited annual financial statements to its Common Shareholders.

Common Shares are not, and are not expected to be, listed for trading on any national securities exchange nor is there expected to be any secondary trading market in the Common Shares.

Preferred Shares

The Declaration authorizes the issuance of an unlimited number of preferred shares. Preferred shares may be issued in one or more classes or series, with no par value and such rights as determined by the Board, by action of the Board without the approval of the Common Shareholders. Section 18 of the 1940 Act currently requires that the Fund have an asset coverage of 300% immediately after the issuance of senior securities representing indebtedness and an asset coverage of 200% immediately after the issuance of senior equity securities, such as preferred shares. In addition, under Section 18, no dividends or other distribution may be declared with respect to Common Shares (except a dividend payable in Common Shares) nor is any purchase of Common Shares permitted unless such asset coverages are maintained. Section 18 also requires that preferred shareholders of the Fund have the right, as a class, to elect at least two Trustees at all times and to elect a majority of the Trustees in the event two full years' dividends on the preferred shares are unpaid.

The issuance of preferred shares, if any, will result in increases to common shares and will dilute the voting power of Common Shares to the extent of matters on which Common Shares and preferred shares are entitled to vote together. The Fund does not currently intend to issue preferred shares.

CERTAIN PROVISIONS IN THE DECLARATION

The Declaration includes provisions that could limit the ability of other entities or persons to acquire control of the Fund. These provisions may have the impact of discouraging a third party from seeking to obtain control of the Fund, which attempts could have the effect of increasing the expenses of the Fund and interfering with the normal operation of the Fund.

The Declaration requires the majority of the Board to act in order to authorize certain Fund transactions not in the ordinary course of business, including a merger, reorganization, conversion, consolidation, sale, lease or exchange. Any such merger, reorganization, conversion, consolidation, sale, lease, or exchange shall not require the vote of the shareholders unless such vote is required by the 1940 Act, or unless such merger, reorganization, consolidation, or other transaction would result in an amendment of the Declaration which would otherwise require the approval of shareholders. Also, the Declaration provides that the Fund may be terminated without shareholder approval with consent of a majority of the Board unless approval is required by the 1940 Act.

The overall effect of these provisions is to render more difficult the accomplishment of a merger or the assumption of control of the Fund by a third party. These provisions also provide, however, the advantage of potentially requiring persons seeking control of the Fund to negotiate with its management regarding the price to be paid and facilitating the continuity of the Fund's investment objective and policies. The Board has considered the foregoing anti-takeover provisions and concluded that they are in the best interests of the Fund and its shareholders.

Other Provisions in the Declaration

The Declaration provides that shareholders may bring a derivative action on behalf of the Fund or any class of the Fund only if certain conditions are met, including that the shareholder or shareholders must make a pre-suit written demand upon the Trustees to bring the subject action and the Trustees must be afforded a reasonable amount of time to consider such shareholder request and to investigate the basis of such claim. The Trustees shall be entitled to retain counsel or other advisers in considering the merits of the request and shall require an undertaking by the shareholders making such request to reimburse the Fund for the expense of any such advisers in the event that the Trustees determine not to bring such action. Furthermore, shareholders may not bring a derivative action with respect to the Fund or any class of the Fund unless holders of at least ten percent (10%) of the outstanding shares of the Fund, or ten percent (10%) of the outstanding shares of the class to which such action relates, join in the bringing of such action. The foregoing requirements do not apply to claims brought under the federal securities laws. The Fund's Declaration and Bylaws also provide that with respect to any suit, action, or proceeding seeking to enforce any provision of, or based on any matter arising out of or in connection with, the Declaration, the Bylaws, the Fund, or any class or any shares, including any claim of any nature against the Fund, any class, or the Trustees or officers of the Fund, (i) such action shall be brought exclusively in the Court of Chancery of the State of Delaware to the extent there is subject matter jurisdiction in such court for the claims asserted or, if not, then in the Superior Court of

the State of Delaware, and (ii) each shareholder and other such persons claiming any interest in any Fund shares, with respect to any such claim, suit, action or proceeding, irrevocably waives any and all right to trial by jury. The exclusive state court jurisdiction provisions may result in shareholders having to bring such suit, action, or proceeding in forums that are inconvenient and less favorable to the shareholders. These provisions do not apply to claims brought under the federal securities laws. The Declaration also provides that if the demand for derivative action has been considered by the Trustees, and a majority of those Trustees who are not deemed to be Interested Persons determines that maintaining a suit would not be in the best interests of the Trust or the affected Class, the complaining Shareholders shall be barred from commencing the derivative action.

The foregoing is intended only as a summary and is qualified in its entirety by reference to the full text of the Declaration and Bylaws. The Declaration and Bylaws are on file with the SEC as an exhibit to the Fund's registration statement, of which this Prospectus is a part.

U.S. FEDERAL INCOME TAX MATTERS

This section is provided as general information and summarizes only some of the important U.S. federal income tax considerations affecting "U.S. shareholders" (i.e., beneficial owners of Common Shares that are "United States persons," as such term is defined under the Code but not partnerships investing in the Fund); the consequences under other tax laws and to investors that are partnerships (or entities treated as partnerships for U.S. federal income tax purposes) or shareholders that are not "United States persons" under the Code may differ. Prospective investors should consult their tax advisors as to the possible application of federal, state, local or non-U.S. income tax laws.

This summary is based on the Code, U.S. Treasury regulations, rulings, judicial decisions, and other applicable authority, all as of the date of this prospectus. These authorities are subject to change by legislative or administrative action, possibly with retroactive effect. This summary is not intended to be, and should not be construed to be, legal or tax advice to any particular purchaser of the Fund's securities. Please see the SAI for additional information regarding the tax aspects of investing in the Fund. Additionally, all prospective investors should consult their own tax advisors concerning the particular U.S. federal income tax considerations of investing in the Fund, as well as the consequences arising under the laws or other guidance of any other taxing jurisdiction.

Treatment as a Regulated Investment Company

The Fund intends to elect to be treated, and intends each year to qualify and be eligible to be treated, as a RIC under Subchapter M of the Code. A RIC is not subject to U.S. federal income tax at the corporate level on income and gains from investments that are distributed in a timely manner to its shareholders in the form of dividends.

Certain Fund Investments

The Fund's investments in certain CLOs could cause the Fund to recognize taxable income in excess of the cash generated by such investments (which may require the Fund to liquidate other investments in order to make required distributions).

Taxes on Fund Distributions

A U.S. shareholder will generally be subject to federal income tax on Fund distributions. For U.S. federal income tax purposes, Fund distributions will generally be taxable to a U.S. shareholder as either ordinary income or capital gains. Fund dividends consisting of distributions of investment income generally are taxable to shareholders as ordinary income. The Fund will inform shareholders of the amount and character of its distributions to shareholders.

U.S. federal income taxes on Fund distributions of capital gains are determined by how long the Fund owned or is deemed to have owned the investments that generated the capital gains, rather than how long a U.S. shareholder has owned the Fund shares. Distributions of net capital gains (that is, the excess of net long-term capital gains over net short-term capital losses, in each case determined with reference to any loss carryforwards) that are properly reported by the Fund as capital gain dividends generally will be treated as long-term capital gains includible in a U.S. shareholder's net capital gains and taxed to individuals at reduced rates. The Fund does not expect a significant portion of its distributions to be treated as long-term capital gains. Distributions of net short-

term capital gains in excess of net long-term capital losses generally will be taxable to U.S. shareholders as ordinary income. Distributions that the Fund properly reports to U.S. shareholders as “qualified dividend income” are taxable in the hands of individuals at the reduced tax rates applicable to long-term capital gains provided that both the individual U.S. shareholder and the Fund meet certain holding period and other requirements.

The Code generally imposes a 3.8% Medicare contribution tax on the net investment income of certain U.S. shareholders that are individuals, trusts and estates to the extent their income exceeds certain threshold amounts. Net investment income generally includes for this purpose dividends (other than exempt-interest dividends) paid by the Fund, including any capital gain dividends, and including net capital gains recognized on the sale, redemption or exchange of shares of the Fund. U.S. Shareholders are advised to consult their tax advisors regarding the possible implications of this additional tax on their investment in the Fund.

The ultimate tax characterization of the Fund’s distributions made in a taxable year cannot be determined finally until after the end of that taxable year. As a result, there is a possibility that the Fund may make total distributions during a taxable year in an amount that exceeds the Fund’s current and accumulated earnings and profits. In that case, the excess generally would be treated first as a tax-free return of capital and would reduce a U.S. shareholder’s tax basis in the applicable shares, with any amounts exceeding such basis treated as gain from the sale of such shares. A return of capital is not taxable, but it reduces a U.S. shareholder’s tax basis in the shares, thus reducing any capital loss or increasing any capital gain on a subsequent taxable disposition by the U.S. shareholder of the Common Shares.

A U.S. shareholder whose distributions are reinvested in Common Shares under the Dividend Reinvestment Plan will be treated for U.S. federal income tax purposes as having received an amount in distribution equal to the fair market value of the Common Shares issued to the U.S. shareholder, which amount will also be equal to the NAV of such shares. For U.S. federal income tax purposes, all distributions are generally taxable in the manner described above, whether a U.S. shareholder takes them in cash or they are reinvested pursuant to the Dividend Reinvestment Plan in additional shares of the Fund. See “Dividend Reinvestment Plan” above for further details.

Fund distributions are taxable to U.S. shareholders as described above even if they are paid from income or gains earned by the Fund before a U.S. shareholder’s investment (and thus were included in the price the U.S. shareholder paid). Certain shareholders may not be subject to taxes on amounts distributed to them based on their individual circumstances, such as shareholders who are not subject to income taxes.

Taxes on Sale, Exchange, or Disposition of Common Shares

Any gain resulting from the disposition of Common Shares that is treated as a sale or exchange for U.S. federal income tax purposes generally will be taxable to U.S. shareholders as a capital gain or capital loss for U.S. federal income tax purposes.

U.S. Shareholders who offer and are able to sell all of the Common Shares they hold or are deemed to hold in response to a repurchase offer (as described above) generally will be treated as having sold their Fund shares and generally will recognize a capital gain or loss. In the case of U.S. shareholders who tender or are able to sell fewer than all of their Fund shares, it is possible that any amounts that the U.S. shareholder receives in such repurchase will be taxable as a dividend to such U.S. shareholder. In addition, there is a risk that U.S. shareholders who do not tender any of their shares for repurchase, or whose percentage interest in the Fund otherwise increases because of the repurchase offer, will be treated for U.S. federal income tax purposes as having received a taxable dividend distribution as a result of their proportionate increase in the ownership of the Fund. The Fund’s use of cash to repurchase shares could adversely affect its ability to satisfy the distribution requirements for treatment as a RIC. The Fund could also recognize income in connection with its disposition of portfolio securities to fund share repurchases. Any such income would be considered in determining whether the Fund has satisfied any applicable distribution requirements.

Backup Withholding

If you are a resident or a citizen of the United States, by law, the Fund is generally required to withhold and remit the legally required backup withholding amount (currently a flat rate of 24%) of your dividends, distributions, sales proceeds, and any other payments you receive from the Fund if you fail to properly furnish the Fund with your correct taxpayer identification number or social security number and make other required certifications, if you have

under-reported dividend or interest income or if you are otherwise subject to backup withholding. In certain circumstances, the IRS may also require the Fund to backup withhold even when an appropriate taxpayer identification number or social security number has been provided or certified. The backup withholding rules may also apply to distributions that are properly reported as exempt-interest dividends.

General

The foregoing discussion relates solely to U.S. federal income tax laws. Dividends and distributions also may be subject to state and local taxes. Shareholders are urged to consult their tax advisors regarding specific questions as to federal, state, local, and, where applicable, foreign taxes. Non-U.S. investors should consult their tax advisors concerning the tax consequences of ownership of Common Shares of the Fund. The foregoing is a general and abbreviated summary of the applicable provisions of the Code and related regulations currently in effect. For the complete provisions, reference should be made to the pertinent Code sections and regulations. The Code and regulations are subject to change by legislative or administrative actions.

Please see “U.S. Federal Income Tax Considerations” in the SAI for additional information regarding the tax aspects of investing in Common Shares of the Fund.

CUSTODIAN AND TRANSFER AGENT

The custodian of the assets of the Fund is U.S. Bank National Association (the “Custodian”), 1555 North Rivercenter Drive, Suite 302, Milwaukee, Wisconsin 53212. The Custodian holds and administers the assets in the Fund’s portfolio.

U.S. Bancorp Fund Services, LLC, doing business as U.S. Bank Global Fund Services (“Fund Services”), 615 East Michigan Street, Milwaukee, Wisconsin 53202, serves as the Fund’s transfer agent, dividend disbursement agent and shareholder servicing agent, as well as agent for the Plan. Fund Services also serves as the Fund’s administrator, providing the Fund with administrative and management services (other than investment advisory services) and accounting services, including portfolio accounting services, tax accounting services, and furnishing financial reports. In this capacity, Fund Services does not have any responsibility or authority for the management of the Fund, the determination of investment policy, or for any matter pertaining to the distribution of Shares.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Cohen & Company, Ltd., 1835 Market Street, Suite 310, Philadelphia, PA 19103, serves as the independent registered public accounting firm for the Fund. Its services include auditing the Fund’s financial statements. Cohen & Co Advisory, LLC, an affiliate of Cohen & Company, Ltd., provides tax services to the Fund as requested.

LEGAL MATTERS

Certain legal matters will be passed on for the Fund by Vedder Price P.C., 222 N LaSalle St, Chicago, Illinois 60601.

APPENDIX A

DESCRIPTION OF SECURITIES RATINGS

The Fund's investments may range in quality from securities rated in the lowest category in which the Fund is permitted to invest to securities rated in the highest category (as rated by Moody's, Standard & Poor's, or Fitch, or, if unrated, determined by the Investment Manager to be of comparable quality). The percentage of the Fund's assets invested in securities in a particular rating category will vary. The following terms are generally used to describe the credit quality of fixed income securities:

High Quality Debt Securities are those rated in one of the two highest rating categories (the highest category for commercial paper) or, if unrated, deemed comparable by the Investment Manager.

Investment Grade Debt Securities are those rated in one of the four highest rating categories, or, if unrated, deemed comparable by the Investment Manager.

Below Investment Grade High Yield Securities ("Junk Bonds"), are those rated lower than Baa by Moody's, BBB by Standard & Poor's or Fitch, and comparable securities. They are deemed predominantly speculative with respect to the issuer's ability to repay principal and interest.

The following is a description of Moody's, Standard & Poor's and Fitch's rating categories applicable to fixed income securities.

Moody's Investors Service, Inc.

Global Long-Term Rating Scale

Ratings assigned on Moody's global long-term rating scales are forward-looking opinions of the relative credit risks of financial obligations issued by non-financial corporates, financial institutions, structured finance vehicles, project finance vehicles, and public sector entities. Long-term ratings are assigned to issuers or obligations with an original maturity of eleven months or more and reflect both on the likelihood of a default or impairment on contractual financial obligations and the expected financial loss suffered in the event of default or impairment.

Aaa:	Obligations rated Aaa are judged to be of the highest quality, subject to the lowest level of credit risk.
Aa:	Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.
A:	Obligations rated A are judged to be upper-medium grade and are subject to low credit risk.
Baa:	Obligations rated Baa are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.
Ba:	Obligations rated Ba are judged to be speculative and are subject to substantial credit risk.
B:	Obligations rated B are considered speculative and are subject to high credit risk.
Caa:	Obligations rated Caa are judged to be speculative of poor standing and are subject to very high credit risk.
Ca:	Obligations rated Ca are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.
C:	Obligations rated C are the lowest rated and are typically in default, with little prospect for recovery of principal or interest.

Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category. Additionally, a "(hyb)" indicator is appended to all ratings of hybrid securities issued by banks, insurers, finance companies, and securities firms. *

- * By their terms, hybrid securities allow for the omission of scheduled dividends, interest, or principal payments, which can potentially result in impairment if such an omission occurs. Hybrid securities may also be subject to contractually allowable write-downs of principal that could result in impairment. Together with the hybrid indicator, the long-term obligation rating assigned to a hybrid security is an expression of the relative credit risk associated with that security.

Medium-Term Note Program Ratings

Moody's assigns provisional ratings to medium-term note (MTN) or similar programs and definitive ratings to the individual debt securities issued from them (referred to as drawdowns or notes).

MTN program ratings are intended to reflect the ratings likely to be assigned to drawdowns issued from the program with the specified priority of claim (e.g., senior or subordinated). To capture the contingent nature of a program rating, Moody's assigns provisional ratings to MTN programs. A provisional rating is denoted by a (P) in front of the rating.

The rating assigned to a drawdown from a rated MTN or bank/deposit note program is definitive in nature, and may differ from the program rating if the drawdown is exposed to additional credit risks besides the issuer's default, such as links to the defaults of other issuers, or has other structural features that warrant a different rating. In some circumstances, no rating may be assigned to a drawdown.

Moody's encourages market participants to contact Moody's Ratings Desks or visit www.moodys.com directly if they have questions regarding ratings for specific notes issued under a medium-term note program. Unrated notes issued under an MTN program may be assigned an NR (not rated) symbol.

National Scale Long-Term Ratings

Moody's long-term National Scale Ratings (NSRs) are opinions of the relative creditworthiness of issuers and financial obligations within a particular country. NSRs are not designed to be compared among countries; rather, they address relative credit risk within a given country. Moody's assigns national scale ratings in certain local capital markets in which investors have found the global rating scale provides inadequate differentiation among credits or is inconsistent with a rating scale already in common use in the country.

In each specific country, the last two characters of the rating indicate the country in which the issuer is located, or the financial obligation was issued (e.g., Aaa.ke for Kenya).

Aaa.n:	Issuers or issues rated Aaa.n demonstrate the strongest creditworthiness relative to other domestic issuers and issuances.
Aa.n:	Issuers or issues rated Aa.n demonstrate very strong creditworthiness relative to other domestic issuers and issuances.
A.n:	Issuers or issues rated A.n present above-average creditworthiness relative to other domestic issuers and issuances.
Baa.n:	Issuers or issues rated Baa.n represent average creditworthiness relative to other domestic issuers and issuances.
Ba.n:	Issuers or issues rated Ba.n demonstrate below-average creditworthiness relative to other domestic issuers and issuances.
B.n:	Issuers or issues rated B.n demonstrate weak creditworthiness relative to other domestic issuers and issuances.
Caa.n:	Issuers or issues rated Caa.n demonstrate very weak creditworthiness relative to other domestic issuers and issuances.
Ca.n:	Issuers or issues rated Ca.n demonstrate extremely weak creditworthiness relative to other domestic issuers and issuances.

C.n: Issuers or issues rated C.n demonstrate the weakest creditworthiness relative to other domestic issuers and issuances.

Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Short-Term Obligation Ratings

The Municipal Investment Grade (MIG) scale is used for US municipal cash flow notes, bond anticipation notes and certain other short-term obligations, which typically mature in three years or less. Under certain circumstances, the MIG scale is used for bond anticipation notes with maturities of up to five years.

MIG 1:	This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.
MIG 2:	This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.
MIG 3:	This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.
SG:	This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

Demand Obligation Ratings

In the case of variable rate demand obligations (VRDOs), a two-component rating is assigned. The components are a long-term rating and a short-term demand obligation rating. The long-term rating addresses the issuer's ability to meet scheduled principal and interest payments. The short-term demand obligation rating addresses the ability of the issuer or the liquidity provider to make payments associated with the purchase-price-upon-demand feature ("demand feature") of the VRDO. The short-term demand obligation rating uses the Variable Municipal Investment Grade (VMIG) scale.

VMIG 1:	This designation denotes superior credit quality. Excellent protection is afforded by the superior short-term credit strength of the liquidity provider and structural and legal protections.
VMIG 2:	This designation denotes strong credit quality. Good protection is afforded by the strong short-term credit strength of the liquidity provider and structural and legal protections.
VMIG 3:	This designation denotes acceptable credit quality. Adequate protection is afforded by the satisfactory short-term credit strength of the liquidity provider and structural and legal protections.
SG:	This designation denotes speculative-grade credit quality. Demand features rated in this category may be supported by a liquidity provider that does not have a sufficiently strong short-term rating or may lack the structural or legal protections.

Standard & Poor's Ratings Services

Long-Term Issue Credit Ratings

Issue credit ratings are based, in varying degrees, on S&P Global Ratings' ("S&P") analysis of the following considerations:

- Likelihood of payment—capacity and willingness of the obligor to meet its financial commitments on an obligation in accordance with the terms of the obligation;
- Nature and provisions of the financial obligation and the promise S&P imputes; and

- Protection afforded by, and relative position of, the financial obligation in the event of a bankruptcy, reorganization, or other arrangement under the laws of bankruptcy and other laws affecting creditors' rights.

Issue ratings are an assessment of default risk but may incorporate an assessment of relative seniority or ultimate recovery in the event of default. Junior obligations are typically rated lower than senior obligations, to reflect lower priority in bankruptcy, as noted above. (Such differentiation may apply when an entity has both senior and subordinated obligations, secured and unsecured obligations, or operating company and holding company obligations.)

Investment Grade

AAA:	An obligation rated 'AAA' has the highest rating assigned by S&P. The obligor's capacity to meet its financial commitments on the obligation is extremely strong.
AA:	An obligation rated 'AA' differs from the highest-rated obligations only to a small degree. The obligor's capacity to meet its financial commitments on the obligation is very strong.
A:	An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitments on the obligation is still strong.
BBB:	An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken the obligor's capacity to meet its financial commitments on the obligation.

Speculative Grade

Obligations rated 'BB', 'B', 'CCC', 'CC', and 'C' are regarded as having significant speculative characteristics. 'BB' indicates the least degree of speculation and 'C' the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposure to adverse conditions.

BB:	An obligation rated 'BB' is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions that could lead to the obligor's inadequate capacity to meet its financial commitments on the obligation.
B:	An obligation rated 'B' is more vulnerable to nonpayment than obligations rated 'BB', but the obligor currently has the capacity to meet its financial commitments on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitments on the obligation.
CCC:	An obligation rated 'CCC' is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitments on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitments on the obligation.
CC:	An obligation rated 'CC' is currently highly vulnerable to nonpayment. The 'CC' rating is used when a default has not yet occurred, but S&P expects default to be a virtual certainty, regardless of the anticipated time to default.
C:	An obligation rated 'C' is currently highly vulnerable to nonpayment, and the obligation is expected to have lower relative seniority or lower ultimate recovery compared with obligations that are rated higher.
D:	An obligation rated 'D' is in default or in breach of an imputed promise. For non-hybrid capital instruments, the 'D' rating category is used when payments on an

obligation are not made on the date due, unless S&P believes that such payments will be made within the next five business days in the absence of a stated grace period or within the earlier of the stated grace period or the next 30 calendar days. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. A rating on an obligation is lowered to 'D' if it is subject to a distressed debt restructuring.

NR: This indicates that a rating has not been assigned or is no longer assigned.

Plus (+) or minus (-): The ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the rating categories.

Short-Term Issue Credit Ratings

- A-1: A short-term obligation rated 'A-1' is rated in the highest category by S&P. The obligor's capacity to meet its financial commitments on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor's capacity to meet its financial commitments on these obligations is extremely strong.
- A-2: A short-term obligation rated 'A-2' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitments on the obligation is satisfactory.
- A-3: A short-term obligation rated 'A-3' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken an obligor's capacity to meet its financial commitments on the obligation.
- B: A short-term obligation rated 'B' is regarded as vulnerable and has significant speculative characteristics. The obligor currently has the capacity to meet its financial commitments; however, it faces major ongoing uncertainties that could lead to the obligor's inadequate capacity to meet its financial commitments.
- C: A short-term obligation rated 'C' is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitments on the obligation.
- D: A short-term obligation rated 'D' is in default or in breach of an imputed promise. For non-hybrid capital instruments, the 'D' rating category is used when payments on an obligation are not made on the date due, unless S&P believes that such payments will be made within any stated grace period. However, any stated grace period longer than five business days will be treated as five business days. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. A rating on an obligation is lowered to 'D' if it is subject to a distressed debt restructuring.

Dual Ratings: Dual ratings may be assigned to debt issues that have a put option or demand feature. The first component of the rating addresses the likelihood of repayment of principal and interest as due, and the second component of the rating addresses only the demand feature. The first component of the rating can relate to either a short-term or long-term transaction and accordingly use either short-term or long-term rating symbols. The second component of the rating relates to the put option and is assigned a short-term rating symbol (for example, 'AAA/A-1+' or 'A-1+/ A-1'). With U.S. municipal short-term demand debt, the U.S. municipal short-term note rating symbols are used for the first component of the rating (for example, 'SP-1+/A-1+').

Active Qualifiers

S&P uses the following qualifiers that limit the scope of a rating. The structure of the transaction can require the use of a qualifier such as a 'p' qualifier, which indicates the rating addresses the principal portion of the obligation only. A qualifier appears as a suffix and is part of the rating.

- L: Ratings qualified with 'L' apply only to amounts invested up to federal deposit insurance limits.
- p: This suffix is used for issues in which the credit factors, the terms, or both, that determine the likelihood of receipt of payment of principal are different from the credit factors, terms or both that determine the likelihood of receipt of interest on the obligation. The 'p' suffix indicates that the rating addresses the principal portion of the obligation only and that the interest is not rated.
- prelim: Preliminary ratings, with the 'prelim' suffix, may be assigned to obligors or obligations, including financial programs, in the circumstances described below. Assignment of a final rating is conditional on the receipt by S&P of appropriate documentation. S&P reserves the right not to issue a final rating. Moreover, if a final rating is issued, it may differ from the preliminary rating.
- Preliminary ratings may be assigned to obligations and project finance issues, pending receipt of final documentation and legal opinions.
 - Preliminary ratings may be assigned to obligations that will likely be issued upon the obligor's emergence from bankruptcy or similar reorganization, based on late-stage reorganization plans, documentation, and discussions with the obligor. Preliminary ratings may also be assigned to the obligors. These ratings consider the anticipated general credit quality of the reorganized or post-bankruptcy issuer as well as attributes of the anticipated obligation(s).
 - Preliminary ratings may be assigned to entities that are being formed or that are in the process of being independently established when, in S&P's opinion, documentation is close to final. Preliminary ratings may also be assigned to the obligations of these entities.
 - Preliminary ratings may be assigned when a previously unrated entity is undergoing a well-formulated restructuring, recapitalization, significant financing, or other transformative event, generally at the point that investor or lender commitments are invited. The preliminary rating may be assigned to the entity and to its proposed obligation(s). These preliminary ratings consider the anticipated general credit quality of the obligor, as well as attributes of the anticipated obligation(s), assuming successful completion of the transformative event. Should the transformative event not occur, S&P would likely withdraw these preliminary ratings.
 - A preliminary recovery rating may be assigned to an obligation that has a preliminary issue credit rating.
- t: This symbol indicates termination structures that are designed to honor their contracts to full maturity or, should certain events occur, to terminate and cash settle all their contracts before their final maturity date.
- cir: This symbol indicates a Counterparty Instrument Rating (CIR), which is a forward-looking opinion about the creditworthiness of an issuer in a securitization structure with respect to a specific financial obligation to a counterparty (including interest rate swaps, currency swaps, and liquidity facilities). The CIR is determined on an ultimate payment basis; these opinions do not consider timeliness of payment.

Inactive Qualifiers (no longer applied or outstanding)

- *: This symbol indicated that the rating was contingent upon S&P receipt of an executed copy of the escrow agreement or closing documentation confirming investments and cash flows. Discontinued use in August 1998.

c:	This qualifier was used to provide additional information to investors that the bank may terminate its obligation to purchase tendered bonds if the long-term credit rating of the issuer was lowered to below an investment-grade level and/or the issuer's bonds were deemed taxable. Discontinued use in January 2001.
G:	The letter 'G' followed the rating symbol when a fund's portfolio consisted primarily of direct U.S. government securities.
i:	This suffix was used for issues in which the credit factors, terms, or both that determine the likelihood of receipt of payment of interest are different from the credit factors, terms, or both that determine the likelihood of receipt of principal on the obligation. The 'i' suffix indicated that the rating addressed the interest portion of the obligation only. The 'i' suffix was always used in conjunction with the 'p' suffix, which addresses likelihood of receipt of principal. For example, a rated obligation could have been assigned a rating of 'AAApNRi' indicating that the principal portion was rated 'AAA' and the interest portion of the obligation was not rated.
pi:	This qualifier was used to indicate ratings that were based on an analysis of an issuer's published financial information, as well as additional information in the public domain. Such ratings did not, however, reflect in-depth meetings with an issuer's management and therefore, could have been based on less comprehensive information than ratings without a 'pi' suffix. Discontinued use as of December 2014 and as of August 2015 for Lloyd's Syndicate Assessments.
pr:	The letters 'pr' indicate that the rating was provisional. A provisional rating assumed the successful completion of a project financed by the debt being rated and indicates that payment of debt service requirements was largely or entirely dependent upon the successful, timely completion of the project. This rating, however, while addressing credit quality subsequent to completion of the project, made no comment on the likelihood of or the risk of default upon failure of such completion.
q:	A 'q' subscript indicates that the rating is based solely on quantitative analysis of publicly available information. Discontinued use in April 2001.
r:	The 'r' modifier was assigned to securities containing extraordinary risks, particularly market risks, that are not covered in the credit rating. The absence of an 'r' modifier should not be taken as an indication that an obligation would not exhibit extraordinary noncredit-related risks. S&P discontinued the use of the 'r' modifier for most obligations in June 2000 and for the balance of obligations (mainly structured finance transactions) in November 2002.

Fitch Ratings

Long-Term Credit Ratings Investment Grade

Rated entities in a number of sectors, including financial and non-financial corporations, sovereigns, insurance companies and certain sectors within public finance, are generally assigned Issuer Default Ratings ("IDRs"). IDRs are also assigned to certain entities or enterprises in global infrastructure, project finance, and public finance. IDRs opine on an entity's relative vulnerability to default (including by way of a distressed debt exchange) on financial obligations. The threshold default risk addressed by the IDR is generally that of the financial obligations whose non-payment would best reflect the uncured failure of that entity. As such, IDRs also address relative vulnerability to bankruptcy, administrative receivership or similar concepts.

In aggregate, IDRs provide an ordinal ranking of issuers based on the agency's view of their relative vulnerability to default, rather than a prediction of a specific percentage likelihood of default.

AAA:	Highest credit quality. 'AAA' ratings denote the lowest expectation of default risk. They are assigned only in cases of exceptionally strong capacity for payment of
------	--

financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

AA: Very high credit quality. 'AA' ratings denote expectations of very low default risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

A: High credit quality. 'A' ratings denote expectations of low default risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

BBB: Good credit quality. 'BBB' ratings indicate that expectations of default risk are currently low. The capacity for payment of financial commitments is considered adequate, but adverse business or economic conditions are more likely to impair this capacity.

Speculative Grade

BB: Speculative. 'BB' ratings indicate an elevated vulnerability to default risk, particularly in the event of adverse changes in business or economic conditions over time; however, business, or financial flexibility exists that supports the servicing of financial commitments.

B: Highly speculative. 'B' ratings indicate that material default risk is present, but a limited margin of safety remains. Financial commitments are currently being met; however, capacity for continued payment is vulnerable to deterioration in the business and economic environment.

CCC: Substantial credit risk. Very low margin for safety. Default is a real possibility.

CC: Very high levels of credit risk. Default of some kind appears probable.

C: Near default.

A default or default-like process has begun, or the issuer is in standstill, or for a closed funding vehicle, payment capacity is irrevocably impaired. Conditions that are indicative of a 'C' category rating for an issuer include:

- a. the issuer has entered into a grace or cure period following non-payment of a material financial obligation;
- b. the issuer has entered into a temporary negotiated waiver or standstill agreement following a payment default on a material financial obligation;
- c. the formal announcement by the issuer or their agent of a distressed debt exchange;
- d. a closed financing vehicle where payment capacity is irrevocably impaired such that it is not expected to pay interest and/or principal in full during the life of the transaction, but where no payment default is imminent

RD: Restricted default. 'RD' ratings indicate an issuer that in Fitch's opinion has experienced an uncured payment default or distressed debt exchange on a bond, loan or other material financial obligation but has not entered into bankruptcy filings, administration, receivership, liquidation or other formal winding-up procedure, and has not otherwise ceased operating. This would include:

- i. the selective payment default on a specific class or currency of debt;
- ii. the uncured expiry of any applicable grace period, cure period or default forbearance period following a payment default on a bank loan, capital markets security or other material financial obligation;

- iii. the extension of multiple waivers or forbearance periods upon a payment default on one or more material financial obligations, either in series or in parallel; ordinary execution of a distressed debt exchange on one or more material financial obligations.
- D: Default. 'D' ratings indicate an issuer that in Fitch's opinion has entered into bankruptcy filings, administration, receivership, liquidation or other formal winding-up procedure or that has otherwise ceased business. Default ratings are not assigned prospectively to entities or their obligations; within this context, non-payment on an instrument that contains a deferral feature or grace period will generally not be considered a default until after the expiration of the deferral or grace period, unless a default is otherwise driven by bankruptcy or other similar circumstance, or by a distressed debt exchange.

In all cases, the assignment of a default rating reflects the agency's opinion as to the most appropriate rating category consistent with the rest of its universe of ratings, and may differ from the definition of default under the terms of an issuer's financial obligations or local commercial practice.

The modifiers "+" or "-" may be appended to a rating to denote relative status within major rating categories. For example, the rating category 'AA' has three notch-specific rating levels ('AA+', 'AA', 'AA-'; each a rating level). Such suffixes are not added to 'AAA' ratings and ratings below the 'CCC' category.

Recovery Ratings

Recovery Ratings are assigned to selected individual securities and obligations, most frequently for individual obligations of corporate finance issuers with IDRs in speculative grade categories.

Among the factors that affect recovery rates for securities are the collateral, the seniority relative to other obligations in the capital structure (where appropriate), and the expected value of the company or underlying collateral in distress.

The Recovery Rating scale is based on the expected relative recovery characteristics of an obligation upon the curing of a default, emergence from insolvency or following the liquidation or termination of the obligor or its associated collateral.

Recovery Ratings are an ordinal scale and do not attempt to precisely predict a given level of recovery. As a guideline in developing the rating assessments, the agency employs broad theoretical recovery bands in its ratings approach based on historical averages and analytical judgment, but actual recoveries for a given security may deviate materially from historical averages.

- RR1: Outstanding *recovery prospects given default*. 'RR1' rated securities have characteristics consistent with securities historically recovering 91%-100% of current principal and related interest.
- RR2: Superior *recovery prospects given default*. 'RR2' rated securities have characteristics consistent with securities historically recovering 71%-90% of current principal and related interest.
- RR3: Good *recovery prospects given default*. 'RR3' rated securities have characteristics consistent with securities historically recovering 51%-70% of current principal and related interest.
- RR4: Average *recovery prospects given default*. 'RR4' rated securities have characteristics consistent with securities historically recovering 31%-50% of current principal and related interest.
- RR5: Below average *recovery prospects given default*. 'RR5' rated securities have characteristics consistent with securities historically recovering 11%-30% of current principal and related interest.

RR6: *Poor recovery prospects given default.* ‘RR6’ rated securities have characteristics consistent with securities historically recovering 0%-10% of current principal and related interest.

Short-Term Credit Ratings

A short-term issuer or obligation rating is based in all cases on the short-term vulnerability to default of the rated entity and relates to the capacity to meet financial obligations in accordance with the documentation governing the relevant obligation. Short-term deposit ratings may be adjusted for loss severity. Short-Term Ratings are assigned to obligations whose initial maturity is viewed as “short term” based on market convention (a long-term rating can also be used to rate an issue with short maturity). Typically, this means up to 13 months for corporate, sovereign, and structured obligations, and up to 36 months for obligations in U.S. public finance markets.

- F1: *Highest short-term credit quality.* Indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added “+” to denote any exceptionally strong credit feature.
- F2: *Good short-term credit quality.* Good intrinsic capacity for timely payment of financial commitments.
- F3: *Fair short-term credit quality.* The intrinsic capacity for timely payment of financial commitments is adequate.
- B: *Speculative short-term credit quality.* Minimal capacity for timely payment of financial commitments, plus heightened vulnerability to near term adverse changes in financial and economic conditions.
- C: *High short-term default risk.* Default is a real possibility.
- RD: *Restricted default.* Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Typically, applicable to entity ratings only.
- D: *Default.* Indicates a broad-based default event for an entity, or the default of a short-term obligation.

All dealers that buy, sell or trade the Fund's Common Shares, whether or not participating in this offering, may be required to deliver a prospectus in accordance with the terms of the dealers' agreements with the Fund's Distributor.

Investors should rely only on the information contained in this prospectus.
